

## **To Our Friends and Patrons.**

---

.. .. .

Our new catalogue, which is herewith presented, we have endeavored to make correct in its descriptions and sufficiently attractive to keep it on file for future references. Our goods are well known to the trade, and wherever used give the best of satisfaction. Where any defects in material or workmanship appears we furnish new parts free of charge. Our goods are all warranted to do good work.

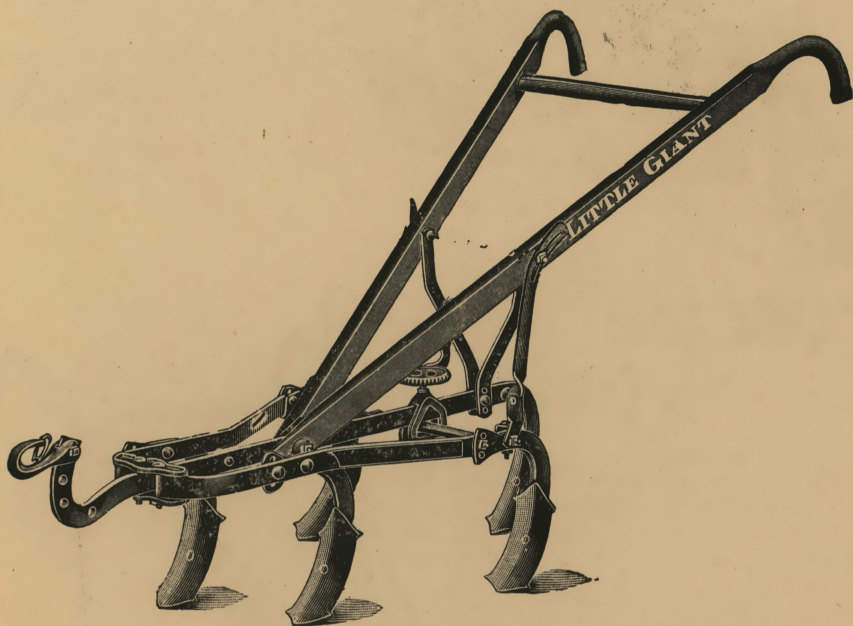

Goods are all sold F. O. B. Bellevue, and our responsibility ceases when goods are delivered to railway company. All bills must be settled in ten days, either by sixty day note or check, less 2 per cent. We will correct all mistakes of our own just as cheerfully after settlement as before. In ordering goods order by number where number is given. If no number or name is given send tracing on paper of parts wanted.

Prices are subject to change without notice.

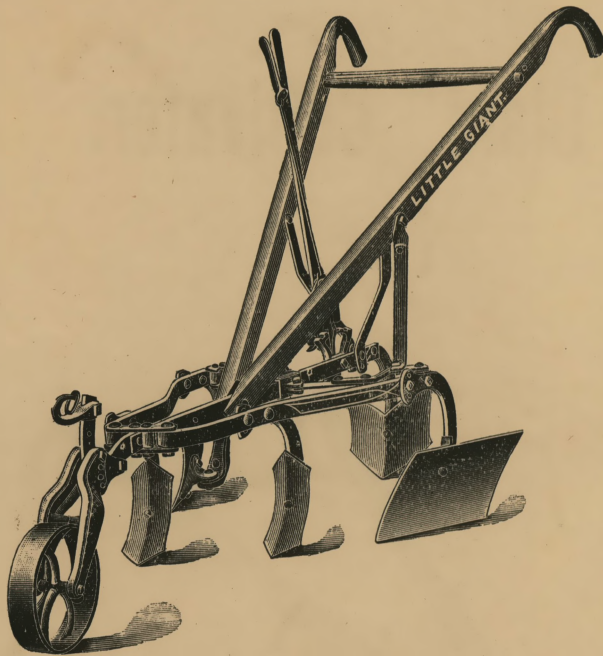

Respectfully,

**THE BELLEVUE PLOW CO.**

# "Little Giant" Cultivator.

This represents the LITTLE GIANT CULTIVATOR as a plain tool. It will be noticed that the standard which holds the teeth may be adjusted so as to give the teeth any desired pitch by taking out the forward bolt and inserting it in the different holes to throw the point of the teeth backward or forward. This gives the operator an opportunity to work in hard, tough ground, or in loose, mellow soil, as may be desired.

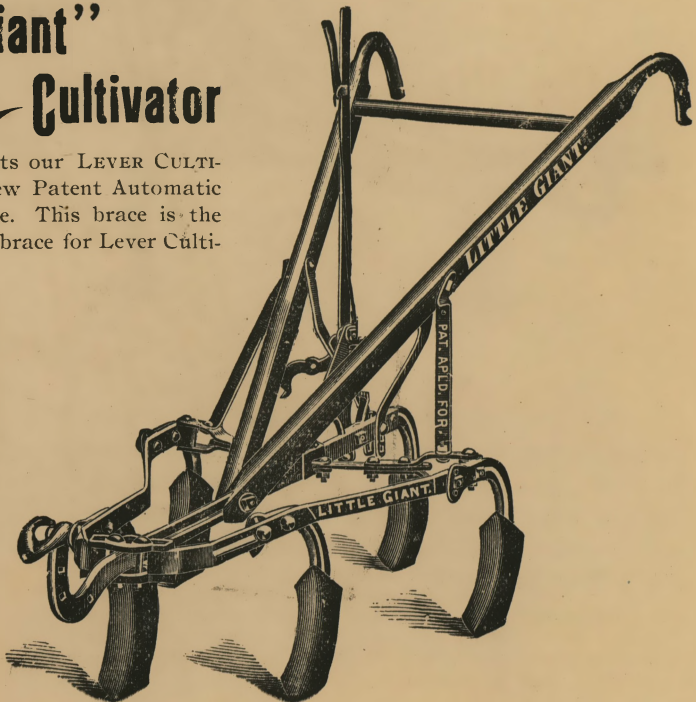

## "Little Giant" Cultivator

This cut represents the Little Giant with lever, rigged as a horse hoe. It can be arranged in a variety of ways to suit the requirements of the operator.

## "Little Giant" Cultivator

This cut represents our LEVER CULTIVATOR with our new Patent Automatic Side Handle Brace. This brace is the simplest and best brace for Lever Cultivators on the market. It does not interfere with the working of the lever and makes the LEVER CULTIVATOR as stiff and strong as the Plain Cultivator is with side braces.

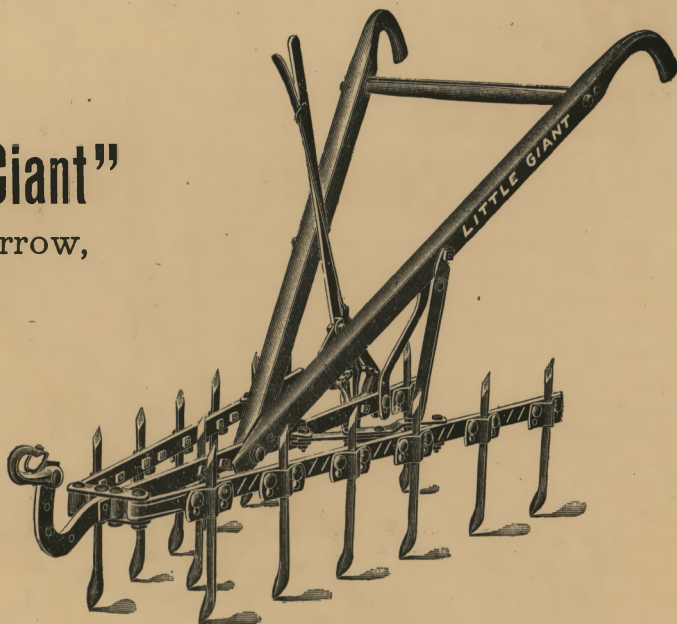

## "Little Giant"

14 Tooth Harrow,  
Plain.....

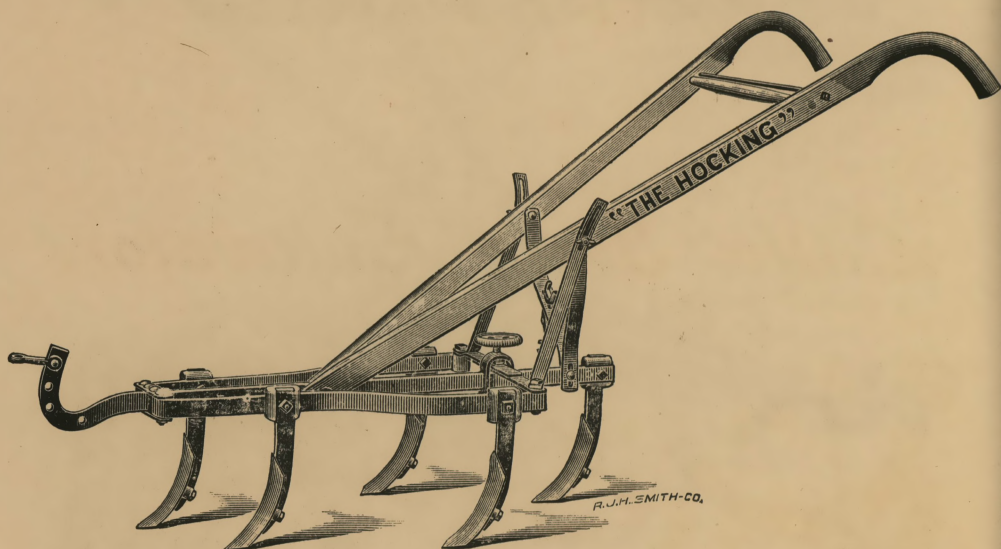

## "Little Giant"

14 Tooth Harrow,  
with Lever.

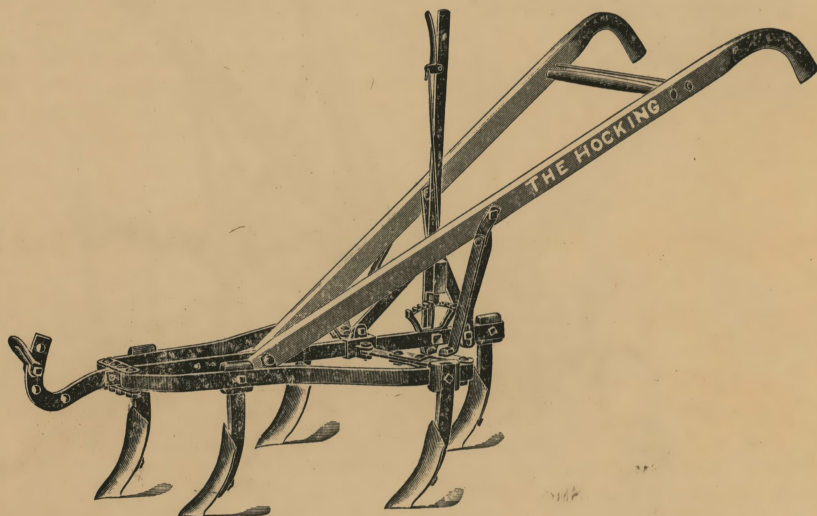

The above tools are the most perfect tools of the kind on the market, combining as they do the Field Cultivator and Superb Garden Harrower and Pulverizer. The teeth are so arranged that one end is the cultivator and pulverizer, while the other end is the harrow. By a very simple device the slant of the teeth can be changed so the tool can be made a PERFECT SMOOTHING HARROW. It has fourteen  $\frac{5}{8} \times \frac{7}{8}$  diamond teeth drawn to a cutting edge on one end.

# The "Hocking" 5 or 7 Tooth Cultivator.

Is made with and without side handle braces. The Gauge Wheel and Hilling Shovels used on the Little Giant can be attached to this tool.

## The "HOCKING" 5 Tooth Cultivator with Lever.

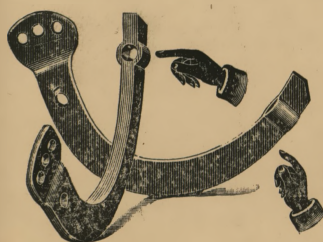

We use the same Lever Expander as is on our Little Giant, with the same Automatic Side Handle Braces.

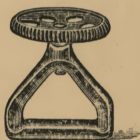

# EXTRA PARTS

FOR OUR

## *Little Giant Cultivator.*

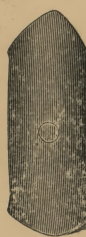

1 to 7.  
Standards.

19 M  
Adjusting  
Clamps.

128.  
Oval.

59.  
3 inches  
wide.

127.  
2½ inches  
wide.

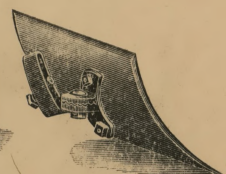

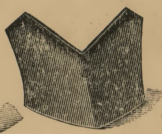

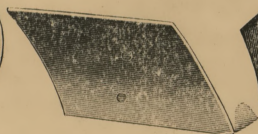

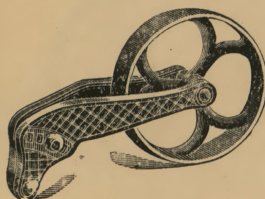

126.  
2 in.  
wide.

109  
1¼ in.  
wide.

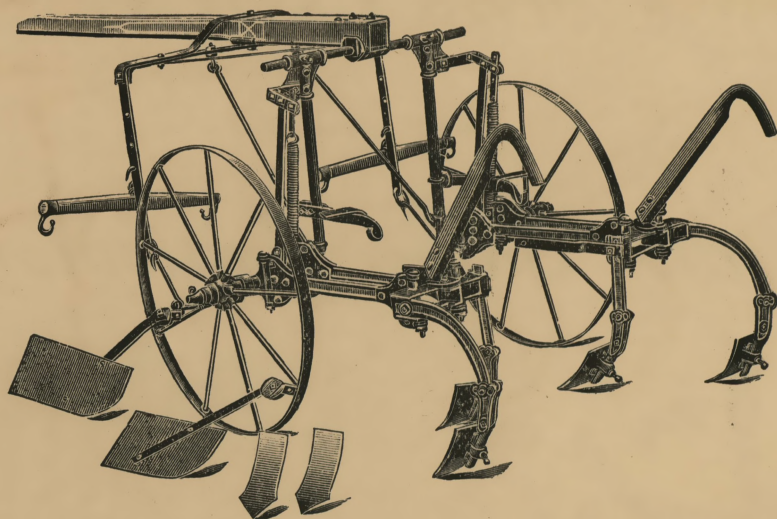

In ordering as numbered, you avoid any mistake, and we know just what you want. We would expressly call your attention to hole in Standards. We claim it is perfect. The nut has a square bearing which holds the point more firmly. Our Adjusting Clamp is the simplest and best in use. No wrench needed to adjust Cultivator.

## Horse Hoes and Wheel,

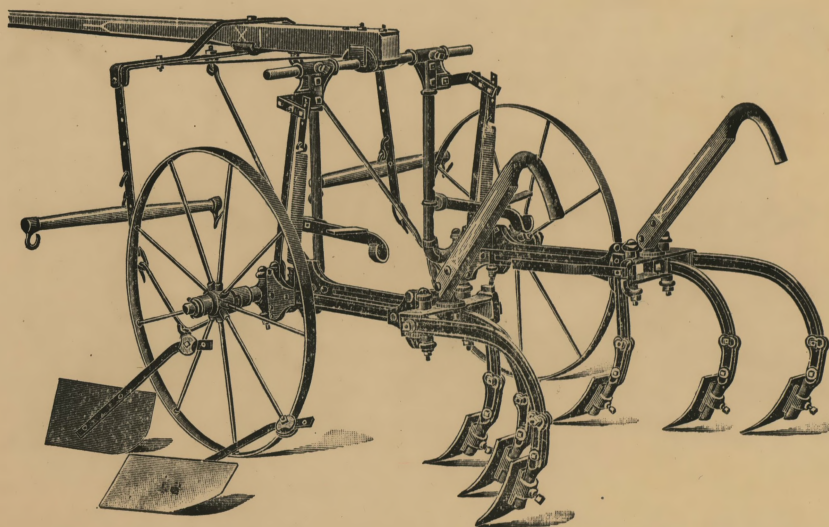

We would respectfully call the attention of the trade to the Patent Hoe Attachment.

## The "Acme" Walking Cultivator.

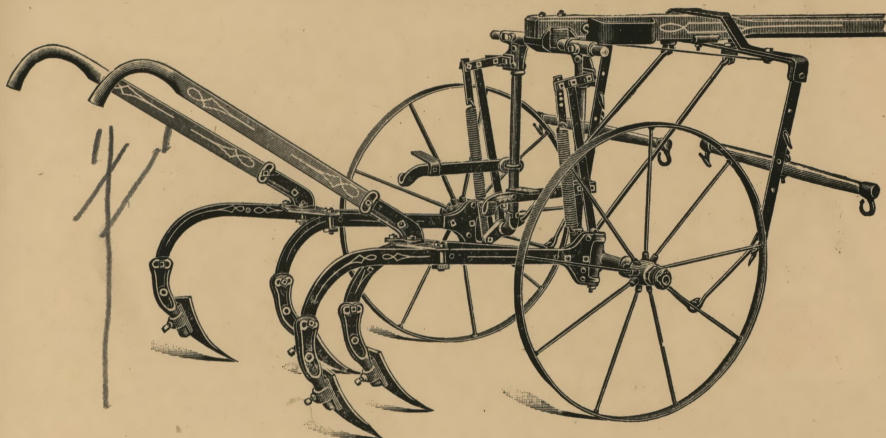

Double Bar Parallel Beams, insuring steady running and otherwise giving the best results. Double Acting Coil Lifting Springs making the gangs handle easy. Adjustable Arch and Steel Evener. Knuckle Joints on the parallel joints that can be adjusted to take up wear making, a cultivator that will never be loose and rattling. Steel wheels with changeable boxes.

## The "Acme" 6 Shovel Cultivator.

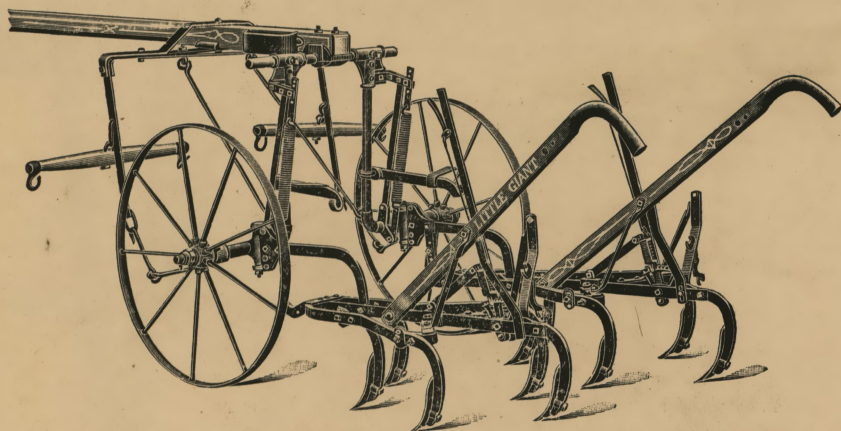

This cultivator is identical with tool above with the addition of two shovels.

## "Favorite" Walking 4 Shovel Cultivator.

Double Acting Coil Lifting Springs, making the gangs handle easy. Adjustable Arch and Steel Evener. Knuckle Joints that can be adjusted to take up wear, making a cultivator that will never be loose and rattling. Steel wheels with changeable boxes. Also made with 6 shovels. Gives universal satisfaction. A good tool at a low price.

## "Little Giant" Walking 2 Horse Cultivator.

Light, Strong and Durable. Has no equal for shallow cultivation. Double Acting Coil Lifting Springs, making the gangs handle easy. Adjustable Arch and Steel Evener. Knuckle Joints that can be adjusted to take up wear, making a cultivator that will never be loose and rattling. Steel wheels with changeable boxes. The same attachments used on our Little Giant Five Tooth Cultivator can be used on this tool by taking out four bolts and adding two Right Hand Handles. You have two of the best one-horse cultivators on the market.

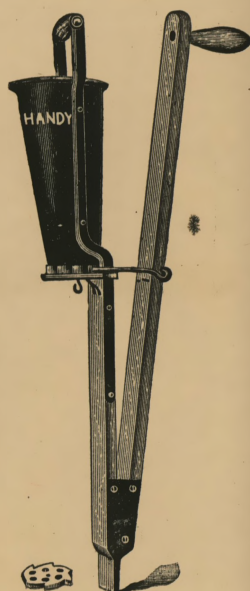

## Champion Post Hole Digger.

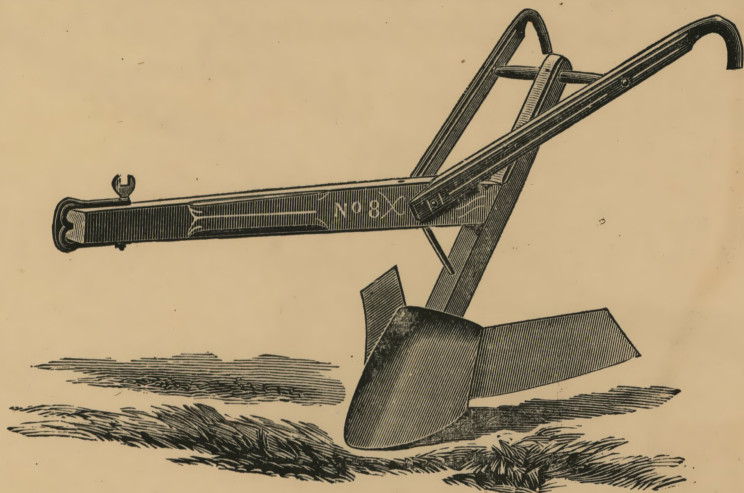

This digger needs no recommendation. It is sold everywhere and gives universal satisfaction. The handle is made of the best  $\frac{7}{8}$  round iron, and the blade of the best hard steel.

## The Handy Rotary Planter.

It has the Rotary Drop, similar to that used in the Horse Planters, thus securing great regularity. Four Feed Cups are at all times exposed to the corn, thus giving each four chances to fill, to where any other has one. By this, almost perfect regularity in dropping is secured. Write for sample and prices.

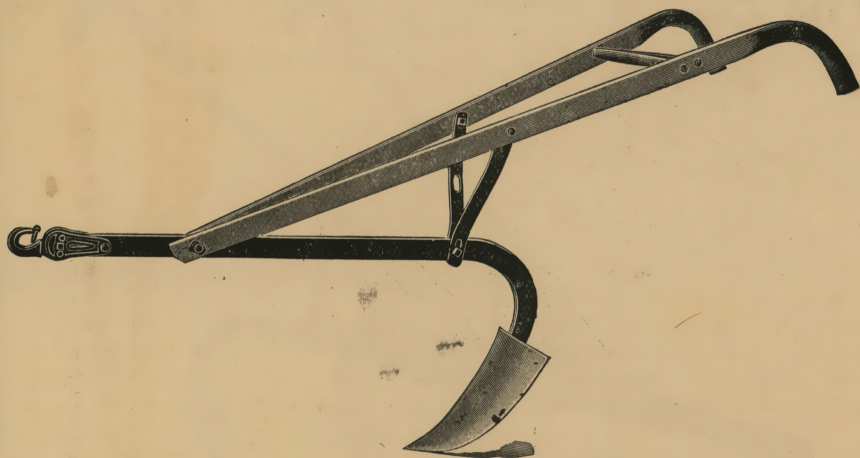

## Our No. 8 Wing Shovel Plow.

The improvement on the old single shovel can readily be seen. The shovel, by means of throwing the wings in or out, makes it a valuable tool for hilling or furrowing in potatoes or corn. It has no equal. Shipping weight, 35 pounds.

## Steel Beam Single Shovel Plow.

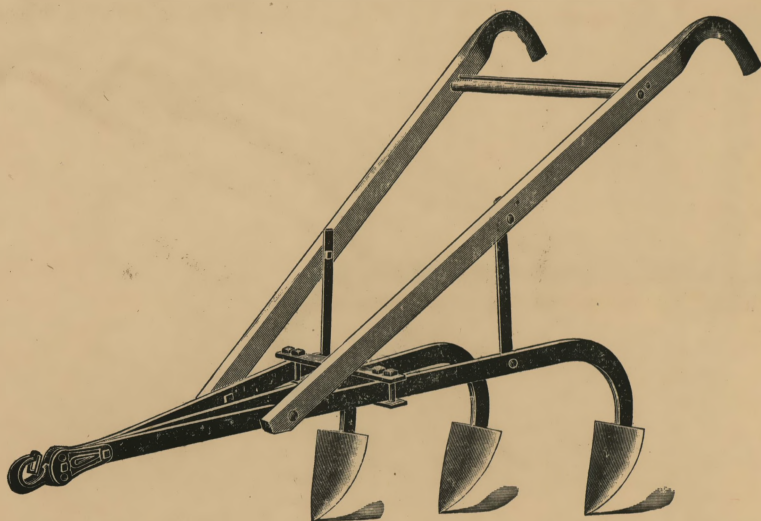

Beam  $1\frac{3}{4} \times \frac{3}{4}$  steel. They are shipped with 12x14 blades, unless otherwise ordered. We can put on any size blade desired. This plow needs no recommendation.

## Jumping Steel Beam Shovel Plow.

Beam 2x1 steel. Fitted with any size blade desired. It is the best tool for breaking up new ground on the market,

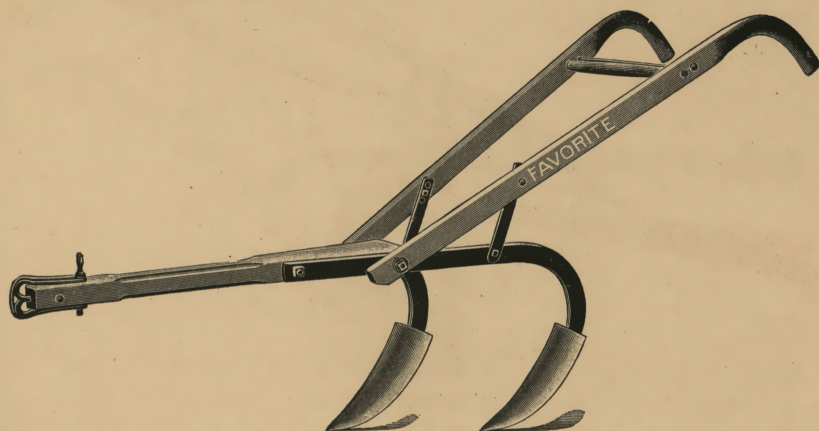

## ❁ Steel Beam Tripple Shovel. ❁

Beams  $1\frac{1}{2} \times \frac{5}{8}$  steel. Gives the best of satisfaction wherever used.

## The "Favorite"

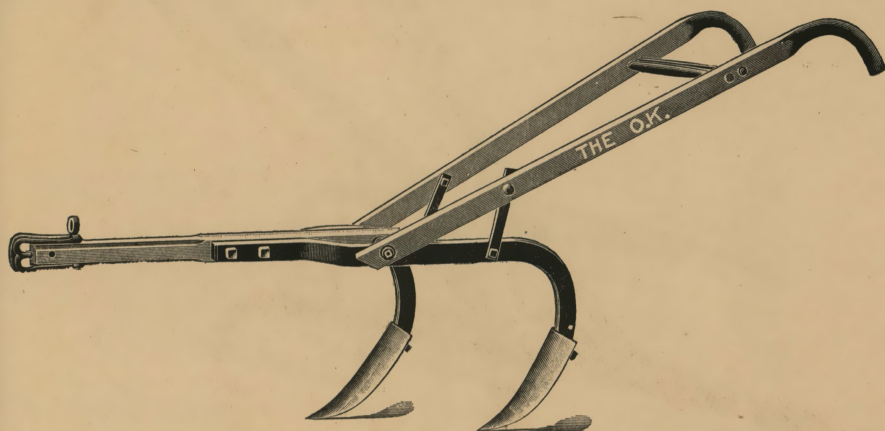

Wood Beam, Steel Gang, Double Shovel Plow.

The gangs on this plow are  $1\frac{1}{2} \times \frac{5}{8}$  steel, and gives universal satisfaction.

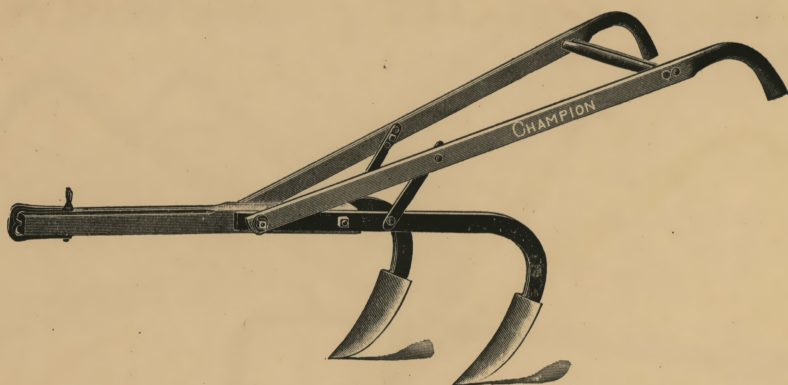

## The "O. K."

Wood Beam, Steel Gang, Double Shovel Plow.

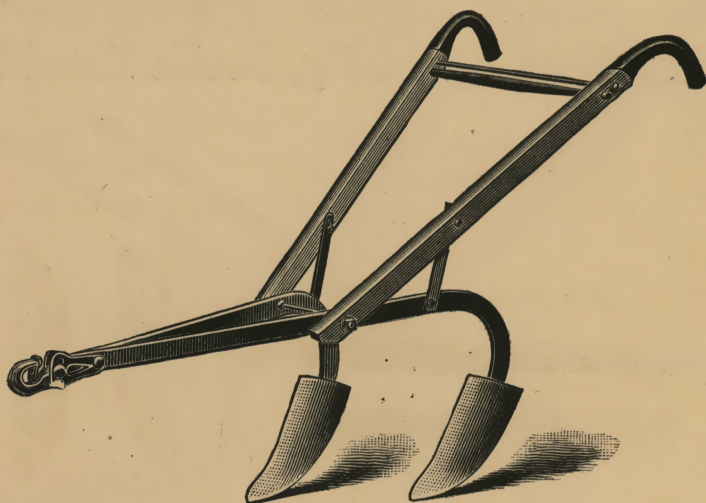

Gangs are  $1\frac{1}{2} \times \frac{5}{8}$  steel cast wedges, between the wood beam and steel gangs with adjustable cast blocks on spreader rod to adjust width of gangs.

## "Champion" Double Shovel Plow.

Gangs on this plow are  $1\frac{3}{4} \times \frac{3}{4}$  steel, and is well known to the trade. Wood beam is wedge shaped, filling space between gangs.

## The "Victor" DOUBLE SHOVEL PLOW.

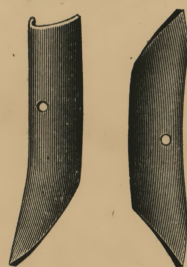

The Best Steel Beam Double Shovel made. The beams are  $1\frac{1}{2} \times \frac{5}{8}$ . We also make this plow with  $1\frac{5}{8} \times \frac{5}{8}$ , and  $1\frac{3}{4} \times \frac{3}{4}$  steel beams. Has adjustable clevis and needs no recommendation to the trade.

# The "Dexter" Cultivator.

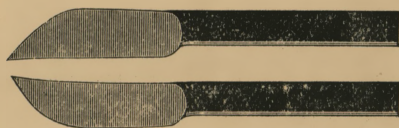

This plow is very light, strong and durable, weighing only twenty pounds. We furnish three styles of shovels. It is very easily operated and quite a labor-saving machine. The high wheel insures light work. No garden should be without one.

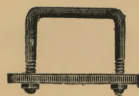

## Grain Drill Points.

## Straight and Jumping Coulters.

## Coulter Clamps.

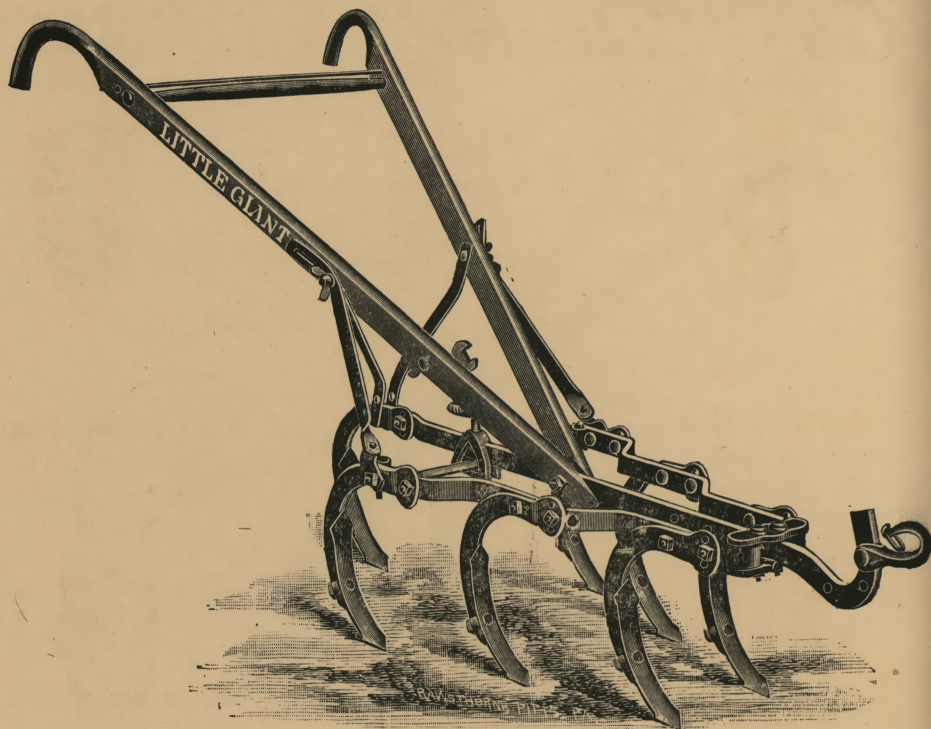

## Cast Block.

Can furnish on short notice points for all the different grain drills manufactured. Our points are polished, varnished on face or blued. In ordering be sure to state if wanted blank or with holes punched,

---
