

Le Roy All Steel Frame
Reversible Sulky Plow

For Level Land
or
Hillside

2 or 3 Horses
No Dead Furrows

MANUFACTURED BY THE LE ROY PLOW CO., Le Roy, New York, U. S. A.

THESE ARE THE REASONS WHY THE LE ROY SULKY PLOW IS THE BEST.

Our Strong and Light Steel Frame Two-Way Reversible Sulky Plow is guaranteed to do better work than any similar plow made. It will work equally well where there is rolling land or hillsides; where there are stumps, fast stones or large loose stones; where the ground is uneven and where the fields are irregular or of odd shape. Where there is a SCARCITY OF HELP a boy can plow as well as a man.

In use, one Plow is raised while the other turns the furrow. At the end of the furrow, by pressing down on the Foot-Trip or Lower Handle of the Lever, this Plow is mechanically raised by the horses, leaving the driver's hands free to manage them. After the turn is made and the other Plow lowered, the Whiffletrees slide into place.

The Le Roy Sulky is especially designed to meet all the requirements of the most particular farmer and has rapidly become the leader wherever it has been introduced. It combines the maximum amount of strength with the minimum amount of weight, is steady, of light draft, durable, reliable and is easy to operate, all Levers being conveniently placed within reach of the operator. The Frame is made of the best steel and malleable iron, making it light, strong and unbreakable and is extra wide to prevent tipping over on side hills. Our (Pat. App.) Pole Adjustment is the simplest and most efficient on the market and is operated by a Lever directly in front of the driver, enabling him to make an easy shift to obtain the FULL WIDTH of the furrow while plowing on SIDE HILLS or

around curves. The Pole is quickly changed from two to three horses by bolting it on the opposite side of the **SEVERAL POLES**, the balance being so carefully adjusted that the pole is steady and will not jerk up and down on the horses' necks. Our Seat-Tilting Device is operated by a Lever directly in front of the Seat and will tilt from left to right with the full weight of the operator on the Seat. Our Foot-Trip (Pat. App.) is operated by pressing down on the Pedals in front of the driver, is simple, durable and reliable.

The Plow Beams can be turned from left to right, to take more or less land, by loosening four bolts under the Beam Plate. Both wheels are strong, made of Steel with Stagger Spokes and renewable Hub Boxes of Chilled Iron add greatly to their life. The Le Roy is the Best Sulky Plow to be had and a big improvement over any Sulky ever produced.

We furnish two perfect Chilled or Combination Plow Bottoms with each Sulky. The 73 Right and Left Chilled Bottoms are duplicates of the Nos. 110 and 510, the 71 Right and Left are one size smaller. The Combination Bottoms have Soft Center Crucible Steel Moldboards, Solid Steel Landsides, with Cast Shoe and Solid Steel or Cast Share.

NO. RIGHT HAND	NO. LEFT HAND	KIND OF BOTTOM	SIZE FURROW	WEIGHT
71-R	71-L	Chilled	8 to 9 inches deep 10 to 14 wide	565 lbs.
73-R	73-L	Chilled	8 to 9 inches deep 11 to 15 wide	575 lbs.
99-R	99-L	Combination	8 to 9 inches deep 10 to 14 wide	550 lbs.

With each full rigged Sulky we furnish: Neck-Yoke, Three-horse Whiffletrees and Wrench. All Levers and Castings, excepting the Plow Bottoms, are made of Malleable Iron.

LE ROY GENERAL PURPOSE PLOWS

are guaranteed to do better work than
any other General Purpose Plows made

THESE ARE THE REASONS WHY LE ROY CHILLED PLOWS ARE THE BEST:

They are of the right capacity, very light draft, steady running, strong, durable, reliable, easily handled, and are the most popular with any farmer who has used them. The Beam is long with a High Throat, to prevent choking, and made of the best Bessemer Steel, GUARANTEED NOT TO BEND OR BREAK. The patented Jointer and Wheel Standards are of Square High Carbon Steel which absolutely prevents their turning or working loose. All Moldboards and Jointers are especially designed to turn a Perfect Furrow and will do equally good work in sod, hard, gravelly or stony soils.

An additional feature of value in the Plows of this series is a REMOVABLE CHILLED IRON SHIN PICK; an advantage over plows with point and shin combined or Moldboard and shin combined, because the new cutting edge can be obtained at a small expense without buying a whole new moldboard or buying a new shin with every point.

Le Roy Steel Beam General Purpose Chilled Plows are the best General Purpose Plows made and will stay in the ground and do good work where others fail. Perfect satisfaction is guaranteed in every respect.

NO. RIGHT	NO. LEFT		FURROW	WEIGHT
100		Light 2-horse	4 to 6 inches deep 9 to 12 inches wide	115
106	206	Med. 2-horse	6 to 7 inches deep 10 to 13 inches wide	120
110	210	Med. 2 or 3-horse	6 to 8 inches deep 11 to 15 inches wide	125
114		Large 2 or 3-horse	8 to 9 inches deep 13 to 16 inches wide	130
118		3-horse only	8 to 9 inches deep 15 to 18 inches wide	135

Moldboards perfectly Chilled. Landside extra long and Chilled. Shin Piece Chilled. Chilled Shares of special Hardness and Strength. Furnished with Soft Center Crucible Steel Moldboard or Steel Share if desired.

LE ROY STEEL BEAM REVERSIBLE HILLSIDE OR SWIVEL PLOW

Light and Strong

Is guaranteed to do better work than
any other Hillside Plow

We are making the Hardest and Strongest Plow Points

THESE ARE REASONS WHY
THE LEROY SWIVEL OR REVERSIBLE PLOW
IS THE BEST:

The popularity of this Plow is well merited because of the nice furrow the Moldboard turns on either Hillside or Level Land, and its reliability, light draft and the unusual ease with which it is handled.

Particular attention has been given to provide a large throat capacity and close fitting joints to prevent clogging, also the exact maximum of strength combined with the minimum of weight. Except for the Point and Shoe, the Plow is built entirely of Steel and Malleable Iron, making it light, strong and durable. Our patented Jointer and Clevis Shifting Device is superior to anything ever produced. The Foot Latch is adjustable sideways and can be lengthened or shortened to take up the wear. It is the best constructed and most perfect Plow of the Hillside or Swivel Style made, and rapidly becomes popular wherever it is introduced. Ask any farmer who has used one.

No. 30. Capacity 5 to 8 inches deep, 10 to 14 inches wide. Weighs, plain, 110 lbs. Full Rigged with Jointer and Shifting Clevis as pictured.

No. 31. Same as No. 30, except that it is furnished without Jointer.

No. 32. Is furnished plain without Jointer and without Shifting Clevis.

LE ROY WOOD BEAM CHILLED PLOWS

For 1, 2, 3 and 4 horses

We are not in a Trust or Combine but are a Strong, Independent Co.

THESE ARE THE REASONS WHY LEROY WOOD BEAM PLOWS ARE THE BEST:

These Plows are especially designed for those who prefer the Adjustable Wood Beam. By loosening the bolt on the Handle Brace and Standard, the Beam can be swung from left to right to take more or less land.

They are very light draft, steady, strong, durable and easily handled. The Moldboards are perfectly Chilled. Shin and Landside Chilled. Point of special hardness and strength. Beam, well seasoned Oak. Nos. 6 1-2, 7 and 8 are One Horse Plows for garden, vineyards and orchards. Nos. 7 and 8 are equipped with Handles adjustable up and down and sideways to enable the operator to plow around trees. Nos. 9, 10, 12 and 14 are recommended for general farm work.

NO.	RIGHT HAND		LEFT HAND		WEIGHT
6 1/2	"	"	Light 1-horse	5 to 6 inches deep 6 to 8 inches wide	60 lbs.
7	"	"	Med. 1-horse	6 to 7 inches deep 8 to 9 inches wide	75 "
8	"	"	1-horse	6 to 7 inches deep 8 to 11 inches wide	80 "
9	"	"	Light 2-horse	6 to 7 inches deep 10 to 12 inches wide	110 "
10	"	"	Med. 2-horse	8 to 9 inches deep 10 to 14 inches wide	115 "
12	"	"	2 or 3-horse	8 to 9 inches deep 12 to 14 inches wide	125 "
14	"	"	3 or 4-horse	8 to 10 inches deep 14 to 18 inches wide	140 "

The No. 6 1/2 is furnished without a Jolter.

FOUR LETTERS THAT REFLECT THE GENERAL OPINION

MR. F. W. CLEMENT:—

Batavia, N. Y., Nov. 27, 1912.

Dear Sir:—The Le Roy Sulky Plow I purchased of you is giving me the very best of satisfaction in every way and I am well pleased in making the Le Roy my choice over the many other makes handled by local Dealers.

The strong appearance of the frame appealed to me and I find it will withstand the severest strains. The Sulky is easy for the horses and all the lever operations are easy and effective. It is not necessary to be a big, strong man to successfully operate this plow.

Yours for success,

H. L. FOSTER.

LE ROY PLOW CO., Le Roy, N. Y.

Franklinville, N. Y., Nov. 25, 1912.

Gentlemen:—When looking for a Sulky plow for our large Farmer trade, the fact that the Le Roy Plow Company was strong and Independent enough to stand alone outside of any Trust or Combination first attracted our attention.

The sample plow looked Good and proved Good and our many duplicate orders running right up to winter speak louder than any testimonial of ours to the appreciation of the many points of excellence found in your Le Roy No. 71 Sulky with chill bottoms.

They are easy draft and do good work.

We expect to sell many more next year than we have this season.

Yours truly,

J. A. NAPIER.

OF ALL FARMERS WHO HAVE USED LE ROY PLOWS

MR. W. G. HILL, ATTICA, N. Y.

Attica, N. Y., Oct. 2d, 1912.

Dear Sir:—As the plowing season draws to a close I am glad to let you know how much I think of the Le Roy Walking Plow No. 110, I purchased of you. I fully agree with the hundreds of farmers in and about Attica, who have purchased Le Roy Plows of you, that they are the easiest and best working plows made.

The square wheel and jointer Standards never give me any trouble, the moldboard turns a nice furrow of good capacity and the "deep throat" high arch beam back of the jointer prevents clogging.

I am glad to speak a good word for the Le Roy.

Very truly yours,

JOSEPH RUDD.

MR. W. L. BOWES, SYRACUSE, N. Y.

Syracuse, N. Y., Sept. 30, 1912.

Dear Sir:—I could not understand why the Le Roy Plows were so very popular in SYRACUSE until I purchased one of their No. 109 Medium two-horse Plows of you and now I can see why Syracuse Farmers have purchased the Le Roy of you in such large quantities.

The points are hard and good wearing, the moldboard turns a smooth, even furrow in sod or stubble and an ordinary team handles the plow easily.

The plow runs steady and even on the heel and is very easy to hold.

I am ready with a good word for Le Roy Plows any time.

Very truly yours,

J. S. WILLIAMS.

THESE ARE THE REASONS WHY THE LEROY POTATO HILLER NO. 5 IS THE BEST:

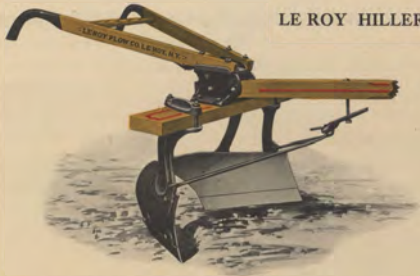

It is steady, durable, reliable, easy to handle and is guaranteed to do better work than any similar Hiller made. The Moldboards are made of hard 3-16 inch Polished Steel and can be adjusted to any width or pitch. The Handles are shifted from side to side by a simple device and lock themselves automatically, permitting the operator to walk in the finished row. We furnish either Steel or Cast Iron Points.

The Le Roy Combination Disc and Moldboard Hiller No. 6 has practically the same construction and all the advantages of the No. 5, but is regularly equipped with a high grade 20-inch Steel Disc in place of the Moldboards and Points. Extra Moldboards and Points for No. 6 are furnished like those on the No. 5, if specified for, making the perfect Combination Hiller.

LEROY SHOVEL PLOW NO. 10.

This we claim is the best Shovel Plow on the market. The Beam and Handles are of extra quality seasoned hardwood and nicely finished in the natural wood. The Wing and Points are made of 3-16 inch polished Steel. The Point is separate from the front piece, making it very easy to replace when worn out. The wings are 10 inches high, have the right turn and are adjustable. Not the cheapest in price, but the best.

LE ROY HILLER No. 5

The Most Improved and Complete Adjustable Potato Coverer or Hiller Made

THESE ARE THE REASONS WHY THE LE ROY ROLLER IS THE BEST:

It has a LIGHT DRAFT, is strong, reliable and durable. The Angle Steel Frame and High Grade Steel Axle are made especially strong so that they will not bend or break when the Roller is loaded with stones. A Cast sleeve or Collar is placed on the Hubs at each end of the Drums to prevent wear on the Axle and the bearings are of well selected Maple because they wear longer, work easier and are quickly replaced by any Farmer. The three Drums or Sections turn independently of each other on the Axle and are made of high carbon sheet steel with Bolted close-fitting high carbon sheet steel Heads, so that no dirt or trash will get into them, increasing the Roller's life a good many years. We especially recommend this Roller for those who wish the Best, the Simplest and the most Durable.

THESE ARE THE REASONS WHY THE LE ROY SPRAYER IS THE BEST:

The splendid work of this Sprayer the past three years has received many words of praise from all sections of the country. The present style Sprayer is by far the best we have ever put out, being equipped with an eccentric-driven high pressure Brass Pump with all Brass Pipes and Valves so that no matter how strong the solution used, it will be durable and reliable. The mixture is kept constantly in motion by our high speed chain-driven rotary Agitator, and is drawn by the pump from the bottom of the barrel into the patented Sediment Chamber. Our patented Sediment Chamber is especially designed so that it will leave the sediment in the bottom and force the pure mixture through the nozzles, is electric-riveted and reliable, GUARANTEED TO STAND A PRESSURE OF 200 LBS. The Nozzles are adjustable to any height or width of row, the wheels from 4 1-2 to 6 feet apart, and the Spray Bars fold up out of the way for passing through gates.

High pressure being the most important requirement for successful spraying, we guarantee 100 lbs. or more in applying Paris Green, Copper Sulphate or Bordeaux to potatoes, beans, celery, onions and wild mustard. The Le Roy 4-Row one-horse Sprayer No. 50 will spray from 40 to 45 gallons of Bordeaux mixture to the acre at 100 lbs. pressure. Weight 500 lbs., Capacity 52 Gallons. The Le Roy 4-Row 2-horse Sprayer No. 75 has the same design and construction, but is fitted with a double-acting pump and 75-gallon tank, and will spray 50 or more gallons of Bordeaux mixture to the acre at 100 lbs. pressure or more.

We highly recommend both of these Sprayers to those who wish the simplest, most reliable and best.

LE ROY FOUR-ROW POTATO SPRAYER No. 50

WE ALSO MAKE THE FOLLOWING GUARANTEED LEROY PLOWS AND IMPLEMENTS, OF WHICH INFORMATION WILL BE SENT UPON REQUEST:

Le Roy Steel Frame Single Sulky Plows.

Le Roy Iron Beam General Purpose Plows.

Le Roy Iron Beam Swivel or Reversible Plows.

Le Roy Three-Horse Cultivator.

Special High Pressure Le Roy Grape Sprayers Nos. 100 and 101.

Steel Frame One-Horse Five-Tooth Cultivators with extra Hiller attachments.

To obtain the full benefit of all the advantages of the Le Roy Plows, care should be taken that each Plow is properly adjusted for the work which it is to do, and when so adjusted and properly used it will do everything we guarantee, and give perfect satisfaction.

All the pictures in this booklet are exact reproductions of actual Photographs.

THESE ARE THE REASONS WHY THE MILLER BEAN HARVESTER IS THE BEST:

The Miller Bean Harvester, of which a picture appears on the back cover, has been recognized as the standard for nearly half a century throughout the bean growing States, where we have thousands and thousands in use. It is strong, steady, durable, reliable and has just the right weight to hold to the ground and do the best work.

The Wheels are made of High Grade Steel with 4-inch concave Tires so that they will not slide or sink in soft dirt. Both Shanks are heavy, reinforced with a Cross Bar to eliminate breakage. The Frame is of well seasoned hardwood; and the Pole of selected long leaf yellow pine. All Shares are of the very best grade 5-16 inch Steel and with re-sharpening will last several seasons. The Miller Bean Harvester is the best and most popular Harvester made and will do for you what it has done for Thousands of others. Proper weight is necessary for a perfect running Harvester. So BEWARE OF THE LIGHT WEIGHT INFERIOR IMITATIONS as they will not hold to the ground and do good work. The Miller Bean Harvester has the correct weight and is guaranteed to do better work than any other bean harvester made.
