

THE TIGER

KING OF RAKES.

MANUFACTURED BY

J. W. STODDARD & CO DAYTON, O.

THE TIGER.

A Perfect Self-discharging Sulky Rake. In simplicity, strength and durability, without a rival; and for ease of operating or adjusting to any variety of crop or surface, unequaled. Any boy that can drive a horse can rake with it as well as the strongest man, and it rakes clean any kind of hay or grain. The teeth are of the very best quality steel, and warranted to stand severest usage.

The TIGER, in the three years it has been before the public, has distanced all its competitors, and its sales are now double that of any other rake manufactured in the world.

It is the *only* Hay Rake that has been in actual use for three seasons, and proven itself strong enough to stand the tests of a self-dump Horse Hay Rake.

It has been awarded *First Premiums* at the most important field trials of Hay Rakes of 1878 in America and Europe.

Received Medal of highest honor at Centennial, Philadelphia, 1876.

Two Medals at Paris Exposition, 1878.

Three Gold, seven Silver, and eleven Bronze Medals at the Field Trials of 1878 in Europe.

"THE BEST IS THE CHEAPEST."
