

March 26, 1927

Prof. George W. Carver,
Tuskegee Institute,
Tuskegee, Alabama.

Dear Prof. Carver:

I have your letter of March 18th and note what you say with reference to the Avocado flower. I have not seen the paper and I will have it looked up for you, and see what Dr. Stout says, then I will write to you again. I think I have seen some cases recorded in which staminate trees of certain other types have born fruit, but I will look the matter up.

Yours truly,

P/H
