Geo. W. Carver,
Director Department of Agriculture
And Experiment Station.

TUSKEGEE, ALA., May 1, 1902

Dr. L. H. Pammel,
Ames, Iowa.

My Dear Professor Pammel:

I have your favor of April 26th and note carefully all you say. I shall continue to look for species of Gymnosporangium. Now I can secure you Roestelia on host of cedar. I do not know whether they would be acceptable or not. I can also get you fine specimens of Peridermium orientalis on the pine. It is in fine condition now,--if that will be acceptable. I have never collected the Roestelia on the cedar, nor the Peridermium upon it; in fact, I did not know that it ~~grows~~ occurred upon it.

The Ogden Party, or promoters of Southern education, have come and gone. It was indeed a very pleasant gathering. I met Professor Bailey and wife. Had a very pleasant talk with them and enjoyed them very much indeed. Professor Bailey seemed quite well pleased with what he saw and all seemed much refreshed from their visit. I really hope you can come to see us soon, although you give us but very little encouragement along that line. I should consider it a very great privilege to have you. I thank you for your interest in my returning to Iowa, but I do not know just when this will be.

Wishing to be remembered to Mrs. Pammel and the children, I beg to remain,

Yours most sincerely,

G. W. Carver
