

THEY CHEERED
THE
Chief

Well, I am back, wife, tale
an' sound,
We had a splendid County
Fair;
It seemed the folks for miles
around
In mass had congregated
there,
I sold your jar o' butter at
just twice the market price,
an' brought
You home the premium rib-
ben that
The Judges fastened to the
pot.

The stock displays best anything
I think I ever saw before,
An' all the races in the ring
Were square and honest to the
core,
They had some chickens in the
pens
That fairly took my breath
away—
They looked like ostriches, not
hens,
So tawny big and fat were they.

I met Josiah looking at
His neighbors' porkers get
the prize:
Says he "such prejudice as
that
I do eternally despise—
If they omit—I'll understand
That they are most infernal
green,—
The Johnston Cultivator, and
The Johnston Harvesting
Machines."

"No fear of that—I guess they know
Enough to make no such mistake;
Besides, this year the Johnsons show
A new machine that takes the cake,"
Then off we started on a trot,
And found a crowd that whooped and
cheered,
Led by the Judges, who forgot
Themselves, as the machine
appeared.

It was a pulverizer—Scott!
It was a most enthusias' sight,
We clapped our hands till you'd a thought
Of bald head row and bullet night.
For that machine just worked the ground,
And mixed in the manure so well
That everybody standin' round,
Could just do nothin' else but yell.

Then wile you should have heard the crowd
Call to the willing Judges: "Come—
An' tie your ribbon, I was proud
That Johnston got the premium,
An' then you should have seen us sign
The book of orders, on the spot;
An' 'mongst the foremost name was mine,
—The cash, you say—Pshaw, I forgot.

But never mind, we won't regret
A Johnston Pulverizer, wife;
It takes a sacrifice to get
Sometimes, the best there is in life.
Alone—it might have been absurd,
But there's the Judge's firm belief,
An' then, dear wife, you should have heard
Just how the people "cheered the chief."

The "Continental" Disk Pulverizer.

Square Shaft, Disk
Thimble and Bumper.

IT TILLS

The Entire Width of the Cut.

Leaving no ridge in the centre or between
gangs not cultivated. Made in widths
from 6 to 25 feet.

Convex Bumpers.

The Draw Iron
Is attached to the shaft,
thus reducing the draft.

The Scraper Lever
Can be operated by the
driver's hand or foot
while he is in the seat.

All rotary disk pulver-
izers have a strong end
pressure in an opposite
direction from which the
soil is turned. But our
bumpers revolving in the
same direction are so
made that they simply
roll against each other
and prevent all friction
from that source.
