

Our Land Rollers

Are second to none. Shells are made from heavy sheet steel, firmly riveted at each end to a strong iron head. Shaft is from $1\frac{3}{4}$ inch steel, well supported at each end by a dust-proof, self-oiling box. Frame is from steel angle bars which make a good weight box. The low hitch on the tongue for the double-tree prevents all down pressure on front end of tongue.

Three lengths, 6, 7 and 8 feet.

Four heights of drum, 20, 21, 24 and 28 inches.

Made with either 3 or 4 drums. Nos. 4, 5 and 6 have iron shell drums. All other sizes have steel shell drums.

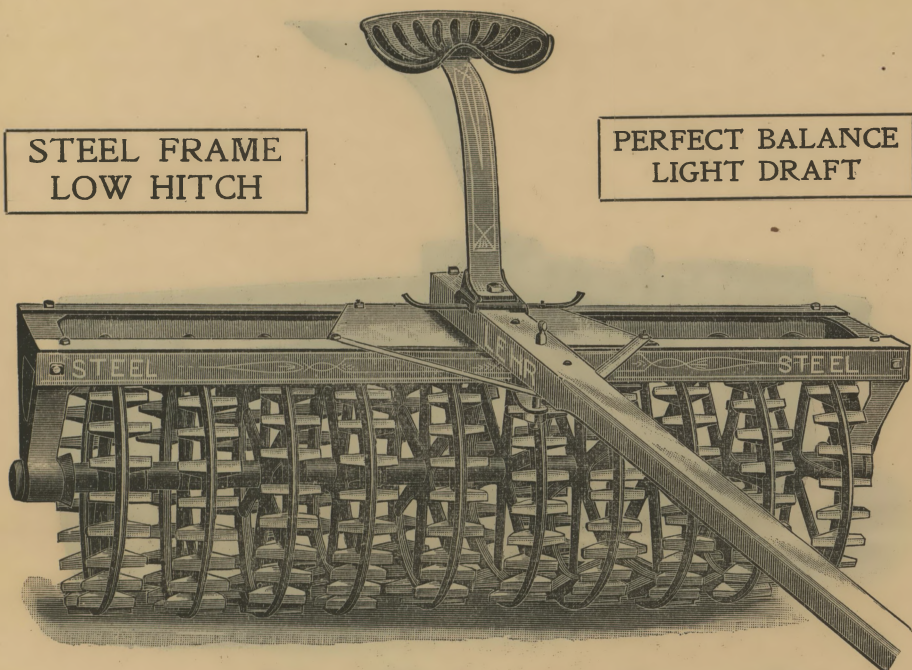

LIST OF SIZES AND WEIGHTS.

No.	Length.	Diameter.	No. of Sec.	Weight.
1	6 ft.	21 in.	3	625
2	7 ft.	21 in.	3	675
3	8 ft.	21 in.	4	770
4	6 ft.	20 in.	6	950
5	7 ft.	20 in.	7	1075
6	8 ft.	20 in.	8	1200
7	6 ft.	24 in.	3	675
8	7 ft.	24 in.	3	725
9	8 ft.	24 in.	4	850
10	6 ft.	28 in.	3	850
11	7 ft.	28 in.	3	900
12	8 ft.	28 in.	4	1100
13	8 ft.	21 in.	3	750
14	8 ft.	24 in.	3	800
15	8 ft.	28 in.	3	1000

[OVER]

The Lehr Clod Crusher and Pulverizer.

This machine gives the best of service and is simple and strong. The sections are 24 inch diameter, of best cast iron, and each turns independently on the axle.

While the machine is in motion the shaft moves with the sections so that it turns in the dust-proof self-oiling boxes at each end of the frame. Notice the new style of wheel with the ridge in the center. This gives it a much greater pulverizing power than the ordinary flat face style. For packing loose ground or meadows it cannot be excelled.

TWO SIZES CARRIED IN STOCK.

Lengths.	No. of Sec.	Weight.	No. of Shaft Supports
6 feet.	10	900 lbs.	One.
6 feet 6 inches	11	1000 lbs.	Two.

Longer sizes can be furnished if desired. The shaft is of 1½ inch machine steel, securely held in place by self-oiling, dust-proof boxes. Center supports also have removable boxing, and all boxes can be easily renewed at small expense, if they become worn. With our low hitch the down-pressure on front end of tongue is entirely overcome. For description of low hitch see illustration given of our Land Roller on the other side. All Crushers are now shipped with Low Hitch, same as our Land Roller.
