TO OUR FARMER FRIENDS:

We present this little Souvenir of the Autumn Fairs of 1888 with the hope that it will be a reminder that the *Deering Grain and Grass Cutting Machinery* is being used in greater numbers by farmers everywhere than any other make of Harvesting Machinery, and that you will not fail to ask for a "*DEERING*" when you are buying a machine.

Thanking you for past favors, we are

Yours very truly,

WM. DEERING & CO.

CHICAGO, U. S. A.

THE DEERING ALL-STEEL BINDER, WITH STEEL BUNDLE CARRIER.

THE DEERING LIGHT REAPER.

THE NEW DEERING MOWER.

THE DEERING FRONT-CUT GIANT MOWER.

THE DEERING ALL-STEEL BINDER

Is the only Binder made that is worthy the name of *Steel* Machine and for wearing qualities and ability to do perfect work it is without an equal. For the season of 1889 some fine improvements have been put on this machine, making it still more efficient.

The Deering Mowers embrace a larger variety of widths of cut and widths of knife-sections than any other make, so that, no matter what kind of work is to be done, the farmer can find some one of the Deering Mowers adapted to his needs.

For the best Binder Twine made read last page of cover.

Special circulars about any of the Deering machines mailed to anyone applying to us or our agents.
