Information Plan Concerning Public Health Aspects of Spring Tests

Dr. Bugher outlined present plans to provide state public health officials with information concerning fall-out and other phenomena resulting from the spring test operations. Data permitting the approximate evaluation of radiation will be distributed to the appropriate state officials and special measures will be taken with regard to the states most likely to be concerned.

DELETED

1. Information Plan for Operation UPSHOT-KNOTHOLE (See AEC 457/31, subsequently circulated)

Mr. Salisbury briefly reviewed the information plan for Operation UPSHOT-KNOTHOLE and observed that a question had arisen concerning the course to be taken in the event that one or more shots are for any reason deferred. When this matter had been discussed with relation to Operation TUMBLER-SNAPPER, it had been decided that any statements that appeared desirable would first be cleared with the Commission (see AEC 505/21 and minutes of Meeting 679).
