

The New Model

EUREKA MOWER

 A technical illustration of the Eureka Mower machine, showing its red frame, large wheels, and cutting blades. The brand name 'EUREKA' is visible on a small sign on the machine.

MANUFACTURED BY THE

EUREKA MOWER CO.

UTICA, N.Y.

OFFICE OF

EUREKA MOWER COMPANY,

UTICA, N. Y.

TO THE FARMERS.

A new company has been organized, with a large capital, to manufacture Eureka Mowers at Utica, N. Y. No more machines will be made at Towanda, but extensive new works have been erected at Utica, and thoroughly equipped with modern conveniences and improvements.

The incorporators of the new company are practical business men.

The management is in the hands of competent parties.

Transportation Facilities

are unsurpassed, and with every advantage the new concern expects to supply the farming world with the

—BROAD-CUT—

EASY WORKING EUREKA MOWER

PERFECT IN EVERY PART.

This machine leaves the grass in the best possible shape for curing.

The machine being reversible, is adapted to cutting on side hills, and also lodged grass.

It will mow a

SIX-FEET SWATH,

with no more labor for the team than is required to cut a four-foot swath with the best side-cut mower in use.

For light draft, and rapid cutting, this celebrated Mower is the end of the law.

**THE ONLY DIRECT DRAFT MOWER
MANUFACTURED,**

SIZES, 5, 6 AND 7 FEET CUT.

Improvements in the Eureka, have finally perfected a Mower that has no successful rival in the world.
