[CUT NO. 1, SHOWING THE MACHINE IN WORKING ORDER.]

MANUFACTURED BY
BALL, AULTMAN & CO.,
CANTON, STARK COUNTY, OHIO.

Who Own and Control the "Right" for the United States.

After toiling and experimenting for many years, we have finally succeeded in getting up a machine that is perfectly adapted to cut both Grain and Grass. The public are already aware that we have been manufacturing a Mowing Machine that has been unrivalled in any market;

But as the Farmer wants a machine that will cut both grain and grass, provided he can get a combined machine that will mow as well as a machine made expressly for mowing; and reap as well as a machine made expressly for reaping. This we furnish them in our *New Machine*.

First,—We have a perfect Mower, having several very important advantages over all other Mowers, and no disadvantages, which will be readily seen by examining its points of excellence.

Second,—We have a perfect Reaper, which has all the advantages of a single machine, and the only true way of delivering the grain at the side of the machine.

~~As~~ For some of the peculiar excellencies of this Machine, we invite attention to the next page.
