GEORGE W. CARVER
Director Department of Agriculture
and Experiment Station

111
Tuskegee Institute, Ala., Sept. 7, 190

Dr. L. H. Pammel,

Ames, Iowa.

My dear Dr. Pammel:

I wish to thank you for the information contained in your letter of recent date. I shall be pleased to take advantage of it. It is just what I wanted.

I note that fungus is appearing in an incipient form, as soon as it develops, I shall send you a specimen. I can get splendid plants of okra, etc., for you if you wish them.

Kindest regards to the family, I beg to remain,

Yours very truly,

Geo. W. Carver.

Dict. to E.A.C.
