Hamilton, Ohio.

"The Hamilton" CORN PLANTER

Besides having all the best points of other Corn Planters, it is furnished with **ADJUSTABLE COVERING HOES**, which can be regulated to cover the seed any depth desired. They cannot fail to cover the seed no matter what the condition of the soil. Replanting is unknown where "The Hamilton" Planter is used. The Covering Hoes also cultivate the soil, which gives the seed a start ahead of the weeds.

THE WHEELS ARE ADJUSTABLE, they can be run **over** the seed row same as all other Corn Planters, or they can be set to **run off of the seed row**, which is very desirable after light showers, or on mornings after heavy dews.

CLOD FENDERS that allow only fine soil to cover the seed, they push all clods, stalks and other loose obstructions out of the way.
