

The King Ball Bearing Pitless Scale

United States Standard

Guaranteed to be the
best Pitless Scale
made, and superior in
every respect to any
on the market.

INDESTRUCTIBLE
ALL STEEL FRAME

BALL BEARINGS to
take the wear from
the pivot edges.

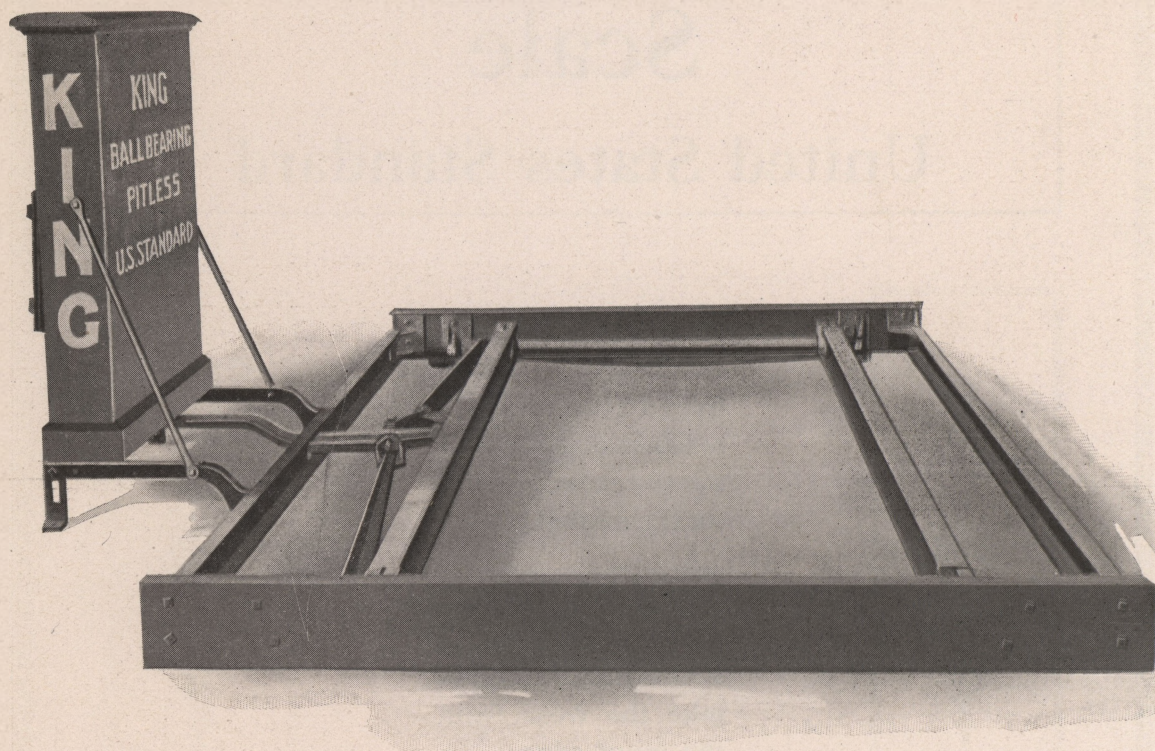

Manufactured by the

King Drill Manufacturing Co.

Nebraska City, Nebraska

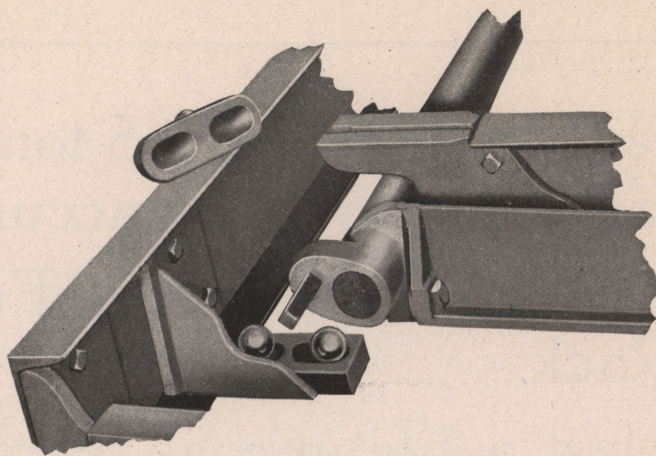

WE take pleasure in presenting the latest development of the Pitless Wagon Scale with new and improved features, which are guaranteed to excel all others. This scale is the product of experts who have made scale making a life study, and who are responsible for more features of the Pitless Scale than any other person.

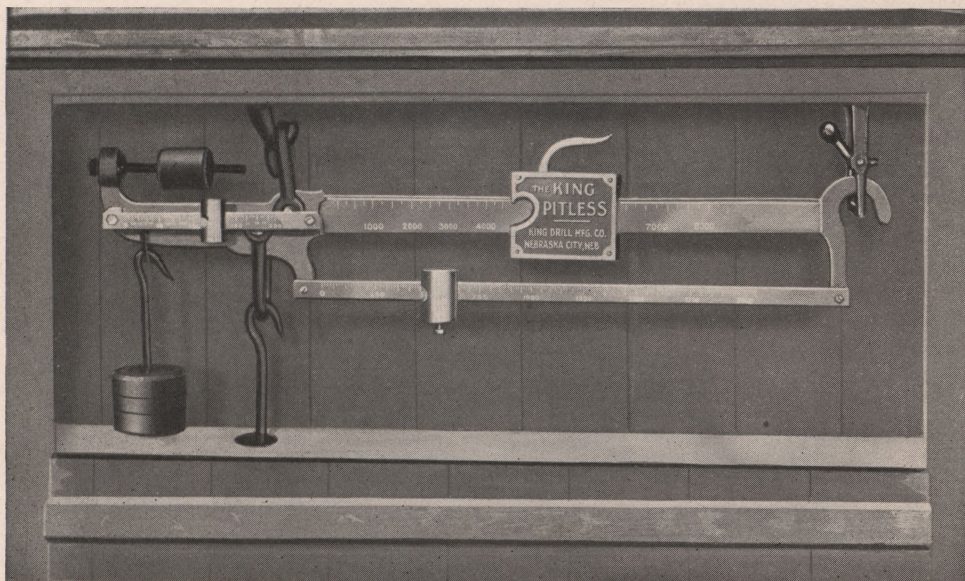

THE MAIN FRAME

The Main Frame is made with 8" steel channels on the ends instead of 7" or smaller, as on other makes. The sides have 6" steel channels, which allow the planks to project over the sides. The center joists are heavy steel I-beams, making a very strong frame, which cannot get out of shape.

The Pivots or Knife Edges are made from the highest grades of tool steel and properly tempered. They are made with special dies, so as to secure uniformity, and can be easily replaced when worn.

The Ball Bearings consist of two large balls at each corner, which roll in grooved castings, and which allow the platform to oscillate **WITHOUT WEARING ON THE KNIFE EDGES**, thus insuring longer life.

The Scale Beam is made principally of brass and is highly finished. Has compound and tare weight beams. Also auxiliary beam on the left. The beam poise has roller bearings and brass gravity latch.

The beam box is made of selected one-inch lumber and handsomely painted. It is supported by steel angles with cast legs, which keep it above the ground.

This scale is tested with weights which have been sealed and stamped by the Bureau of Standards at Washington, and is absolutely correct.

The King Pitless are **SIMPLE, ACCURATE and DURABLE.**

Made in one size only, 5 ton, 8x14,
and guaranteed to weigh accurately.

Can be equipped with Folding
Stock Rack.

Will last a lifetime, as there is no
wear on the pivots.

You will make no mistake in buy-
ing the **King Pitless**.

Because—

It is ball bearing.

All steel frame.

Tested and inspected.
