Chicago 54, Illinois

Attention: Philip A. DuMont

Dear Mr. DuMont:

In your Revised List of the Birds of Iowa, page 12, you state that 364 species were recorded for Iowa, 47 as permanent residents, 136 as breeding birds, 29 as winter visitors, 148 as migrants, and 39 as casual or accidental.

Have you information that would change that listing? Bruce Stiles collected a glaucous gull in 1941 at Lake Manawa.

You had a paper or two on more recent breeding birds, I believe. Will you please send reprints of such papers as I do not have them.

Sincerely yours,

George O. Hendrickson
