CASH ACCOUNT.

No. 8, OLD SERIES.—Cast.

One-Horse, 7-inch Cut. Price, with extra Point, \$3.35.

Although this Plow is one of the first introduced by B. F. Avery, years ago, it is still conceded to be a superior plow for bedding cotton lands.

Of this OLD SERIES we make the following sizes besides the No. 8:

No. 13, 7-inch cut, price \$3.35.

No. 12, 8½-inch cut, price . . . \$5.60

No. 1-2, New Series.—Cast.

Light One-Horse, 7-inch Cut. Price, with extra Point, \$3.35.

This is the smallest Plow of this series. The model is an improvement on the "Old Series," these plows being of lighter draft than corresponding sizes of that series, at the same time turning the earth more perfectly and uniformly. We make also the following sizes in this series:

No. 1, 8-inch cut, price \$3.60.

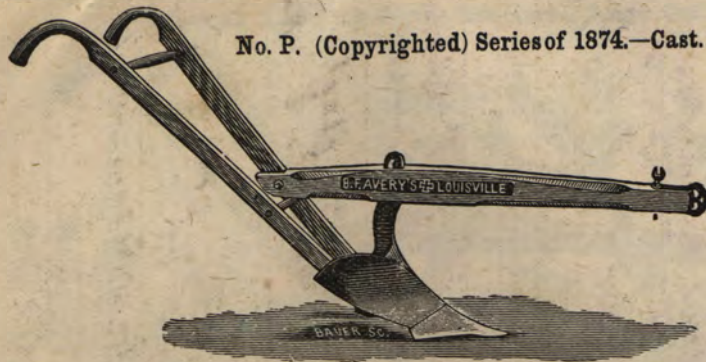

No. 2, 8½-inch cut \$4.40.

No. 3, 9-inch cut, price \$5.60

No. P. (Copyrighted) Series of 1874.—Cast.

Light One-Horse, Right-Hand, 7-inch Cut. Price, with extra Point, \$3.35.

This Plow has a beautiful model, the mold-board and standard being high, the point long, with cutting angles more acute than No. $\frac{1}{2}$, same size. The model is almost the same as our steel Pony Plow, which has given great satisfaction. We recommend it for all light plowing for cotton lands, where a cast plow is used.

We also make of this Series :

No. O, $7\frac{1}{2}$ -inch cut, price \$3.60.
No. Y, $9\frac{1}{2}$ -inch cut, price 7.25.

No. N, $8\frac{1}{2}$ -inch cut, price \$5.60.
No. YY, 10-inch cut, price. 8.25.

Pony. (Copyrighted)—Steel.

Light One-Horse, 7-inch Cut. Price, with extra Point, \$5.75.
Price, Cast Point, \$0.55. Steel Point, \$0.70.

The Pony is the most popular of our steel plows, and of the thousands that have been sold, we have yet to hear the first complaint of their failure to do what is claimed for them—superior work in all cotton and corn lands. We make of this series, in addition to the Pony:

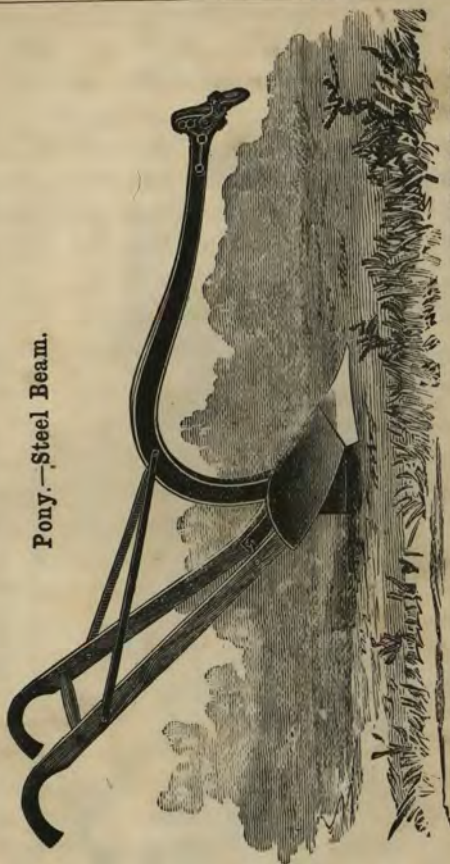

A O, \$6.75; B O, \$7.50; C O, \$10.40; D O, \$11.40; E O, \$14.00; F O, \$16.50; G O, \$19.00.

Pony.—Steel Beam.

We make the Steel Beam Plows right-hand only. We also make A O, B O, C O, D O, E O, F O, with the steel beam.

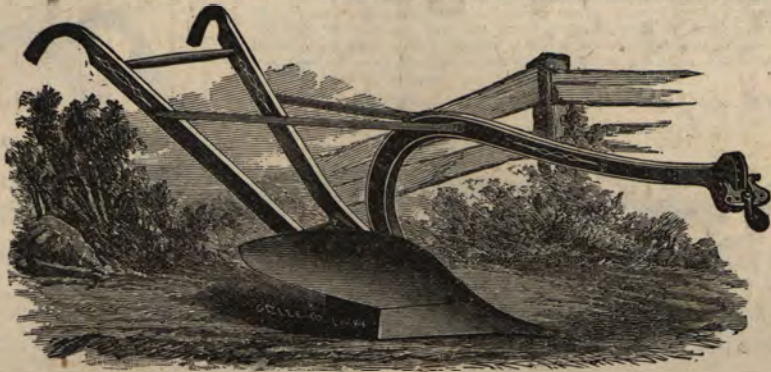

Commencing with our "Pony" Plow, we make our steel plows with either solid steel or wooden beams, and we can recommend the steel beam plows as models of lightness and strength.. Iron beams will bend and break, but the **Solid Steel Beams** will give perfect satisfaction in every way. They are made after our own designs and patterns, and the extra cost over the wood beams will amply repay the farmer.

PONY PLOW. With Carraway Scraper.

This is the best Cotton Scraper ever introduced to the planter. It is the simplest and most durable Scraper made. Fits the Avery Pony Plow. It leaves the cotton in the best possible shape, and the yield will be very largely increased. The planter will use no other Scraper when he once sees the Carraway, and we solicit sample orders for them. Ask your merchant to send for sample.

Price of Scraper, \$2.00

AVERY'S ADVANCE DOUBLE
MOLD-BOARD PLOW.

The above Plow is especially adapted for bursting cotton ridges, and also can be used successfully for opening up a furrow for planting corn, also for plowing out "quarter" drains, etc. They are an enormous saving in bursting cotton ridges—they save half the labor and leave the bed in far better shape than with the regular turning plow. The planter has only to go over the land once with the Advance Plow, while he has to go over twice or even four times with the ordinary light plow.

SIZES.

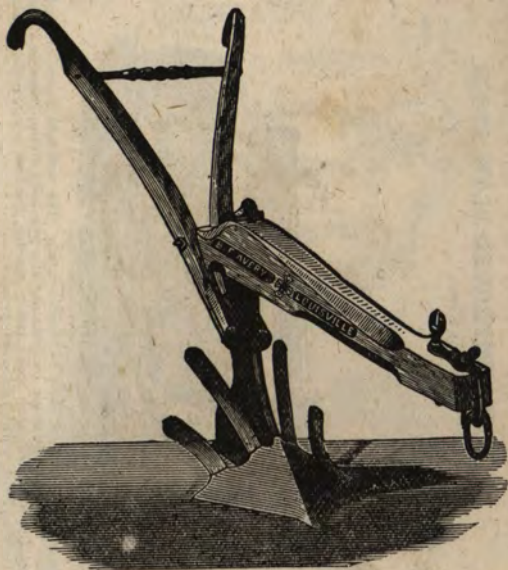

No. $\frac{1}{2}$, cuts 9 inches, without Coulter, price, . . .	\$ 8.00
No. 1, cuts 11 inches, without Coulter, price, . . .	10.00
Coulter, extra,	1.00

We furnish the following Blades with each Plow :
Shovel, Scraper, Sweep, and Turning Blade.

Price \$4.00

This Plow is the perfection of all labor-saving implements in working plants in the garden. Every person who has a garden should own one. A little boy of ten years can keep a garden in perfect order, working the plants more perfectly with one of these plows than a grown man can with a common hoe.

STEEL-WING POTATO DIGGER.

Price \$10.00
 Vine-Cutter, extra, 3.50
 Extra Points 1.50

One man with a team can dig as fast as 15 persons can pick up. The potatoes are gathered without being cut or bruised, and cleaner than is usually done with a hoe. It will pay for itself in digging four acres.

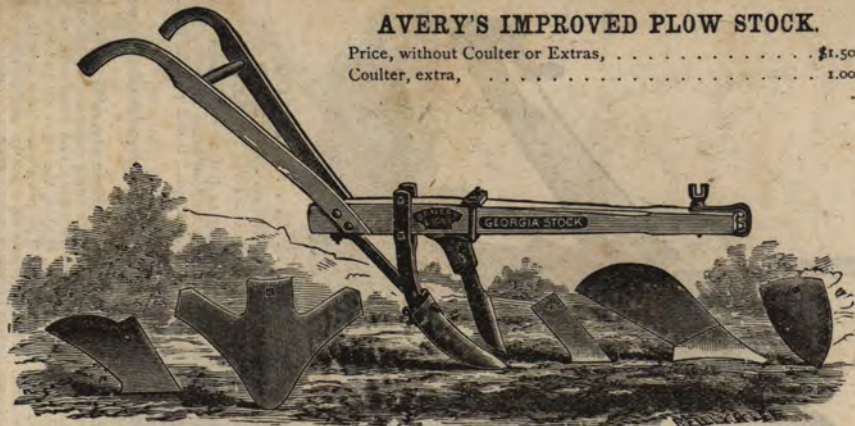

The following is a sample of the many recommendations we have about this implement:

"I found your Potato Digger to perform admirably in digging my potatoes. I had doubts as to its doing good work with the sweet potatoes, as the vines were very rank and luxuriant; so I went over them with sharp hoes, clipping the vines off and allowing them to fall in the middles. The rows were then barred off with a half shovel. The digger was then put to work, and it did finely. Every potato was lifted out, none were cut or bruised, and in one hour as many were turned out as six hands could heap, assort, and haul out during the day. I consider it as valuable for sweet as Irish potatoes.

J. V. DANSBY, Pensacola, Fla."

AVERY'S IMPROVED PLOW STOCK.

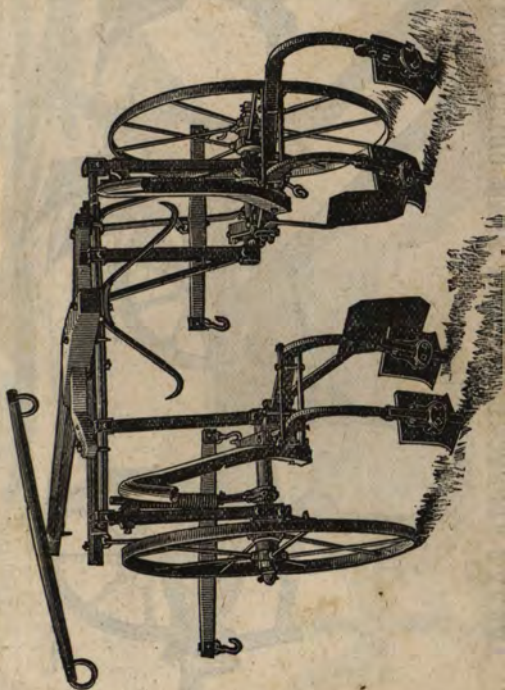

Price, without Coulter or Extras, \$1.50
 Coulter, extra, 1.00

This Stock is adjustable, and can be used with any kind or style of blade wanted. The standard moves on a pivot, which passes through it and the brace. It can be set at any angle by loosening the two bolts on the beam and moving forward or backward. We make a small cast turning plow, with extra point; scooter, buzzard wing, ordinary shovel and turning mold, as shown in picture. Cast Turning Plow, with extra point, \$1.25.

AVERY'S IMPROVED WALKING CULTIVATOR.

With Steel Gangs. Solid Fenders.

Price, with two Straight Shovels, two Turn Shovels,
Two Calf Tongue Blades, Neck Yoke, and Singletrees . . \$27.00

Write for Special Circulars.

We also make a combined Riding and Walking Cultivator,
with planter attachment, circular of which will be sent upon appli-
cation.

AVERY'S "SPEECHLESS" IRON BEAM CULTIVATOR.

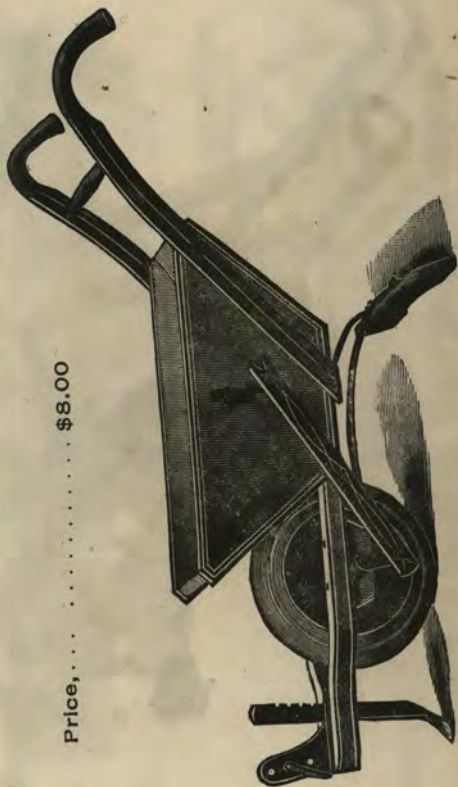

List Price, \$25.00.

This Cultivator has all the good features of other tongueless, while it has also many new and desirable features not possessed by any other—which are **Castor Wheels, Balance Frame, Adjustable Draft, Improved Hang-up.**

WRITE FOR SPECIAL CIRCULAR.

The Harris Improved Dow-Law Cotton Seed Planter
and Guano Distributer.

Price, \$8.00

We make this Planter with wood or iron wheel, and with spring board coverer, or steel bull tongue coverers. We send the Planter shown in the picture, unless specially ordered otherwise.

Price of Corn Planting Attachment for Dow-Law Planter . . \$2.00

AVERY'S CHAMPION DOW-LAW COTTON PLANTER.

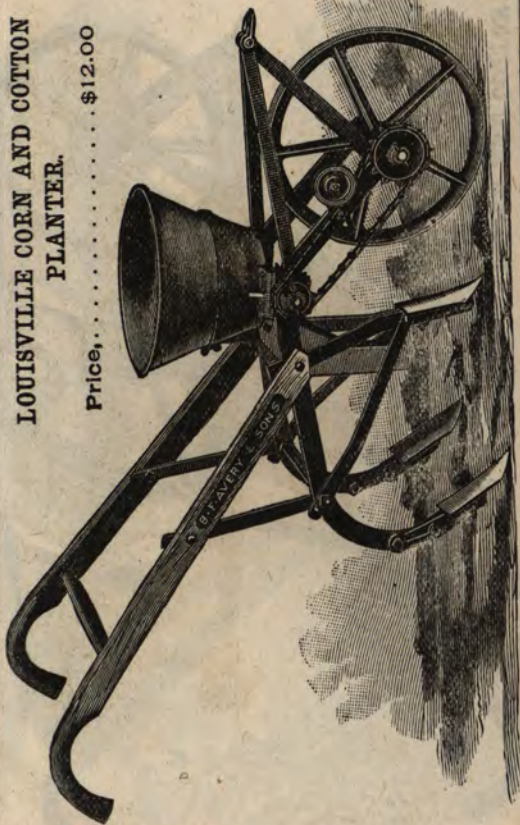

Price of Cotton Planter	\$12.00
Price of Corn Planter	12.00
Price of Combined Planter	17.00

This Planter is for use in the sticky black lands of Alabama, Louisiana, and Texas. The old Dow-Law greatly improved for planting in above-named land.

LOUISVILLE CORN AND COTTON
PLANTER.

Price,.....\$12.00

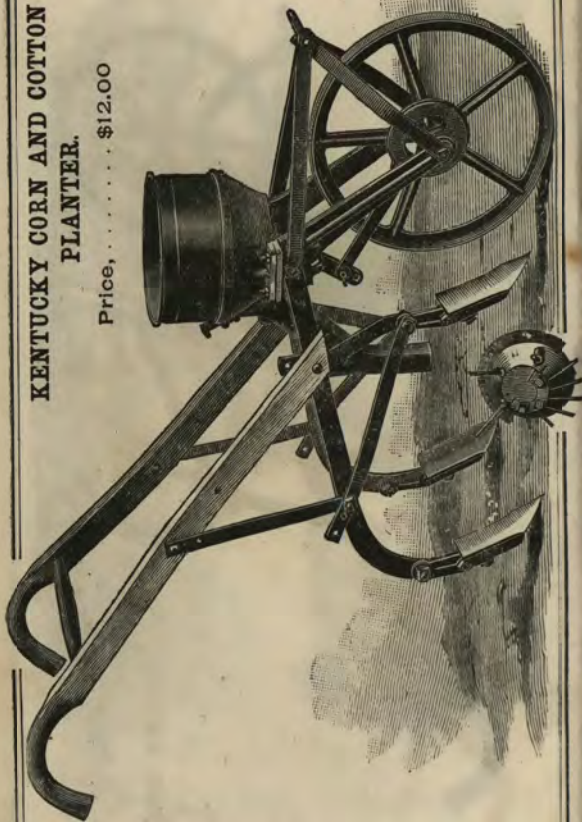

LOUISVILLE PLANTER.

This implement fills a long felt want. Plants corn, cotton, beans, peas, etc., etc., to perfection, and will also plant all small seeds, such as sorghum, turnips, etc. Can be regulated to drop any desired distance apart.

**KENTUCKY CORN AND COTTON
PLANTER.**

Price, \$12.00

This implement is similar in work and construction to the "Louisville" Planter, but has the pitman instead of the chain movement. Full particulars of the Planters will be mailed on application.

ORRICK SCRAPER BLADE.

Price of Scraper only, \$1.50.

A splendid attachment for the Pony $\frac{1}{2}$ or No. 8 Plow for scraping between the rows. In ordering, specify which plow Scraper is wanted for.

STEEL COTTON SWEEP.

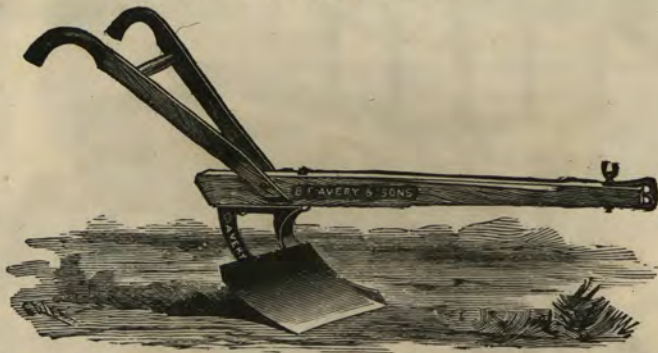

A well-made Cotton Sweep with polished blade. We make extra blades to order—16, 18, 20, 22, 24-inch. When size of blade is not given in order, we send the 18-inch sweep.

Price, with plain Standard \$3.00

Price, with combination Standard 3.25

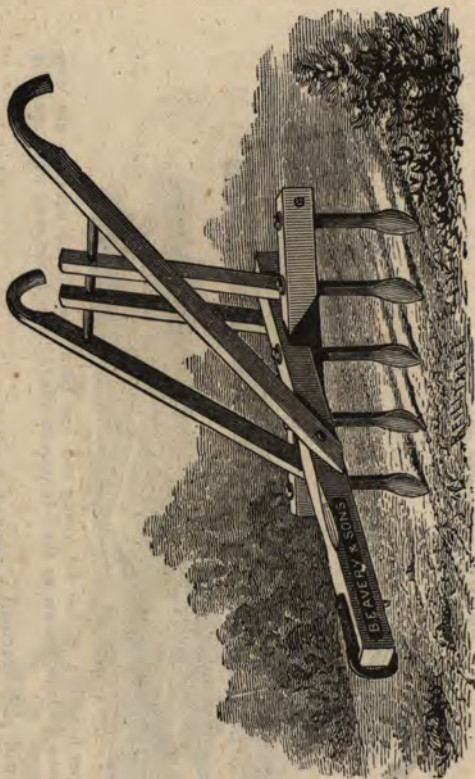

STEEL COTTON SCRAPER.

This Scraper has been in use for years, and has been pronounced equal to any ever offered. We have a blade known as the "Improved Blade," which we send when specially ordered.

Price, with plain Standard	\$3.25
Price, with combination Standard	3.50

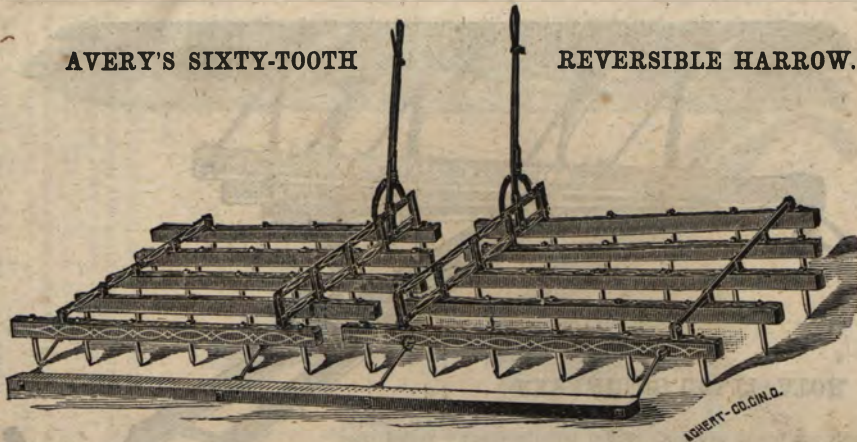

THE AVERY SIDE HARROW.

The farmer will recognize in this Harrow a much needed implement to run between the rows, loosen the soil, and kill the weeds. It is very strongly made, the frame being of the best seasoned white oak, and the teeth threaded and fastened to the frame by taps. We make the teeth of two sizes, $\frac{7}{8}$ and 1 inch square, all with swaged point. Our duck-foot tooth is very popular, the swaged point being nearly flat, so that it will cut the roots of the weeds, thus effectually killing them. This Harrow has an immense sale wherever it has been introduced, and we shall be glad to have orders for samples.

AVERY'S SIXTY-TOOTH

REVERSIBLE HARROW.

Price \$15.00.

This is one of the most popular of our new farming implements. It is in two sections, has 60 solid steel teeth of any shape required, which, by a simple movement of the lever, can be set at any angle. It is handsome, durable, and cheap. Each section cuts five feet.

FIVE-TOOTH CULTIVATOR.

These Cultivators have wrought standards and diamond-shaped reversible steel points. The whole construction is very light and strong. An excellent light harrow may be made by removing the steel points. The Cultivator can be expanded to suit the space between the rows.

EXPANDING CULTIVATOR.

Three-tooth Cultivator	\$5.50
Five-tooth Cultivator	7.00
Seven-tooth Cultivator	8.50
Extra Teeth, each	.40

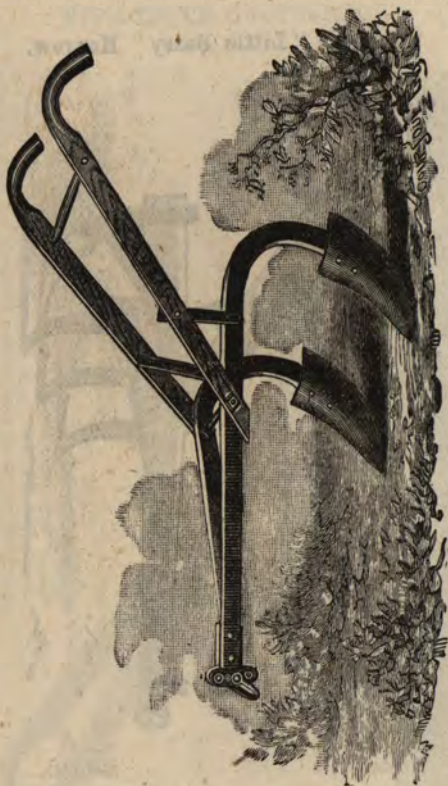

Avery's "Little Daisy" Harrow.

Price, \$5.00.

A splendid implement to run between the rows, loosen the soil, and throw the earth to the plant. THIS IS THE ONLY HARROW THAT WILL DO THIS WORK AT ONE OPERATION. The teeth on the side frame loosen the earth, while the steel shovel behind throws it well pulverized to the plant. Well and strongly made, and is a great favorite with the farmer and planter.

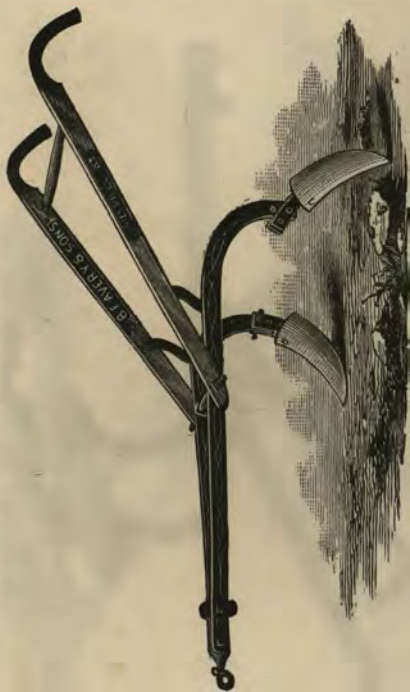

Avery's New Iron Beam Double Shovel Plow.

**Price, \$3.50. With Calf Tongue Blade
Attached, \$4.00.**

As will be seen by above cut, this Plow has been greatly altered and improved. It is unsurpassed for work and durability in the corn and cotton fields.

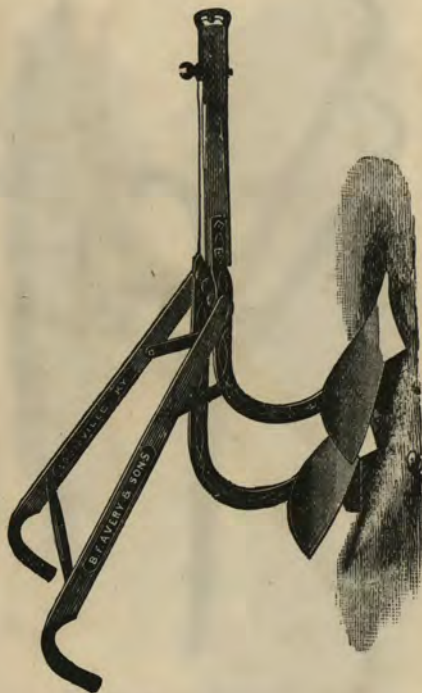

Avery's Break-pin Double Shovel Plow.

Price, Wood Beam . . \$4.00
" Iron Beam . . . 4.00

We make this Plow both with wooden or iron beams. The blades are attached to open standards by heel bolts, or by countersunk bolts, as may be ordered.

Avery's Wood Beam Double Turning Plow.

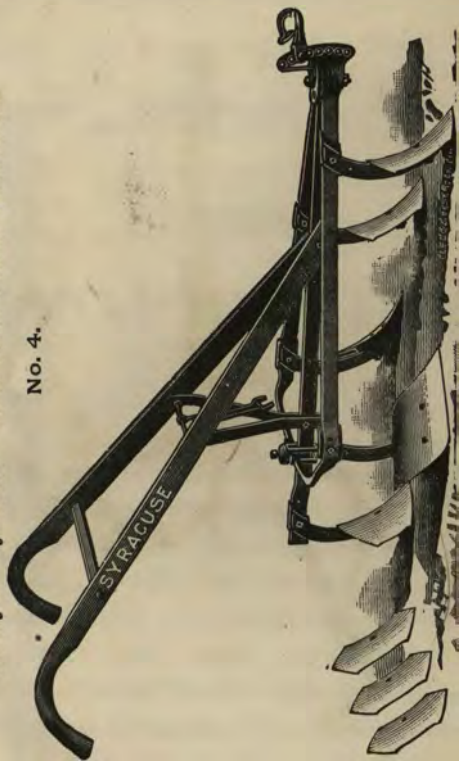

Price, with two Steel Turning Plows, 5½-Inch Cut, \$8.00.

This Plow is used for hilling corn, plowing potatoes, etc. It does the work of a cultivator, and, with the addition of the shovels, will cultivate the plant at all stages of its growth.

Avery's "Syracuse" Solid Steel Frame Cultivator.

No. 4.

The No. 4 is the complete Cultivator, which we recommend every planter to get, as, with all the blades furnished, all kinds of cultivation can be done, and the slight extra cost for the additional blades and the wheel will be repaid in one day's use of them in the crop.

PRICE.

No. 1	\$7.00
No. 2	7.75
No. 3	8.25
No. 4	9.00

AVERY'S SULKY PLOWS

WE have not room here to show cuts and give detailed information of all our Sulky Plows, but farmers and planters in need of a first-class, reliable Sulky will find it to their interest to write us for full particulars.

Besides the popular Blue-Grass Sulky, we make the best Three-Wheeled Sulky Plow on the market. Full particulars, together with prices, will be mailed on application.

THIRTEEN REASONS

WHY THE

Cambria Link Barb Fence

IS THE BEST FORM OF WIRE FENCE.

1st.—It is a perfect chain, with barbs, which is the correct principle for a Wire Fence.

2d.—It is perfectly rust proof, being galvanized.

3d.—Does not infringe on any fence wire patent, as we own the bottom patents covering its manufacture. Farmers can buy the Cambria Link Barb Wire with the utmost confidence that they are fully protected by law and right.

4th.—It makes a more visible fence than the ordinary twisted barb wire.

5th.—The barb can not slip or drop off, as it is part of the strand itself.

6th.—It is portable; can be taken down and reeled up for transportation without tension.

7th.—It is the easiest and quickest to erect, and the handsomest.

8th.—It can be stretched by hand to a perfectly straight line, and does not require to have the life pulled out of it by stretchers, or crow-bars, to get it straight and free from kinks.

9th.—Two strands of wire cannot be so twisted together as to give double the tensile strength of one. The Link Barb Wire is equal to any in strength.

10th.—The Cambria Link Barb Fence is the only one in the world that is so constructed as to permit a gate to be made without injury to the wire. A gate can be formed at any post by merely bracing the post, carrying to next post, and hanging it on hooks. It is opened and closed with one operation, easily and quickly. When closed it is just as effective in turning stock as any other part of the fence.

11th.—Note that the barb is made of same size as strand, not a smaller size.

12th.—It is as light as any two-point barb.

13th.—The Link Barb Wire, when unwound or stretched, is pliable and like a chain or soft rope. It pulls into a straight line as easily as a watch chain. Does not kink, tangle, or fly about. It is not stiff and unpleasant to handle.

NOTICE.

The process of making the Link Barb Wire is a severe test, and none but the highest class steel wire will stand the bending and twisting required to form the link. It tests every six inches of the wire, and, if any bad places exist, betrays them at once, when they are cut out, instead of going into the strand, as is the case with the ordinary fence wire.
