

MINNEAPOLIS TWINE BINDER

MINNIE LOOKS AFTER THE SHEAVES.

THE MINNEAPOLIS,

THE BINDER WHICH MAKES A SHORT AND PLEASANT HARVEST, AND THE ACKNOWLEDGED LEADER OF THE APPLEBYS.

It is built under the supervision of Mr. J. F. APPLEBY, the patentee, and the greatest care exercised in every detail of its construction. Among its many good points are the following:

THE DOUBLE PACKER TRIP; the only trip striking back of the bundle, and absolutely preventing choking and clogging.

THE TRAVELING AND SINGLE DISK, which relieves strain on the twine, and cleans the cord holder at each revolution.

A LOCKING DEVICE, which has no connection with the plunger bolt, prevents rattling, and is positive in action.

SHIFTING BINDER, eclipsing all others, and works as easy as rocking a chair.

ANGLE IRON BAR, of latest and best pattern, fitted with malleable iron, steel-faced guards.

RAISING AND LOWERING DEVICE, which enables the driver to do better and cleaner work with less trouble than any other machine.

A strong *Master Wheel, Durable Gear, Adjustable Reel, First Quality Canvases,* and every other feature necessary to make up a first-class Harvester and Binder.
