

17 Reasons

Why You Should "Own
Your Own" Papec Cutter.

1. Because you pay out about 20 to 25% of its cost each year if you hire an outfit.
2. Because the actual investment would cost you only from \$9.00 to \$17.00 a year interest, depending on the size.
3. Because the MONEY you spend for hiring someone else to do your filling would pay for your own cutter in three or four years, and you would then have several years' service ahead of you.
4. Because you can do your own filling cheaper and better than anyone else can do it for you.
5. Because it is just as necessary that you own your own cutter and fill your own silo as that you do your own plowing or planting or harvesting.
6. Because the biggest saving is not in the actual money you handle—but in the greater value of your silage when cut and packed the way it should be cut and packed.
7. Because the empty one-fourth space in your silo after settling can easily be refilled with more silage when you have your own cutter.
8. Because this extra feed next spring at \$7.00 a ton will be worth almost the price of a cutter. If you can pack or store another 25 tons in that empty space, it will really be worth \$175.00 in extra feed to you—just when you need it most.
9. Because you can be independent of the cutter gang—cut when you like—and not feel obligated to spend several days or weeks away from home helping others in order to get your own silo filled.
10. Because you can lighten the housework and your work by taking your own time with a smaller force—avoiding the big custom filler gang.

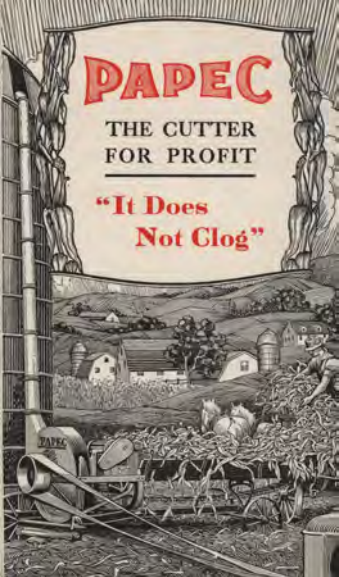

Why it is Worth More than the Price Asked

11. Because the simple Papec design with fewer parts, no belts, or use-less chains, etc., enables us to manufacture much cheaper. We make Papec Cutters exclusively the year round in large volume, and we can offer much more for the money.
12. Because labor represents about one-half the cost of a cutter, therefore labor efficiency is very important. Our large volume permits 85% piece work which is a great factor in reducing costs.
13. Because PAPEC builds thousands of machines each year at far less cost per machine than is possible where from one to a few hundred are built, as in most factories. Your dollar buys far more in a Papec.
14. Because the PAPEC operates on one-fifth less power and elevates to any height at lower speed than ANY other cutter—and so guaranteed!
15. Because the few dollars you might possibly save by buying a cheaper cutter "at clearance prices" would soon be eaten up in additional cost of power, time, labor and repairs.
16. Because you can use your PAPEC throughout the year for cutting alfalfa, etc., or for shredding fodder, or siloing early crops of any kind that would otherwise be a loss.
17. Because prompt Repair Service is assured by large stocks of Papec Repair Parts at 50 distributing centers, and smaller stocks with dealers at a great many more places. Order YOUR PAPEC Early.

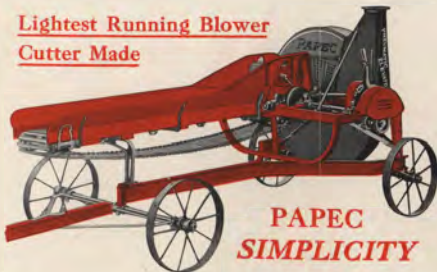

PAPEC

THE CUTTER FOR PROFIT

"It Does Not Clog"

Lightest Running Blower Cutter Made

PAPEC
SIMPLICITY

FEWER parts and better design explain why the Papec can be guaranteed to cut and elevate more ensilage with the same power than any other blower cutter. For the same reason, the Papec has longer life, gives less trouble and needs fewer repairs. The knives can be easily and quickly changed or adjusted. The Papec is supreme with men who know farm machinery.

PAPEC

The Cutter that does not clog

Made in four sizes—

- R10** with 2 knives—2 to 5 tons an hour; 3 to 6 h.p.; weight 1,110 lbs.
N13 with 3 knives—8 to 12 tons an hour; 10 to 14 h.p.; weight 1,520 lbs. (Also made with 2 or 6 knives).
L16 with 3 knives—12 to 20 tons an hour; 14 to 20 h.p.; weight 1,960 lbs. (Also made with 6 knives).
K19 with 3 or 6 knives—20 to 30 tons an hour; 20 to 30 h.p.; weight 2,720 lbs.
N13 and L16 ideal for Fordson tractor.

PAPEC MACHINE COMPANY,
Shortsville, N. Y.

GUARANTEE

We Guarantee ANY Papec Cutter to throw and blow ensilage perpendicularly to the height of ANY silo, with ANY power, provided the speed of the cutting wheel does not fall below the rated speed. We also guarantee that any Papec Cutter will cut and ELEVATE MORE ENSILAGE continuously with the same power than any other blower cutter;—further, we guarantee every Papec Cutter against defect and will replace F.O.B. Shortsville, N. Y., any part returned, prepaid to factory, that shows either faulty workmanship or material.

**Throws
and Blows
Saves One
Man**

Papec simplicity saves dollars for Papec owners. Its sturdy, durable construction practically does away with breakdowns and repairs. Over 50 distributing houses, located in all parts of the country, assure prompt service. The Papec is made by men who have specialized in its construction for 24 years. By building Cutters in great numbers, the price has been kept low for quality and capacity.
