

EXCELSIOR RAILROAD HORSE POWER,

With Threshers, Separators, Cleaners, Clover Hullers, and Circular and Cross-cut Saw Mills, for various Purposes, and all other Implements adapted to the Power, is not surpassed by any now in Use, and is offered on the most Liberal Terms, both as to Discount and Warranty.

THE Subscriber is manufacturing the above Power, which combines all the qualities of the most celebrated Railroad Horse Powers, and some very valuable improvements.

CAPACITY, ECONOMY AND WARRANTY.

THE Single Power will thresh from 100 to 175 bushels of Oats, Rye, Buckwheat or Barley, easily, in one day, attended by three men, and will saw from 20 to 25 cords of wood in the same time, and with the same number of men. The Double Power will perform double the amount of work in the same time, with one additional man—and all other work of a similar kind with equal facility. The construction of the Power is such that it can be changed from a right to a left hand machine, and the reverse, at pleasure, as the gears are all outside the Power, and accessible at all times.

This Power is admirably adapted for driving Threshing Machines, Circular Saws, Cotton Gins, as also Machine Shops, Elevators, Ferry Boats, Discharging and Loading Vessels, Pile Driving, Cross-cut Sawing, Pumping, Grinding Grain, Churning Butter, Cutting Hay and Stalks, Shelling Corn, Grinding Apples, &c. The angle of elevation necessary to operate this Power is never greater, but often less than any other Power, which is inside of one and a half inches to the foot, with horses weighing 1,000 lbs. each, and without any harness. These Powers have been severely tested, and pronounced "EXCELSIOR," which, of course, means "EXCELLED BY NONE"—and their performance is a sufficient evidence of their superiority over the common Endless Chain Powers.

THE WARRANTY is as follows:—If the Powers do not answer the description, and do any reasonable amount of work required of them, the money will be refunded, and the Machine returned at the manufacturer's expense.

PRICES FOR 1856-7.

Excelsior Changeable Railroad Horse Power, Thrasher and Separator, (two Horse,)	\$169 00
