

* "SQUARE * CORNER" * GANG * PLOW. *

Reasons why the Square Corner Gangs ~~AND~~ Sulky Plows excel all others,

1. They embrace a new principle in construction as explained on other side of this flap.
2. They combine lightness and strength.
3. They are extremely compact.
4. They are very light-draft.

5. They work equally as well without a pole as with.
6. They turn a corner without strain on the wheels or plow.
7. They are easily Operated.
8. They plow level furrows across corn rows.

"SQUARE CORNER" SULKY PLOW.

THIS
SULKY PLOW
AND THE
GANG PLOW
shown on outside of this
flap are constructed on a
new principle which pre-

vents all strain on the
wheels when turning,
also secures very light
draft, so that two horses
can handle it. Being
made mostly of Steel it
is light yet strong.
