A WORD TO THE DEALER.

It should be the dealer's highest ambition to furnish his farmer customers with **Mowers and Reapers** best adapted to their wants—cutting their crops in the most successful and satisfactory manner. Such machines prove the most profitable to dealer and farmer alike. None can speak with greater confidence than those who have superior machinery to offer,—something better than others. This is precisely our feeling in bringing to your notice the **Peerless Reapers and Mowers**.

They are unquestionably a standard of excellence, perfectly adapted to the work in the harvest-field, giving uniform and entire satisfaction to the farmers buying them. We shall be much pleased to hear from those desirous of handling machinery of this character.

A WORD TO THE FARMER.

Appreciating your wants, we have devoted our energies to the production of machinery that will harvest your crops in the best manner possible, with no trouble, and the least labor and expense to yourself. That we have been eminently successful in this, is amply verified by the thousands who have bought and used our machines, and who are so enthusiastic in their praise. A few quotations will suffice to illustrate the high and enviable position the **Peerless Reapers and Mowers** occupy in the eyes of our patrons: "*Cannot say too much in praise of the 'Peerless'.*" "*Runs easier and does better work than any machine ever used.*" "*Works to perfection.*" "*Takes the lead.*" "*None equal to the 'Peerless'.*"

With no desire to boast, but simply to give prominence to a fact, we say to the farmer buying a "**Peerless**" that he can rest assured of having secured the best that human skill has thus far been able to produce. With a parting word, we say, don't fail to examine the "**Peerless**" before buying. To see it, is to fasten the impression on your mind that it's the machine above all others that you should buy.

DON'T FAIL TO READ THE FOLLOWING PAGES.

TO THE AGRICULTURAL WORLD.

Instead of presenting you with the customary form of Catalogue, we made diligent search for something entirely new and especially attractive for this year, and as a result, we now have the pleasure of presenting you with our handsome **Souvenir Album**, which we trust will meet with hearty appreciation, and be deemed worthy of a place on the mantel or table, where it may serve to keep us and the **Peerless Reapers and Mowers** in your kind remembrance for years to come.

It is a source of great satisfaction to us that we can say to you at this time, which appears to be an opportune moment, that the career of the **Peerless Reapers and Mowers** the past season was one of *unusual success*. Each succeeding year has served to make their record more brilliant and grand. We are happy to state that the "**Peerless**" are still in the front, *leading* the advancing hosts of reapers and mowers in point of *real merit*—in their faultless construction, matchless adaptability and durability, perfection in quality of work, and indeed in every other important feature.

We start the new year with the determination that our machines shall have the advantage of the most valuable improvements the inventive genius of this progressive age has brought to light. Our ambition is not only to keep the **Peerless** machines in the lead, but to place them *far* in advance of all others. We commend them to your favor with greater confidence than ever, as the *most perfect and efficient* Reapers and Mowers known in the wide world.

We thank you most heartily for past favors and kindly solicit future ones. Availing ourselves of the pleasure of wishing you the providential blessing of a rich and plentiful harvest the coming season, we are,

BRANCH OFFICES:

Very truly yours,
