application to ourselves or

Agent,

THE BUCKEYE IS GUARANTEED TO BE THE BEST MOWER EVER MADE.

Its system of gearing has stood the test for 30 years. No other mower is geared on correct principles. Every other mower is geared wrong.

Don't buy a mower because it is cheap. It will not pay. The Buckeye will outlast any two of other makes of mowers. It will cost less for repairs, stand more grief, and do more work per year for ten years than any other mower for five.

When its first set of knives are ground down to the back, the Buckeye will

still be worth more than any one of the cheap mowers fresh from the shop. Examine the Buckeye, compare it with other machines, and you will be convinced of the truth of these statements.

JAS. WILSON-SON, N.Y.
