Dr. F. H. Pammel.
Ames, Iowa.

Dear Dr. Pammel:-

Before leaving Ames I tried to see you but arrived too late.

They said at the bookstore that no orders for note books directing sets and linen had been ordered but that you and Prof. Summers had been discussing lenses or dissecting sets.

I believe it is too technical for them. Their vocabulary would be too limited to use it satisfactorily as a help.

I am including a check for Bergen and Davis Morphology as well as Atkinson's Botany. Advanced Botany is not in print. I have spent the day in N. Y. City & like it very much.

Yours truly, Roe Hayhurst

The Botanical Society of America
Eastern Section
Delegate from Iowa City
on the party to Bermuda leaving Dec. 26. Very truly, Roe Hayhurst

They did not seem to know at the classification office anything definite about the approximate number of students. You usually ask me to remind you about these articles so I am taking the liberty this time of doing so, since I suppose you realize the difficulties of trying to see the microscopic slide with the naked eye — such as students without apparatus must.

I believe I'll return to the little note books this year — if that is what you are planning to have.

About books, I think for 3rd & 6 we'll need about 15 Leavitts Outlines. As for another text for them I do not know what to say. You remember we tried Coulter, Barnes & Cowles
