Dear Miss Butler:

I think, perhaps,

you would better ignore my
latest suggestion and come ahead
as you had planned, some weeks
or two after the year opens. That
will be a pleasant season for your mother
to get acquainted with Ithaca, and
on the whole I may possibly have as
much time then as later. There is no
reason, at any rate, why you should not
go right along finishing up the series of
drawings, already so well started for
illustrating the systematic part of our books.

I can do my share in - the end after two
these things that have precedence are out of the way.

No trouble about registering when you arrive, I
think. Graduate students count actual time of residence.

I hope you may be here to go with my linnet
to lunch up to "afterglow" Glad to know your
mother has gotten on so well. We have heard
from you occasionally through some
of the girls - all of whom are gone now.

Yours sincerely
Janet S. Matham
