- ✓ Yellow Throated Vireo one 21 September Ames - Brookside Park
only one seen this Fall
- ✓ Philadelphia Vireo total of eight
16 September to 3 October
Ames - Brookside Park
✓ see documentation for one seen 3 October
- ✓ Red Eyed Vireo two 5 October Ames - Brookside Park
last ones seen
- ✓ Blue Winged Warbler one 15 September Ames - Brookside Park
only one seen this year
- ✓ Orange Crowned Warbler one 10 September Ames - Brookside Park; Early
- ✓ Nashville Warbler total of 328
5 September to 13 October
Ames - Brookside Park
more than this Spring by nearly one third.
- ✓ Northern Parula total of thirteen
29 August to 10 October Ames - Brookside Park
the one on 10 Oct very late - see documentation
- ✓ Chestnut Sided Warbler total of twenty
29 August to 2 October Ames - Brookside Park
- ✓ Magnolia Warbler one 22 August Ames - Brookside Park; early
one 28 September Ames - Brookside Park
last one seen
- ✓ Black Throated Blue War one female 9 September Ames - Brookside Park
same one seen by Joe Schaugenbuel a few minutes
earlier. I'd never seen one in Iowa before.
- ✓ Yellow Rumped Warbler two 3 October Ames - Brookside Park
first ones seen this Fall
nine 30 October Ames - Brookside Park
last ones seen this Fall
- ✓ Black Throated Green total of 32
9 September to 5 October Ames - Brookside Pk
- ✓ Blackburnian Warbler total of fourteen
1 September to 2 October Ames - Brookside Pk
- ✓ Bay Breasted Warbler thirty plus
29 August to 23 September Ames - Brookside Pk
This seems like a lot, yet more than half of these were
pinkish on the sides and four had very obvious 'bay'
mark on side. Most springs I expect from one to five.
Yet one spring I saw around twenty-five.

are always some that I don't get a good enuf look at,
so am not sure, especially on dark and gloomy days
that we've had a lot of this Fall, when trying to
separate Bay Breasted & Blackpoll.

✓ two 2 November Ames - Brookside Park
last ones seen this Fall
