1. Presidential Approval of Additional Test in Current Series
(See minutes of Meeting 863)

General Fields said that Presidential approval for the additional shot in the current series had been obtained. It was possible that the test would occur as early as June 1 (see AEC 487/59).

The Commissioners then discussed with General Fields, Dr. Bugher and Mr. Salisbury matters concerning public and Congressional reactions to the May 25 shot and the timing of a press release announcing the additional test.
