---

Tat April 12 1870

a 28 Plate 12

Six pieces of steel, bent in zigzag shape,  
Form a harrow-frame, no conditions  
can break,  
Running diagonally from front to rear,  
Increasing its strength till there's nothing to fear.

No other frame is braced half as strong,  
And no harrow draws lighter over the  
ground,  
Aggressive, progressive, sturdy and neat,  
It downs every harrow on earth that it  
meets.

Frame, ratchet and tooth are firmly locked,  
By a bolt of steel, made strong and stout,  
On which, the ratchet and teeth turn  
around,  
To adjust it, shallow or deep, in the  
ground.

No bolt-heads or nuts are placed under  
neath

To turn, or wear off, and loosen the  
teeth, [of steel]

The wear thus obtained in our harrow  
Is equalled by no other one in the field

Firm in the ratchet the tooth is held fast,  
Longitudinal adjustment is a thing of  
the past.  
You can set it to cut either shallow or  
deep,  
Without having to use the old-fashion-  
ed curved seat.

Any angle, or depth can be easily attained,  
[through the frame;  
By loosening one nut, on the bolt  
Then by simply turning the tooth up or  
down,  
You adjust it, shallow or deep in the  
ground.

On the bolt. with the ratchet, the tooth  
turns about, [it all out,  
And by turning, you see, you can wear  
"Not so with the teeth on other harrows,"  
you say,  
For before they wear out you must  
throw them away,

Be wise, then, and purchase none but  
the best, [of the rest,  
It will cost you no more than some  
While the wear is five times greater,  
or more,  
Than obtained by the faulty adjustment  
before.

Expert Judges pronounce it "the best  
ever seen,  
While from practical experience the  
same facts are gleaned,  
And the Farmers and Dealers are spread-  
ing the cry,  
That the New Hensch & Dromgold is  
the Harrow to buy.

And why they are growing so firm in  
belief,

Is because they adjust it to wear out  
the teeth,

No Dealer, if wise, will allow it to pass,  
For no other Harrow will sell half so  
fast.

OUR  
"CHAMPION"  
STEEL WALKING  
CULTIVATOR

**HENCH & DROMGOLD, - - York, Pa.**

FRENCH & DROMGOLD'S  
All Steel Frame Spring-Tooth  
HARROWS,

A WONDERFUL IMPROVEMENT,

**TEETH QUICKLY  
ADJUSTED**

— BY ONLY —

**Loosening One Nut**

**The Best Tooth Holder Ever Invented.**

The tooth is held in position by Ratchet with which it can be adjusted so as to wear from 15 to 18 inches off the point of the tooth, which is four or five times as much wear or service as can be obtained from any other Spring-tooth Harrow in existence
