THE STANDARD

BUCKEYE MOWER.

. . . .

THE Standard Buckeye Mower has been built at Worcester, Mass., for 30 years, and it has stood the test of critical New England farmers who demand that a mower properly cared for shall last a life time. Its sale has constantly increased and nearly equals the combined sale of all others in New England.

It has patented improvements found on no other machines.

The SELF-OILING PITMAN.

The CHAFE PLATES, maintaining the shear cut.

The CARRYING SPRINGS, which lighten draft.

The NEW SCYTHES, which will not break.

These improvements show at sight their value.

The Standard Worcester Buckeye is the easiest and safest to ride upon; the easiest to handle, both for team and driver; will do more work and better work; costs less for repairs; the best for rough, uneven ground, consequently the best for smooth mowing; raises the bar higher, and lifts easier to pass obstructions, and will outlast all others.

Don't fail to examine this machine with its late improvements, or send for descriptive pamphlet more fully describing them.

THE RICHARDSON MANUFACTURING CO.

The Lightest-Draft-Mower ever put in grass.

The New 6 ft. Buckeye.

Dont fail to examine
the late improvements.
