Professor L. H. Pammel,
Botany Department,
Iowa State Agricultural College,
Ames, Iowa.

My dear Professor Pammel:

We are looking for a man to teach the courses offered in the summer school here this summer and I was wondering if you might not be able to suggest someone in your department for the position. The summer session lasts six weeks. (June 13 to July 22.) The classes are small which of course offers a great opportunity to do outside work and although the salary which we are paying (\$200.00-\$225.00) is not as much as we should like to pay were we better off financially, I consider this a very excellent opportunity for anyone who is interested in studying the Rocky Mountain flora.

As you know, we are situated almost at the gate way of the Estes and Rocky Mountain National Parks, and the flora from Fort Collins to Long's Peak, a distance of fifty-five miles, is a very varied one, ranging from a temperate to an arctic flora.

Any recommendations from you would be appreciated.

Yours truly,

A. K. Petersen

AKP:TH

Botanist.
