

DROP AND COIL TOOTH TROY CHAMPION RAKE.

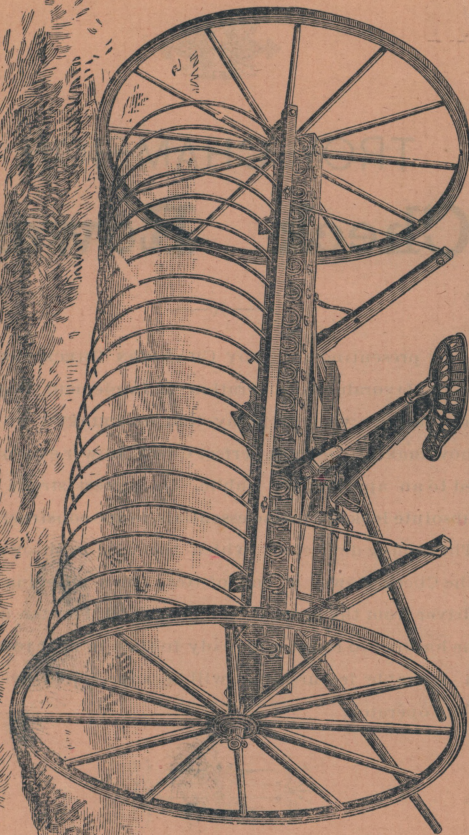

IN our TROY CHAMPION RAKE we feel confident of presenting for your consideration an implement of intrinsic merit; and one that will meet with favor at the hands of the hay maker.

The construction of the Troy Champion is a combination of the Self-dump and lock-lever principles. Its history is a history of success. We solicit careful examination of our Rake with full confidence that it will meet your approbation, and satisfy your demands.

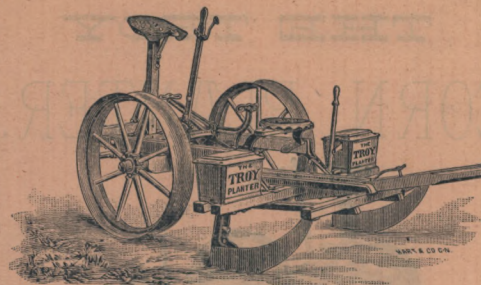

HART & CO. CHGO. ILL.

THE

BEEDLE & KELLY Co.,

—Manufacturers of the—

Troy Corn Planters

| CHECK ROWERS, |

—AND—

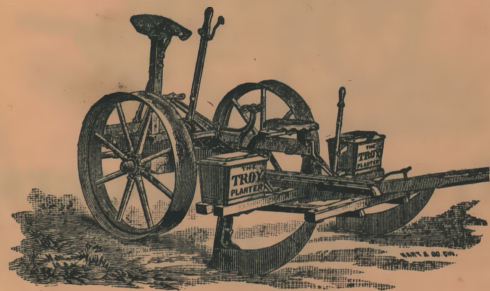

TROY CHAMPION RAKES.

TROY, OHIO.

FOR SALE BY

THE TROY CORN PLANTER.

IN presenting our TROY PLANTER to the Trade and consumer, we feel confident of offering a Machine of superior workmanship, and mechanical device fully adapted to the wants of the farmer.

The TROY has both the hand and foot lever, and indeed all the latest valuable improvements known to the trade.

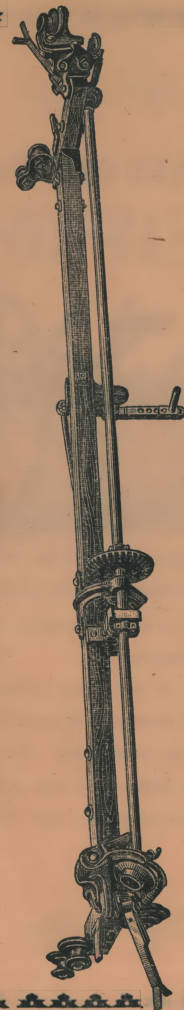

TROY CHAMPION Check Rower.

IN presenting our TROY CHAMPION CHECK ROWER to the favorable consideration of Implement Dealers and farmers, we wish to say that we BELIEVE we are now making the most perfect Check Rower ever offered to an appreciative public. Its perfect stroke and absolute lock are prime essentials in its construction. The doffing device, by which the wire is thrown off the Check Rower at end of row, (thus relieving the driver from the necessity of getting off Planter until he has turned round and ready to start in next row), is a desirable feature that will be appreciated by the field operator.
