MULFORD & COOMBS, Agents, Bridgeton, N.J.

HIGHEST HONORS IN FRANCE
AGAIN AWARDED TO
ADRIANCE, PLATT & CO.'S MOWERS.

On June 26th, and 27th, 1886, a GREAT FIELD TRIAL OF MOWERS was held at GRIGNON (National Agricultural School of France), near PARIS by the

NATIONAL MINISTRY OF AGRICULTURE, the famous French Statesman, the HONORABLE SENATOR LEON SAY presiding, assisted by the DIRECTOR OF THE NATIONAL AGRICULTURAL SCHOOL.

FIRST PRIZE GRAND GOLD MEDAL

Awarded to ADRIANCE, PLATT & CO.

165 Greenwich Street, New York.

JAN. 1, 1887.

During the *thirty years* that we have been striving to secure and retain the confidence and patronage of the farmers, it has been our good fortune to build Mowers and Reapers which were so far in advance of all others in their principles of construction and quality of workmanship, that they have *commanded the preference of the farmers* and have met with immediate and ever increasing success.

Under our *original Trade Marks* of "Buckeye," "New Model," and "Adriance" (each of which was first applied by us to Mowers and Reapers), our machines have *earned*

an *unequalled reputation in all parts of the world*, while, in the markets we have undertaken to supply, *their sale has been and continues to be greatly in excess of all others.*

Wherever our machines are known *they take the lead*, the farmers appreciating that it is the truest economy for them to buy the *machine that will do the best work for the longest time, and which needs the fewest repairs.*

Adriance Buckeye, or New Model Mower.

This machine, which we first introduced *fifteen years ago* is recognized as the most successful and satisfactory Mower ever put into the field. Its best recommendation is the record it has made.

Adriance Encased Gear "E" Mower.

Our New Encased Gear E Mower has been in use for two harvests, and has given unbounded satisfaction. In it are retained all of the important, original features, which have so largely contributed to the peculiar excellence of our manufactures. Its novel features are its admirable system of encased gearing, and its most efficient, but simple tilting lever for elevating or depressing the points of the guard fingers.

ADRIANCE REAPER.

The demand for our Adriance Reaper during the past harvest was so great that we were obliged to refuse foreign orders, that we might more nearly supply our home market. Its great capacity for doing good work under all circumstances, combined with its strength, convenience, lightness of draft, and durability, have secured for it great popularity.
