This illustration shows our three rail fence, 38 inches high with tops on pickets, scrolls and rosettes, single gate and heavy cast-iron gate posts. We make a variety of two and three rail fences.

For further particulars call on us, or write for prices.

Bone and Shell Mill

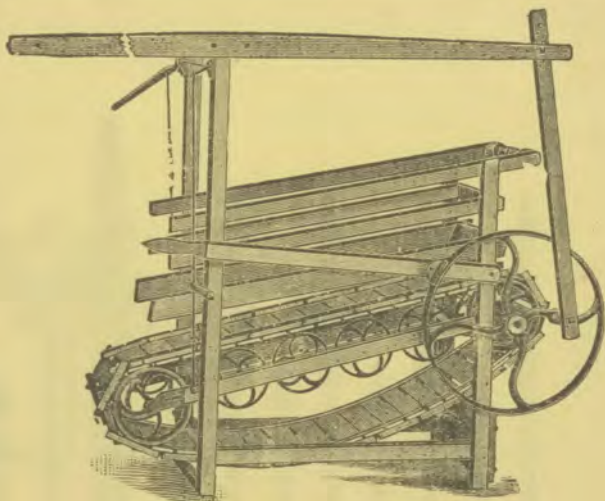

This small mill grinds, fine or course, bone, shells, corn and all other grain, also coffee, spices, etc.

It has a flat faced fly-wheel, which makes it suitable to be run by belt.

No poultry yard is profitable without one.

Price, \$5.00

Weight, 35 pounds.

Baby Tread Power

This power can be run by dog, sheep or goat, and is just the power for running light machinery such as hand cream separators, butter churns, washing machines, gig saws, pumps, or anything that requires one man's power.

The rocking beam as shown in cut is only needed for running a dash churn. The driving shaft extends on both sides. The fly-wheel is 25 inches in diameter, flat face so that a driving belt can be used on it. For some purposes, a smaller belt pulley is required. The driving pulley makes from 60 to 75 revolutions per minute.

Price, as shown in cut,		\$21.00
" without rocking beam,		20.00
" for extra 12 inch pulley,		2.00

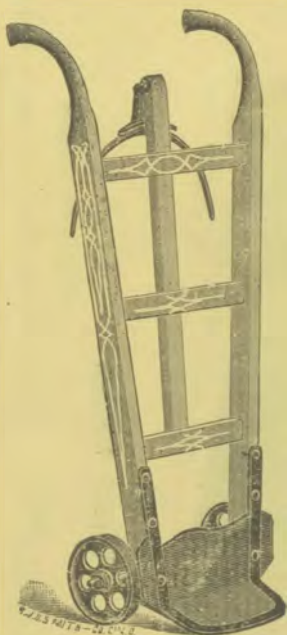

Weight, 175 pounds.

If the order does not specify, we will send power without rocking beam, and with fly-wheel only.
