Richard J. Hallinan

CLASSIFICATION CANCELLED

~~OR CHANGED TO~~

BY AUTHORITY OF L. M. Salanski
BY R. Anderson DATE 4/4/79

DELETED

e. Biology and Medicine

Dr. Dunham reported on the results of his recent survey of the health of Marshall Island residents who had been involved in fallout incidents during Operation CASTLE. He said that he was well pleased with the general health and morale of all groups concerned and reported that the Rongelap Marshalese could be returned to their atoll shortly subject only to a number of limitations on diet and movement. Mr. Libby asked Dr. Dunham to inform him concerning radioactive strontium contamination of shell fish and other seafood in the area.

Dr. Dunham then reported on discussions with Dr. Robert H. Holmes, the new director of the Atomic Bomb Casualty Commission, concerning the ABCC's plans for future activities. He also commented briefly on specific aspects of relations with Japan.

In the course of discussion, Mr. Libby said that Mr. Strauss had asked him to request the National Academy of Sciences to cooperate with representatives of a British group which is conducting studies of the effects of radioactivity.

At this point Mr. Clark left the meeting and Messrs. Waters and Salisbury entered.
