THE BOMB 1933

SEVENTY-FIVE

YEARS OF HISTORY

AND OF GROWTH

AT THE IOWA

STATE COLLEGE

IOWA STATE
UNIVERSITY
COLLEGE LIBRARY

DEDICATION

♦ To you, the "first and best" of Iowa State who, through the years, have watched the spirit you conceived permeate the lives of thousands of men and women now scattered to the four corners of the earth • • • • •

♦ To you who rejoice that you were there to see born on the wide Iowa prairie another name on the long list of state achievements • • •

♦ We proudly dedicate this history of our efforts to live up to the standards you set for us 65 years ago.

THE UNITED STATES OF AMERICA,
TO ALL TO WHOM THESE PRESENTS SHALL COME, GREETING.

CERTIFICATE
No. 6597

Whereas, *William Whitney of Fairfield County, Ohio*
has deposited in the GENERAL LAND OFFICE of the UNITED STATES, a Certificate of the Register of the Land Office at *West Des Moines*, Iowa, whereby it appears that full payment has been made by the said *William Whitney* to the provisions of the Act of Congress of the 24th of April, 1820, entitled "An act making further provision for the sale of the public lands," for *the South East Quarter of Section five, in Township thirty three North, of Range twenty four West, in the South of said Township, in said West Des Moines, Iowa, containing one hundred and sixty Acres*

according to the Official Plat of the Survey of the said Lands, returned to the **GENERAL LAND OFFICE** by the Surveyor General, which said Tract has been purchased by the said *William Whitney*

Now know ye, That the **UNITED STATES OF AMERICA**, in consideration of the payment, and in conformity with the several Acts of Congress, in such case made and provided, **DOES GIVE AND GRANT**, and by these presents **DOES GIVE AND GRANT**, unto the said *William Whitney*, his heirs, assigns, and assigns forever, **TO HAVE AND TO HOLD** the same, together with all the rights, privileges, immunities and appurtenances of whatever nature thereunto belonging, unto the said *William Whitney*, his heirs, assigns, and assigns forever.

In testimony whereof, *Franklin Pierce* **PRESIDENT OF THE UNITED STATES OF AMERICA**, have caused these letters to be made Patent, and the Seal of the **GENERAL LAND OFFICE** to be hereunto affixed.

GIVEN under my hand, at the CITY OF WASHINGTON, the *first* day of *May*, in the year of our Lord one thousand eight hundred and *eighty four* and of the Independence of the United States the *thirty sixth* year.

BY THE PRESIDENT: *Franklin Pierce*

By *William Whitney* *deputy*
Whitney Recorder of the General Land Office

RECORDED, Vol. 12 Page 323.

"Iowa Agricultural College"
was given life by the Iowa legis-
lature 75 years ago—in 1858. Three
years earlier President Franklin Pierce had
signed the land grant which gave and granted,
to one William Whitney of Ohio, the quarter section
later to become the college's campus—the land
surrounding the knoll on which the Union
stands.... From that unpretentious birth
has grown the Iowa State College
of 1933, a monument to the
ambition and energy and
humane intelligence
of Iowa and
Iowans.

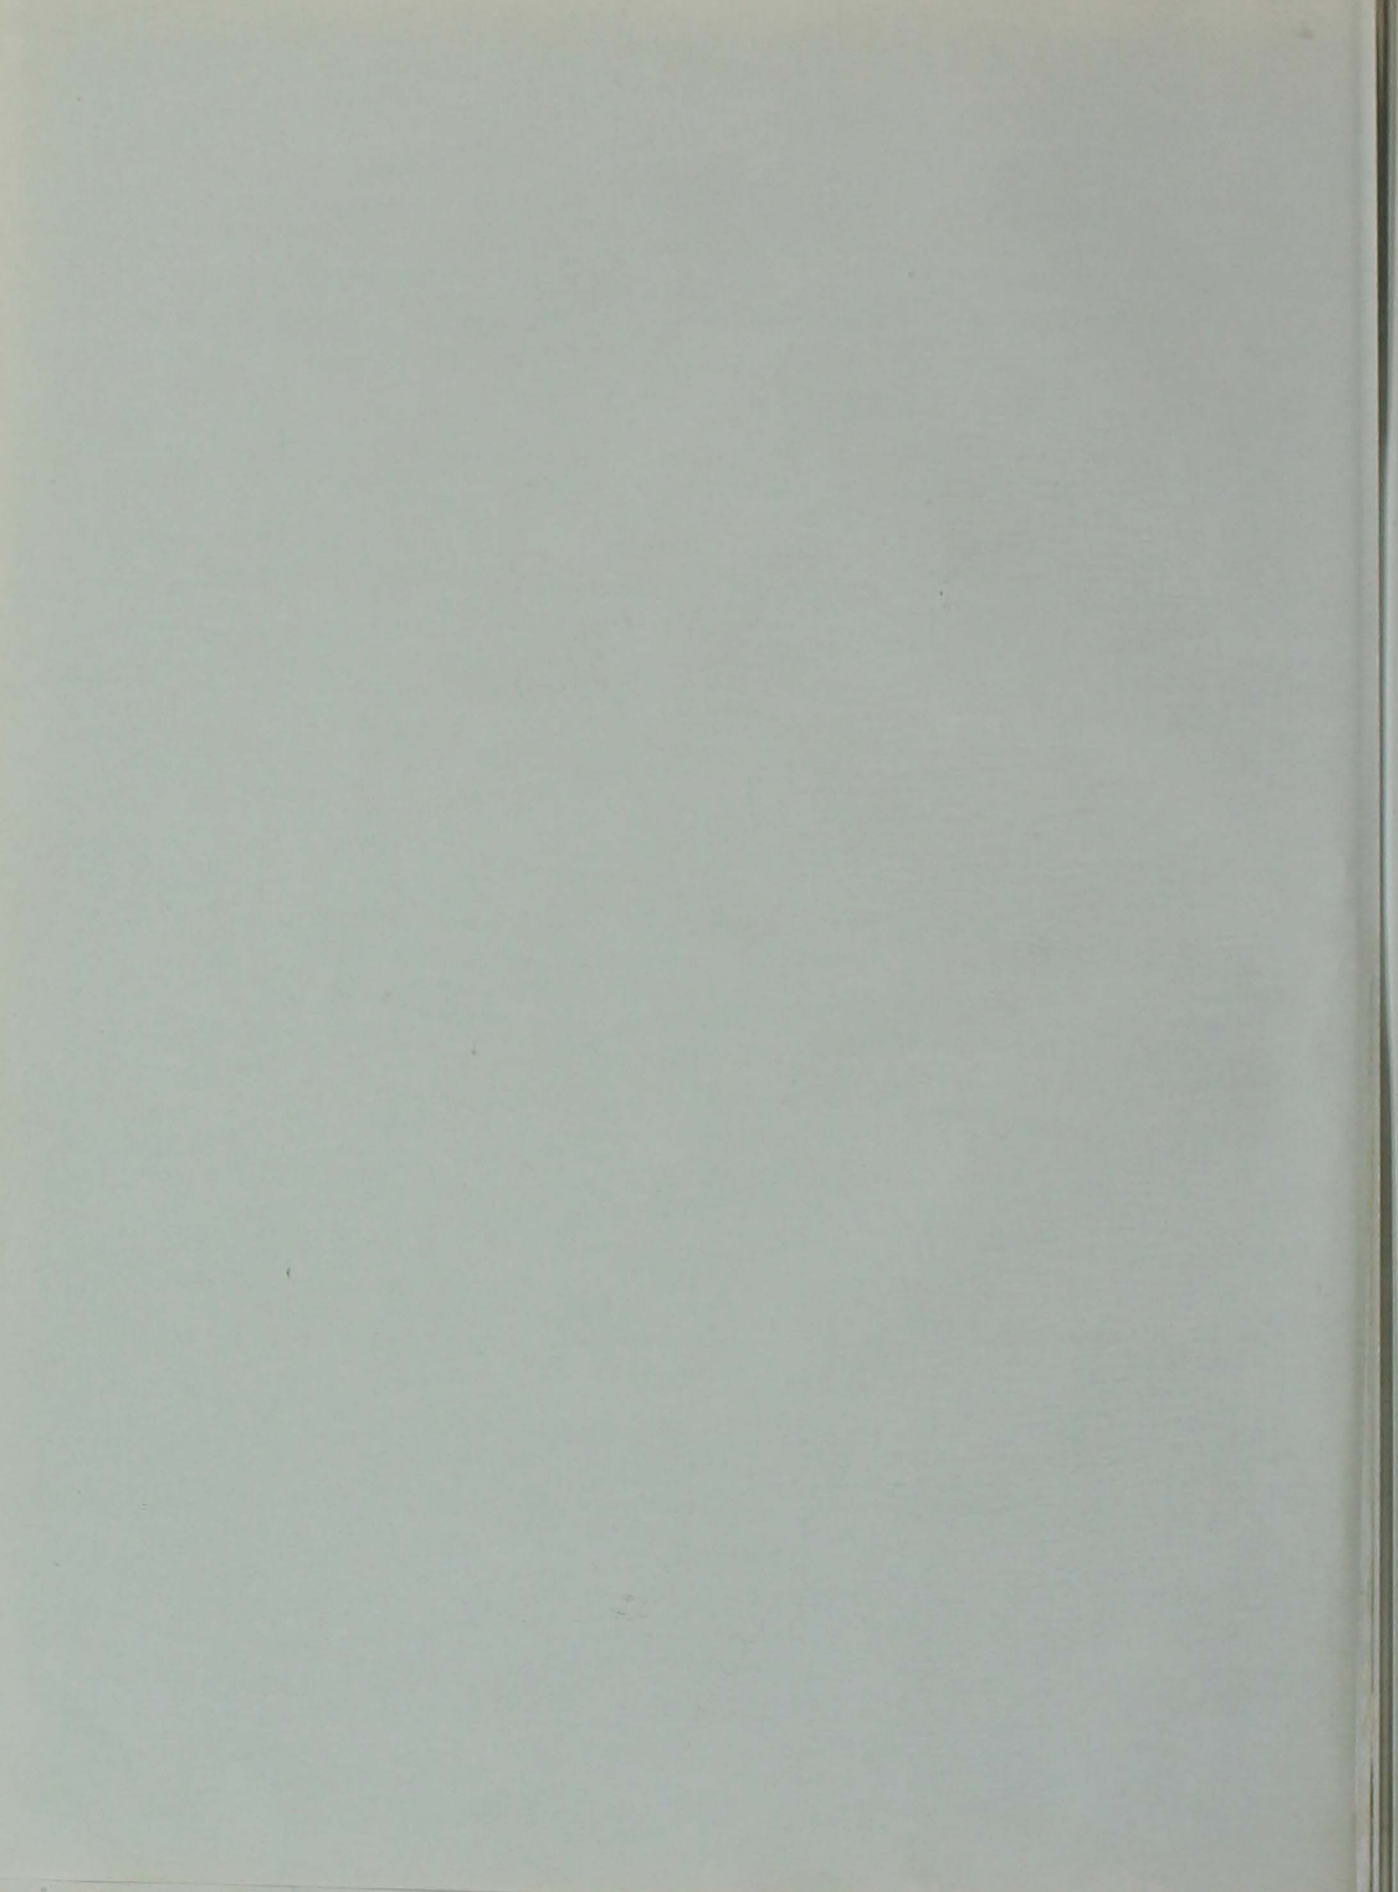

FOREWORD

For more than a long lifetime Iowa State College has been sending its men and women into the business of human service. For more than half a lifetime the Bomb has been reflecting for those men and women the highlights of their four years in college—highlights that are bright memories of the days when girls and boys and blue books and instructors were the chiefest worries in life

It is our hope that this Bomb may help to keep the 1933 highlights shining.

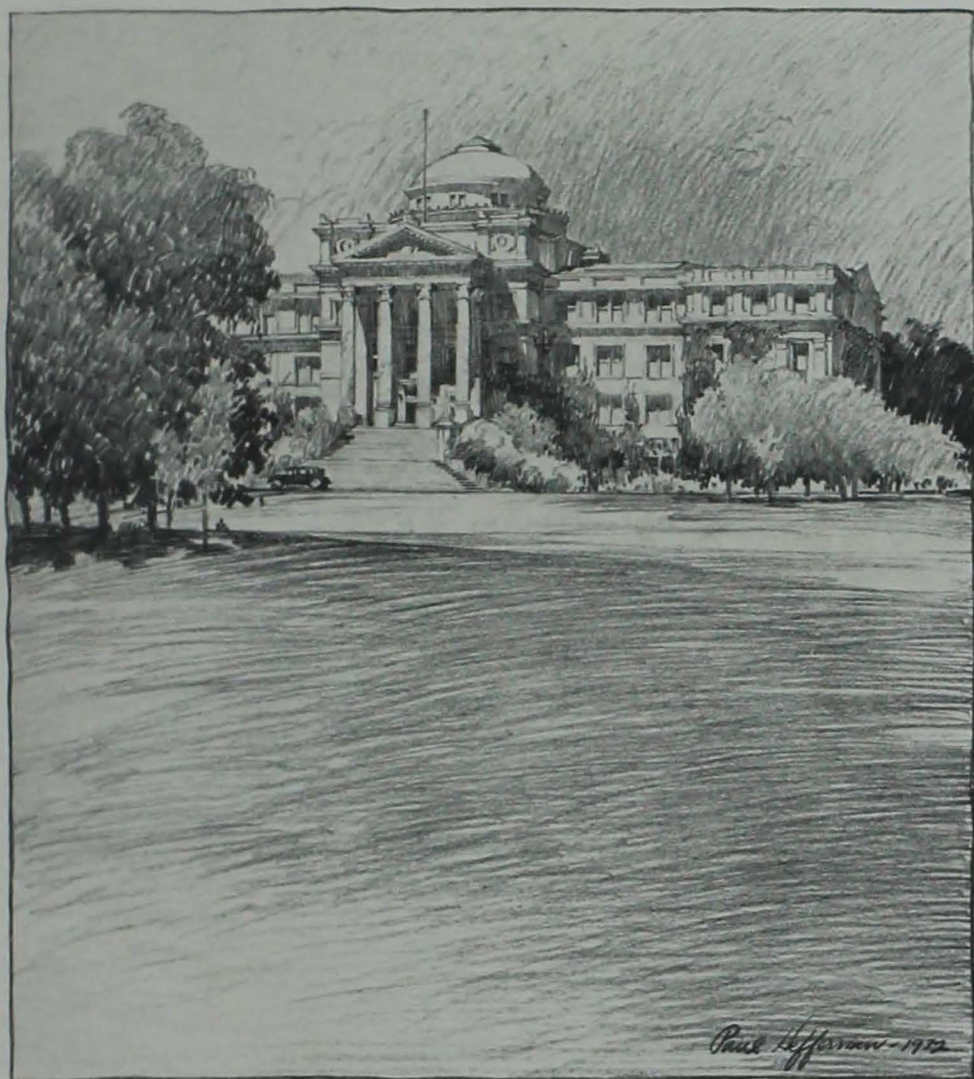

THE FRONT ROW

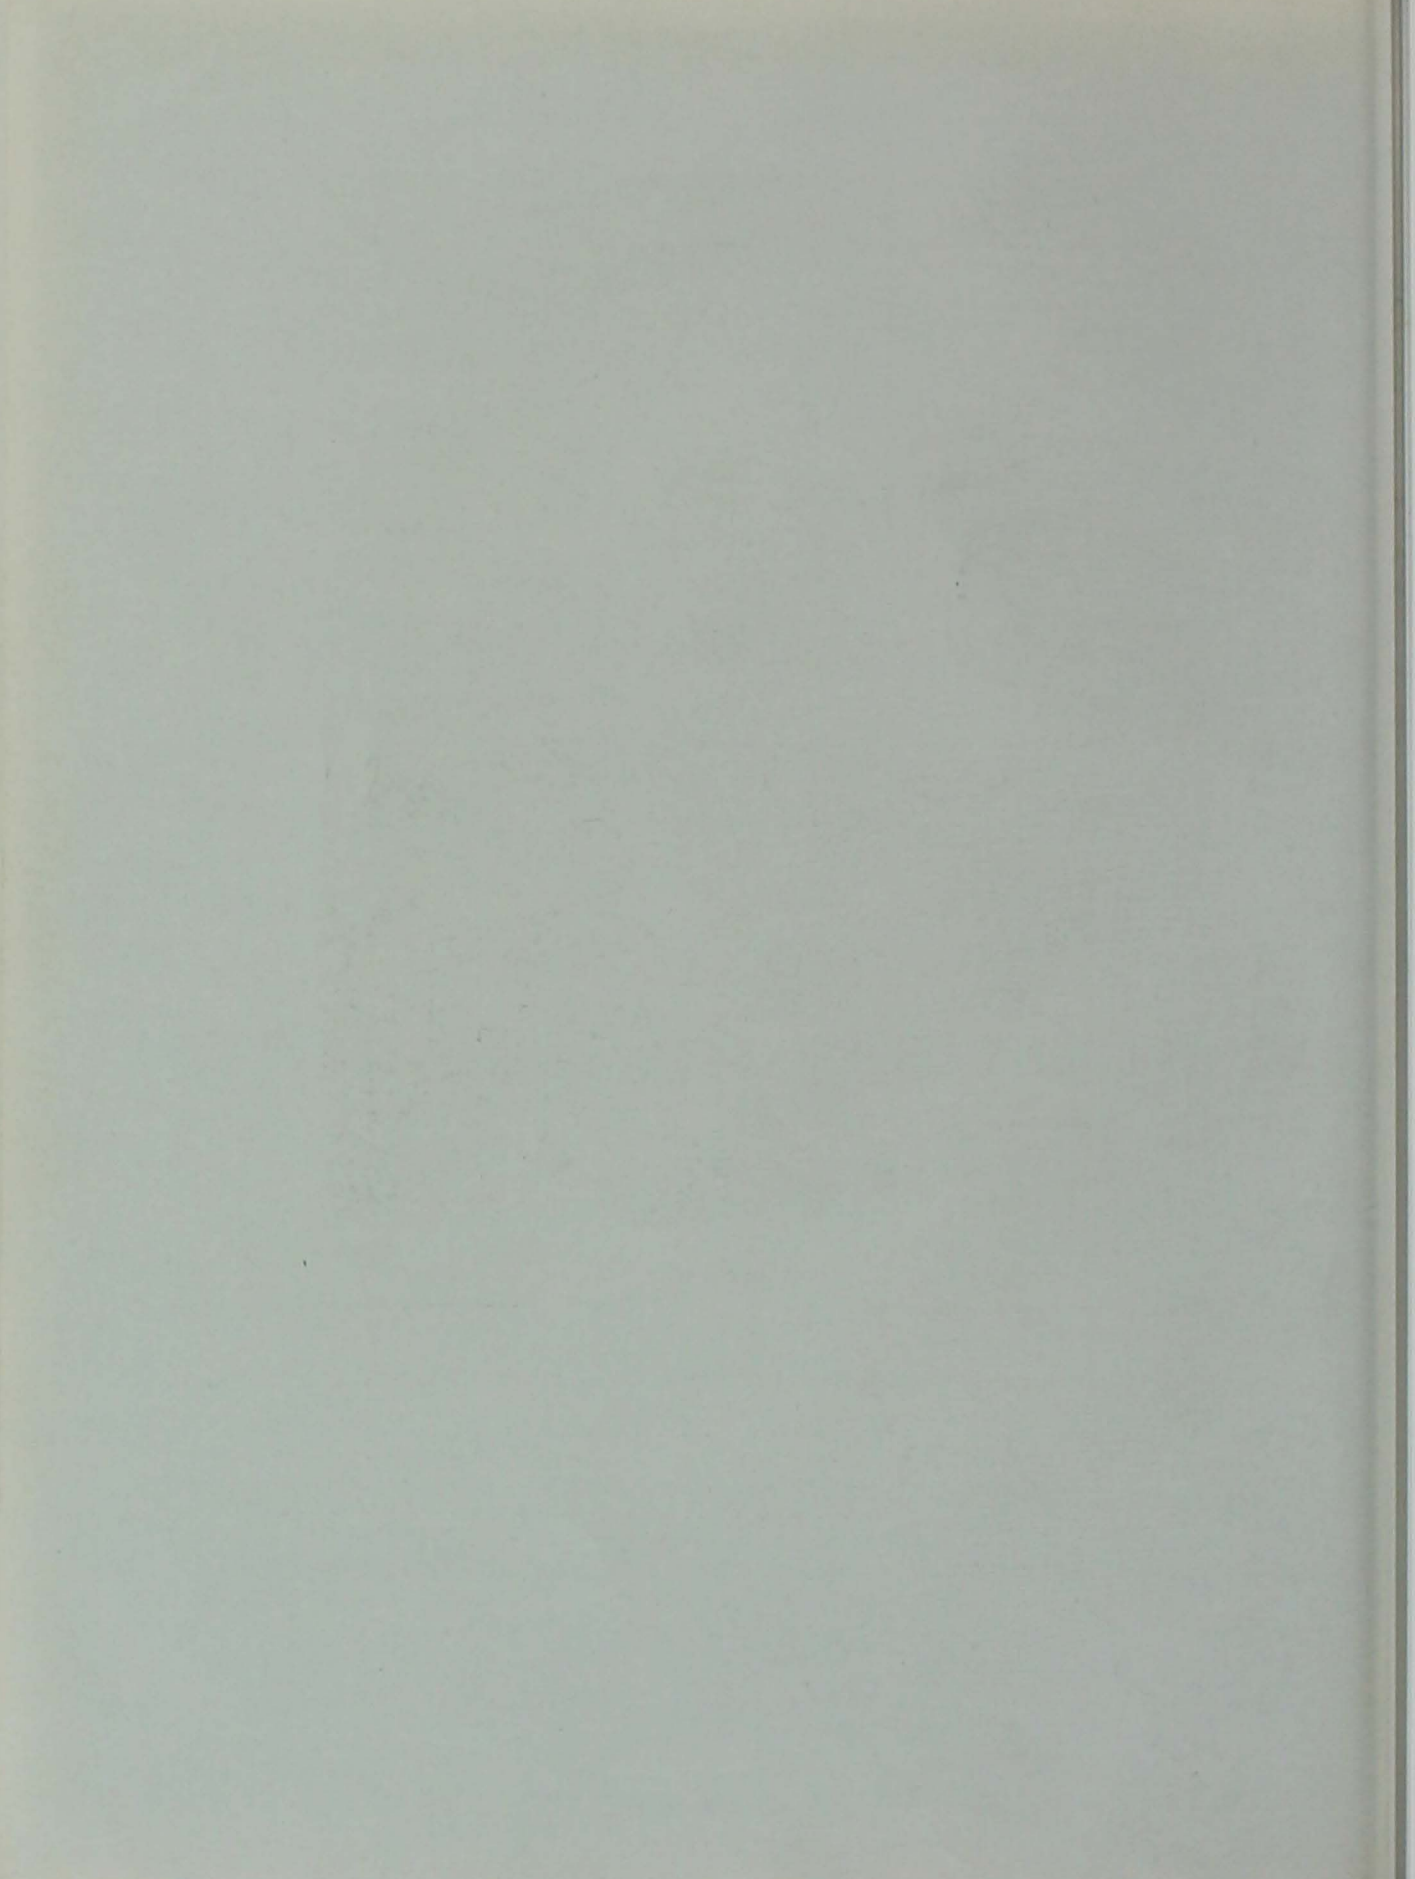

An unforgettable little lady who early in the freshman's career stands out as an identity among hordes of new acquaintances; one whose sincerity and understanding and singleness of purpose have won her the admiration and respect of both faculty and student body . . . that is GRACE HOOVER

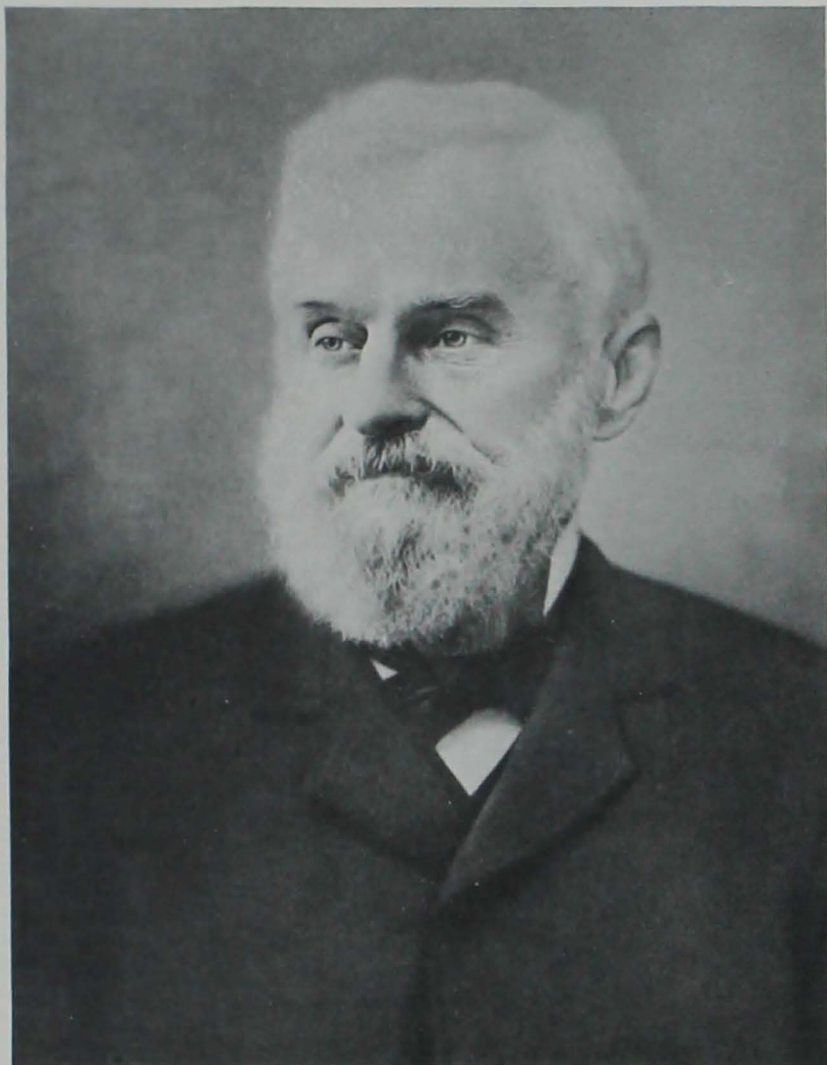

Moustaches and derbies bangs,
 ruffles and wasp waists hooded,
 dormer windows cupolas and the flag
 tower bicycling eating, sleeping, study-
 ing and going to classes under one roof dim, dark
 library making fudge over the gas jet OLD MAIN

 on the front steps before a 1 o'clock Green Gander
 salesmen lilac trees in bloom the view across
 central campus toward Ag. . . . between-class congregations
 in the halls grade slips Prexy's office excuses
 conferences with the junior dean CENTRAL BUILDING

◆◆ "Give us rather in unstinted measure that genuine culture that prepares the student to harmonize with and help the toiling multitude." This was the ideal expressed in the inaugural address of Hon. A. S. Welch, first president of the college, at the opening of the Iowa Agricultural College, March 17, 1869.

◆ Through 75 years to the present, one of the underlying ideas of the college has been that it be organized and conducted so as to dignify and give to manual labor the respectability and credit which is commonly accorded labor of professional classes.

◆◆ To President Raymond M. Hughes it has been given to initiate the policies which determine the efficiency of the organization and the success of the enterprise. His resignation as President of Miami University at Oxford, Ohio, in 1927 brought to the presidency of Iowa State a man whose wealth of experience and fineness of character have ideally fitted him to guide the destinies of others—a man who unselfishly considers not the possibility of further personal advancement but rather the opportunity of assisting others in the realization of their ambitions—a man who radiates an approachable, kindly personality which is absorbed and reflected by those with whom he comes in contact.

HERMAN KNAPP
Business Manager

♦ The name Knapp is one with which the history and development of Iowa State College are inextricably associated. A long career of dependable, meritorious service, like that of his father has made his face a loved one and his name an enduring one. Through half a century of official contact with his Alma Mater he has combined a jovial spirit with an administrative ability of no mean merit.

MARIA M. ROBERTS
Dean of Junior College

♦ For a Dean of Junior College who toils unceasingly for the welfare of our scholastic careers we hold deep respect tempered with a genuine esteem. Here is one who qualifies as a friend indeed—for she knows all about us and loves us still. More than 40 years of continuous service is Dean Roberts' enviable record.

M. D. HELSNER
*Assistant to the President
and Director of Personnel*

♦ The administration picked this man right up out of the Animal Husbandry Department and made him director of personnel and assistant to the President. He is an ardent admirer of character in all men and is himself a living example of it. To know him is to like him. To have him for a friend is a privilege.

FRANCES A. SIMS
Director of Personnel for Women

♦ Miss Frances Sims is one of the most charming guests on the campus. She is equally charming in the personnel office, where she has the difficult and interesting job of being each girl's friend and advisor. It is Miss Sims' hope that each girl at Iowa State may have the advantage of all her talents, through proper coordination of work and activities.

J. R. SAGE
Registrar

◆ Few men couple true ability with an unobtrusive performance as does Registrar J. R. Sage. By nature a quiet man, he unobtrusively fills each day with hours of work somewhere behind the scenes in the office with the big clock in Central Building. It's thanks to Mr. Sage that we get those all-important grade slips each quarter.

NELSON P. HORN
Chaplain

◆ Besides teaching classes in religious education and philosophy, Dr. Nelson P. Horn now has the pleasure and duty of attending meetings, conventions and banquets as our college chaplain. His quiet, friendly manner earns the respect and invites the confidence of all who know him. Dr. Horn is one of those people who understand students and their views of life.

MADGE I. McGLADE
Director of Housing

◆ Our genial director of housing came to the Office of Women's Affairs in 1930 with a "wisdom born of experience." A kind and sympathetic nature has often aided her in quickly sensing and satisfactorily adjusting many of the problems which beset our daily existence. May her success continue in the performance of her duties and in the forming of those friendships which have been a glory and reward.

IZA W. MERCHANT
Director of Social Life

◆ Charming Mrs. Iza W. Merchant, director of social life, majors in friendliness. A youthful, magnetic personality with but one objective—that college life for every man and woman at Iowa State may be wholesomely attractive. Student life has wholeheartedly accepted delightful Mrs. Merchant with her vital program and pays tribute to her ever increasing accomplishments.

GRADUATE COLLEGE

R. E. BUCHANAN
Dean of Graduate College

◆◆ **B**ACK in 1872 one lone candidate for an advanced degree formed the entire student body in the newly-organized Graduate College.

Last year more than a thousand students seeking masters' and doctors' degrees were registered in this highest division of Iowa's institution for higher technical education.

For many years the graduate work of the college was administered by a committee on graduate work. But as the enrollment grew, higher degrees

became more and more attractive. Finally the difficulties of administration increased to such an extent that the administration of all graduate work was placed in a separate division to be known as the Graduate College (so the catalog of 1913 states), presided over by a dean.

The largest number of degrees was given just before the war—in 1917—but during the war the attendance was cut about 40 percent.

Although it has been only in the last two decades that graduate students have enrolled in considerable numbers, Iowa State College ranks thirteenth in the list of universities in the number of degrees of Doctor of Philosophy conferred in the sciences and technical subjects.

One of the research labs where graduate students spend most of their time

A G R I C U L T U R E

R. M. HUGHES
Acting Dean

◆◆ THE president of the College—A. S. Welch—who lectured on landscape gardening, and Dr. Norton S. Townsend, professor of agriculture and horticulture, comprised the entire agricultural faculty when the College was formally opened in 1869.

Now over 60 members of the agricultural instructional staff are necessary to take care of the largest agricultural enrollment of any institution in the United States.

There were many handicaps to impede the early agricultural work—meager equipment, limited fields of pursuit, and a period of administrative

instability in which a definite administrative policy was decidedly lacking. But in 1891, with the coming of Wm. M. Beardshear as president of the College and James Wilson as professor of agriculture (Wilson was later to become Secretary of Agriculture in McKinley's cabinet), a new era dawned for agriculture and for the entire institution.

Enrollment in the College passed the 1,000 mark; more liberal state appropriations for buildings and support were obtained; various important buildings were erected and equipment purchased. And the name of the institution, in 1898, was officially changed to the Iowa State College of Agriculture and Mechanic Arts.

Today Iowa State's fame as an agricultural institution has grown to be world-wide. This is demonstrated by the fact that of the 59 students coming from 31 different countries to Iowa State College last year, 23 enrolled in agriculture.

The Ag faculty turns out in full force

ENGINEERING

♦♦♦ **T**wo instructors, a meager workshop, and less than a score of students enrolled in one small Department of Mechanical Arts were everything necessary to found an engineering school that later grew into the largest west of the Mississippi. Now the Engineering Division boasts of over 100 instructors and trained investigators, 11 engineering buildings of the finest type, and over 1,000 students of collegiate grade!

It is interesting to note in the history of this division that financial flurries have periodically caused a decrease in enrollment, and that panics and low peaks have been followed by rises.

Strangely enough, however, it took the fall of 1918 to prove the popularity of engineering on the campus. That fall the Student Army Training Corps was established in connection with the engineering school. And it was then that a great influx of freshman engineering students—over a thousand strong—came to Iowa State College. All of them were too young to enlist direct, but all were confident that training in the Student Army Training Corps would lead directly and speedily to their participation in the World War.

The 15 years since that fall have shown a remarkable increase in the number of engineering graduates. Of the total number of graduates from this division, 92 percent have been graduated in the last 25 years.

For those who cannot come to the College for acquiring industrial trade information the Engineering Extension Department was organized. Now short courses for plumbers, metermen, firemen, janitors, telephone operators, bakers, painters, dyers and cleaners are held throughout the year.

T. R. Agg
Dean of Engineering

More than 100 men comprise the engineering faculty

HOME ECONOMICS

GENEVIEVE FISHER
Dean of Home Economics

♦♦ **F**ITTINGLY, Mrs. Mary B. Welch, wife of Iowa Agricultural College's first president, was the "mother" of home economics instruction on the campus. When the college opened in 1868 she offered to women students 3 hours of work a week in practical homemaking, and so the college became the first institution of its rank in the country to give instruction in home economics.

A kitchen in the basement of Old Main—said to be the first of its kind in any college—was Mrs. Welch's first "laboratory." The weekly work of a home economics student (and in 1868

that meant all women students) was divided into three sections—practice in the kitchen, the dining room and the laundry.

From this homely beginning has developed Iowa State's highly modern Home Economics Division, with its laboratories, classrooms and facilities that Mrs. Welch can hardly have imagined. Gradually it has been built up. The course in institution cookery, for instance, may be traced back to 1877, when cooking classes prepared and served meals for one table in the main college dining room. A home management house (now there are four, and don't call them practice cottages!), added in 1916, was one of the first of its kind in the United States.

And the Division has awarded 2,503 bachelor's degrees, 266 master's, and three doctor's. Early in 1933 hundreds of holders of these degrees were called upon by Dean Genevieve Fisher to aid in the important emergency relief work of planning dietaries for families receiving relief.

Authorities in the field of home economics

INDUSTRIAL SCIENCE

♦♦ I DEDICATE these halls to the progress of industrial science," said President A. S. Welch in his inaugural address on March 17, 1869. He went on to suggest that the name "Industrial College" might well be applied to the fledgling institution.

From that time to this the Industrial Science Division has been the parent trunk from which have emerged the other branches of the College. The fundamental major sciences of the Division—bacteriology and hygiene, botany, chemistry, economics, geology, mathematics, military science and tactics, physics and zoology—have appeared in every catalog and biennial report from the beginning of the College.

Strangely enough, the course in bacteriology, first taught at Iowa State College in 1888, was the first regular course of its kind given in any institution in the United States, including medical schools!

The Botany Department, too, did its bit of pioneering. It was the first in the country to use the compound microscope in the study of plants and the first to conduct regular laboratory instruction.

Athletics today receive much consideration from the entire College, but not so always. For 20 years organized athletics received no financial assistance and very little encouragement from the College. The department moved from the basement of Morrill Hall to a temporary training shed near the water tower, later to the third floor of the Engineering Annex and finally to the new gymnasium.

C. E. FRILEY
Dean of Industrial Science

These people teach industrial scientists—and others as well

VETERINARY MEDICINE

C. H. STANGE
Dean of Veterinary Medicine

♦♦ It took only 2 years to make a veterinary surgeon when, in 1879, the "School of Veterinary Science" was established as a part of Iowa Agricultural College. Eight years later the course grew to 3 years; in 1903 it took rank with other phases of college work by demanding 4 years.

And in 1931 it grew another step. One year of pre-veterinary work of collegiate rank was required at that time, so that now a would-be veterinarian must go to college for 5 years.

The first veterinary hospital—where students as well as horses sought pills—was an old frame build-

ing on the site where Memorial Union now stands. Since that time the Division has changed homes five times.

The first was the original home of President Welch (South Hall); the second was North Hall; the third later became the student hospital and finally Music Hall; the fourth was Old Agricultural Hall; and fifth, the present Veterinary Quadrangle.

During its history, there have been but three veterinary deans at Iowa State. Dr. Millikan Stalker was the first dean, serving from 1880 to 1890. In 1909 the present dean—C. H. Stange—came.

It was during his deanship that the highest point in enrollment was reached. In 1930-31, 234 students set the high mark.

Although Iowa State's Veterinary Division has attained world-wide fame, it is interesting to note that of the 697 veterinary alumni, 331 of these are located in Iowa.

Familiar faces over in the Vet Quadrangle classrooms

AGRICULTURAL EXTENSION

♦♦ **S**EED corn trains, demonstration plots, short courses and lectures conducted all over Iowa were early made a part of the supplementary work of the College.

This type of extension work had no precedent. In fact, according to records, "President Welch organized and conducted the first farmers' institutes in the United States."

Mrs. Welch, wife of the first president, sympathized with her husband's interest in educational work of this nature, but believed it should be extended to include women, too. In a report made in 1883 she calls attention to a series of lectures on domestic science given in Des Moines to a class of 60 women.

By 1912 the demand for extension work had grown to such proportions that it was impossible to care for it efficiently through the College. Accordingly, a representative of the College was permanently placed in each county—thus the plan of county agents began.

During the war, the Agricultural Extension Department played a big part in stimulating food production. United States government statistics show that during these 2 years Iowa produced more foodstuffs than in any other 2 years in her history and more than any other state.

Today the service of the Agricultural Extension Department to the state may be measured in terms of better farming methods used throughout the state, the greater interest in better homes, interest in educational radio talks, demonstrations, or lectures and the response to the bulletin service sponsored by this department.

R. K. BLISS
Director of Agricultural Extension

The folks whom the farmers and homemakers of Iowa know best

HYGIENE DEPARTMENT

DR. J. F. EDWARDS
Head and Professor of Hygiene

◆◆ IN THE early years of the College a student with "wheezles and sneezles" sought the only doctor on the campus—a teacher of bacteriology in the Veterinary Division—for his pills.

Now the student goes to our modern, well-equipped College Hospital—rated among the first four or five institutions doing health work. Instead of the part-time physician, who spent only the minor part of his time doling out "cures," there are now five physicians, six regular nurses, a dietitian, a pharmacist, a chemistry and bacteriology laboratory technician, and

an X-ray and physical therapy technician devoting their full time to *prevent* students from having "wheezles and sneezles."

Prevention is the keynote to the work of our present College Hospital staff. By teaching students how to take care of themselves, by requiring yearly physical examinations, and by stemming illness in the early stages, the hospital has eliminated the necessity of cure treatments.

The success of its work is measured, not in the number of patients treated each year, but in the number of might-have-been patients eliminated. This year there are scarcely one-third the patients there were 12 years ago!

Students, as a matter of fact, have been improving the condition of their health since physical examinations have been required each of their 4 years here. Formerly many out-going seniors were unable to fill positions because of ill health. Last year not a senior failed to take a position because of a low grade in health.

The students' protection against class cuts

◆◆ THE library today has little in common with the small collection of books tucked away in a college building and practically unused by the students of 50 or even 25 years ago.

In 1876 the salary of the two librarians, both students, was increased from 7 to 9 cents an hour. But at that munificent rate they were required while on duty "to give their whole attention to the duties of their office."

Two years later the demonstrator in botany and zoology became librarian at a salary of \$200 a year. Apparently the duties were too arduous or the salary too low, for in 1879 he was succeeded by the professor of physics.

At one time the collection of books was housed in Morrill Hall in connection with the museum—a location quite consistent with the usual conception of college libraries in the 19th century.

The first appropriation for the purchase of books was made by the Board of Trustees in 1869, but the amount appropriated, \$2,500, was not expended at once "because the President could not leave Ames for the purpose of buying books."

Now in a year the additions to the library are 10,000 volumes. The collection has increased in the last 10 years from 90,000 to over 200,000 volumes.

The use of the library has increased 500 percent since the new building was opened. In 1921-22 the number of books lent for home use was 22,000. In 1931-32 the number lent was 113,636.

ALUMNI ASSOCIATION

HAROLD E. PRIDE
Alumni Secretary

♦♦ STUDENT loan funds, the lake and much of the present scheme of campus planting, several works of art, Alumni Hall and Memorial Union are but tangible expressions of a deep and abiding alumni interest in the welfare of "our College."

Iowa State alumni organized an active alumni association within 5 years of the graduation of the first class. From modest beginnings alumni efforts in support of the highest interests of the College have grown and multiplied until their manifestations are numerous.

Last June alumni incorporated their association with provisions for an Alumni Fund, through which every alumnus has an opportunity to share in the responsibilities and the satisfactions of the College. About three-fourths of all Iowa State men and women have permanently identified themselves with the College through life membership in Memorial Union, largest of the alumni organizations.

Our Union—at its best

LEADERS WHOSE GOAL
HAS BEEN SERVICE
TO IOWA STATE

CARDINAL GUILD

♦♦ **C**ARDINAL GUILD, official student governing body, has been in the limelight the past two years chiefly as sponsor of the new inter-ward system. Another important activity of the Guild is the maintenance of a booking service through which organizations may hire dance orchestras for the various social functions.

The annual fall Homecoming Barbecue is also sponsored by Cardinal Guild. Among other projects, the Guild annually provides numeral sweaters, divisional and intramural athletic awards, band uniforms and equipment, supervises the sale of "prep" caps and manages the all-college elections.

This year the Guild has been active in revising the proposed blanket tax.

W. S. G. A.

◆◆ THE Women's Self-Government Association, in cooperation with the Ames branch of the American Association of University Women, annually offers a scholarship to a foreign student. Ruth Stjerner, a Swedish girl, holds this year's scholarship.

W. S. G. A. regulates women's campus activities by means of a point system, so that no woman participates in too many activities or holds a large number of offices. The association is responsible for equipping the Women's Lounge in Memorial Union, and for promoting the Campus Sister Movement.

C A R D I N A L K E Y

♦♦ **I**N ONE of the most colorful ceremonies of the year Cardinal Key, honorary for senior men, taps its pledges each spring directly after the May Fete held during Veishea. The crowd gathers at the foot of the Campanile and the active members in their cardinal robes go through the crowd, revealing by a hearty slap on the back, the men whom they have chosen.

The organization recognizes 12 men each year—six seniors and six juniors—for the qualities of character, leadership, scholarship and service to Iowa State. The six seniors tapped complete the representation from the graduating class; the six juniors carry on the organization for the next year.

♦♦ **M**ORTAR BOARD, senior honorary, chooses its members every spring from women in the junior class who have proved themselves leaders in campus activities and in scholarship. New members are pledged during Veishea, after the May Fete.

This year the organization promoted a program of vocational guidance among its members, and carried the project further by preparing for the Iowa Homemaker a series of articles on vocations and alumnae in interesting vocations.

AGRICULTURAL COUNCIL

♦♦ THE Agricultural Council started its fall activities with drives for membership in the Agriculture Club. It sent a representative from the club to the student section of the American Country Life Association meetings held in Wheeling, W. Va., last fall.

The council had charge of awarding 34 medals to members of judging teams representing various agricultural departments—animal husbandry, farm crops and dairy—in intercollegiate competition.

Two dances are yearly sponsored by the Agricultural Council. One is the Ag Carnival in the fall, and the other the Ag Ball, in the spring.

ENGINEERING COUNCIL

♦♦ THE Engineering Council this year staged a sales campaign for the Iowa Engineer and financed the handling of personnel leaflets. Early in the fall it sponsored an engineering convocation for old and new students.

The Council promotes three big social events. The first, the Engineers' Carnival, was held last fall. During winter quarter its formal ball was held, at which St. Patrick and the Engineers' Lady were announced and the Knights of St. Patrick were dubbed. In the spring of each year the Council sponsors a faculty-student banquet for members of the Engineering Division.

HOME ECONOMICS COUNCIL

♦♦ THE Home Economics Council, governing body of the Home Economics Club, has sponsored a number of the convocations which were weekly functions in the Division of Home Economics this year. On these occasions, students joined discussion groups according to their major interests. Separate meetings of majors in applied art, foods and nutrition, textiles and clothing, child care and training, household equipment and vocational education were held, with a student leader conducting the program for each group.

Supervision of the baking and selling of cherry pies, a traditional custom of Home Economics Open House during Veishea, is an important annual activity of the Home Economics Council. The organization annually contributes several hundred dollars to the Catherine MacKay Loan Fund.

INDUSTRIAL SCIENCE COUNCIL

♦♦ THE Industrial Science Council was instrumental this year in the reorganization of the general science course on a more efficient basis. The Council also inaugurated monthly convocations for students in the Industrial Science Division, at which attendance is required of all junior college students. Personnel leaflets for industrial science students were adopted by the action of this official governing group.

The Council established the popularity of the free tag dance at Iowa State when it promoted such an affair in connection with the pep meeting before the Drake-Ames football game in the fall.

For the third year, the Industrial Science Council has been responsible for the popular "Ax-Grinders' Ball," the only all-college costume party held on the campus.

MEMORIAL UNION COUNCIL

♦♦ THE Memorial Union Student Council is responsible for approving budgets for all-college dances held in Great Hall. It is also responsible for directing student council parties, and has this year inaugurated two new types of dances, the "Howdy Tag" and the "Whoopee" party.

The biggest project of the Council was the Memorial Union drive for new members, carried on last fall. Two hundred life members were pledged during the campaign.

The Memorial Union Council meets twice a month in order to consider problems relating to the students' use of the Union.

VEISHEA CENTRAL COMMITTEE

◆◆SIXTEEN members of the Veishea Central Committee, 15 students and a faculty advisor, last fall undertook the complete responsibility of planning the 1933 Veishea. These committee members held the reins which guided the activities of the entire 3-day exposition, from Nite Show to divisional open houses. Each member of the committee directed a large number of subordinates in the particular work assigned him.

One of the earliest jobs of the Veishea Central Committee this year was to underwrite the celebration by selling 1,800 coupon books containing tickets to various Veishea programs.

In planning for the open houses, the diamond jubilee theme was carried out to commemorate the 75th birthday of the college.

INTERWARD EXECUTIVE COUNCIL

◆◆ THE Interward system has attained a thoroughness of organization this year which was not possible during the first year of its existence. Approximately 500 men are now active members. Instead of blanketing all men who live in wards regardless of their interest in the system, as was done last year, the wards now include only those men who take part in ward activities—about 50 percent of those eligible.

Interward members have taken active part in intramural athletics this year, with organized teams entered in all sports in which fraternity teams participated.

Social activities have not been neglected by the Interward Council, for a number of dinners and firesides were held. Exchanges with women's dormitories and with the Town Girls' Club were popular.

RESERVE OFFICERS' TRAINING CORPS

LIEUT. COL. PHILLIP W. BOOKER

◆◆ THE R. O. T. C. 2-year course was made compulsory for land grant colleges when Morrill wrote his law, and ever since non-militarists have been trying to find loopholes by which they may escape the training, or physical defects which will make them unfit for service.

Advance course students sign voluntarily, and graduation therefrom entitles the student to a second lieutenant's commission in the Organized Reserve Corps.

Mechanical and civil engineers are taught the rudiments of army engineering, and all other students are enrolled in the artillery unit.

Instructors are regular army officers, detached from their regular units. The high point of the military year is the spring parade and inspection, when cadets turn out in their finest polish for the corps area inspection.

Lieut. Foreman Lieut. Andrews Lieut. Lewis
Lieut. Pyle Maj. Juzek Lieut. Col. Booker Maj. Wightman Capt. Hill

CADET OFFICERS' ASSOCIATION

OFFICERS

WALTER GOEPPINGER.....*President*
BOYD HUBBARD.....*Vice-President*
GEORGE KIMBALL.....*Secretary-Treasurer*

WALTER GOEPPINGER

♦♦ THE chief function of the Cadet Officers' Association is the production each year of the Military Circus. The circus this year included a grand parade, a review of all activities of the military department, competitive riding contests for both men and women, and the usual exhibition by the College Cossacks.

Membership in the Association is open to those students who are taking advanced military.

Members of the Cadet Officers' Association

Goeppinger Grefe Mortensen Evans Graves Oldenburg

BUGLE, FIFE AND DRUM CORPS

◆◆ **T**HE Bugle, Fife and Drum Corps has two primary purposes. It is attached to the military department to furnish rhythm for marching cadets and together with the band inspires pep at basketball games.

For students it also offers a chance to get out of regular military classes, if the musical urge is stronger than the militaristic.

The Corps

McGowan Getty Hahn Butterworth
Legner Chambers Thayer Holland Curtis Novak

RIFLE AND PISTOL TEAMS

◆◆ THE rifle team and the pistol team are composed of students selected from the R. O. T. C. units. Both teams fire telegraphic matches with R. O. T. C. teams of other schools. The outstanding match fired by the pistol team is the National Field Artillery R. O. T. C. match, late in the spring. The important rifle matches are the Seventh Corps Area Match, the Society of American Military Engineers' Match, and the Hearst Trophy Match. Lieut. Arthur M. Andrews coaches the rifle team and Lieut. Francis M. Day coaches the pistol team.

Jensen Buford Getty Nan Hooker Butterworth
Curtis Koerner Lieut. Day Jordan Baker

SCABBARD AND BLADE

◆◆ **S** CABBARD AND BLADE sponsors each spring one of the most colorful dances of the year, the Military Ball. During intermission advanced military students who have been elected to membership are pledged.

The fraternity also assists the Cadet Officers' Association in producing the Military Circus.

WOMEN'S MILITARY

1894

♦♦ **L**ong before physical education and exercise were the mode for young college women, coeds at Iowa State College drilled in regular military fashion if they so wished. The Ladies' Company was first organized in 1894, when Gen. James Rush Lincoln came to the college as steward and professor of military tactics.

General Lincoln, himself, trained the young ladies on the green lawn which would now be between Central Building and Agricultural Hall, on warm summer evenings after the dinner hour. Drill was held two evenings each week, and on one afternoon of the week this distinguished company appeared on dress parade with the four companies of men.

Members of the company wrote competitive examinations for their rank and the officers received commissions from the governor of the state, who not infrequently attended the regular dress parades on the campus.

Spears took the place of the rifles ordinarily used by the men enrolled in military training. Only officers carried the mighty swords shown in the picture. The visors on the caps also distinguished officers. Other members wore plain, rimless caps which were dubbed "stiff collar boxes."

White cotton gloves and wide belts gave the military air to the blue serge dresses that all but caught in the prairie grass of the drill ground as the young "soldier-ettes" stiffly obeyed the commands of their general.

IOWA STATE STUDENT

♦♦**T**HE Iowa State Student, the tri-weekly reporter of Iowa State doings, is especially proud this year that it scored a scoop on the news of re-established athletic relations with the University of Iowa.

A feature of the paper is the regular Bally Rot column, conducted by Count Fairweather Horseneck, who frequently runs counter to the more serious editorial platform of the Student.

The Student is another exemplification of the "Science with Practice" motto of the college. Most journalism students try their talents as student reporters, though anyone who wishes may work on the paper.

At the end of winter quarter a new editor and business manager are chosen by the Student Publication Board, and assume office spring quarter.

The Student is strictly a college paper. City and national news find no space in its columns.

♦♦ THE Ames Forester shares with the Bomb the distinction of being one of the two annual publications on the campus. It is issued near the end of the school year and contains accounts of the foresters' activities during the collegiate year as well as recent technical developments in the field of forestry.

It is the only regular departmental publication, all others being divisional journals. Its circulation is practically limited to foresters, since it is restricted to their learning, while divisional magazines cover the entire field.

Among these 500 subscribers are many of the alumni of Iowa State, government foresters of other schools, forestry schools and other agencies desiring to keep in touch with the latest news about the practice of forestry.

MEN'S GLEE CLUB

TOLBERT MACRAE

♦♦THE Men's Glee Club offered during the year entertainments ranging in character from serious to lighter types of music. These included choruses from Handel's "Messiah," sung at Christmas time in conjunction with the Girls' Glee Club; Rossini's "Stabat Mater," on Good Friday; the opera, "The Mikado," given November 11 and 12, and participation in the minstrel show which closed the Campus Varieties for winter quarter.

The annual concert and dance was held April 15 in Great Hall.

GIRLS' GLEE CLUB

♦♦ THE function of the Girls' Glee Club is to make pleasanter many pleasant occasions. Their major activity this year was a joint dance and singing recital given on April 7 with the cooperation of the Physical Education Department. Of course, no Christmas season is complete without the annual candle-light carol concert. They also contributed to an evening's entertainment at the Twilight Musicales and sang for the visitors during Farm and Home Week.

IOWA STATE PLAYERS

♦♦ The Iowa State Players offers to its members all types of stage experience from pulling the curtain to acting. It produced the three-act mystery drama, "The Bat," November 18 and 19. This is the first year that this play has been available for amateur production. Winter quarter a stage with all necessary equipment was erected in the theater workshop and free one-act plays were presented within the group itself.

T H E B A T

By RINEHART and HOPWOOD

♦♦ THE beautiful heroine shrieked, and the hero shouted, and the villain mercilessly slaughtered helpless victims, while shuddering coeds in the audience sought the protective hand clasps of their escorts when the Iowa State Players presented Mary Roberts Rinehart's and Avery Hopwood's "The Bat" November 18 and 19.

This is the first year that this well-known mystery thriller has been open to use on the amateur stage, and the Iowa State Players successfully manufactured thunder, lightning and secret panels to the satisfaction of everybody.

The story concerns the harrowing experiences of a determined and fearless spinster and her niece, who had rented for a summer's peace and quiet, the country home of a recently deceased banker. It proves to be not so quiet, however, when the notorious and mysterious killer, "The Bat," decides to take up his abode there and scatters corpses over the living room rug. Well, of course, the Bat is caught, and everyone in the audience gasps with amazement to discover his identity.

The performance was repeated during the annual Farm and Home Week.

CAMPUS VARIETIES

♦♦♦ **C**AMPUS VARIETIES programs were introduced winter quarter with the definite purpose of utilizing the Memorial Union to offer free entertainment to the depression-hit students of Iowa State. To this end the plan was successful, for Great Hall was filled to capacity every Friday night of the ten weeks.

This was a new idea, not only on this campus but on other college campuses as well. Mortar Board, honorary for senior women, originated the idea and a Mortar Board girl acted as hostess each Friday night.

The general set-up for each Friday evening of the quarter included a stage show lasting approximately an hour and a half, followed by couple dancing in Great Hall, cut dancing at the end of the main corridor, and games and bridge in the Lounge.

Talent from the campus and the city of Ames put over the stage shows, which included dance numbers, one-act plays, singing and instrumental music. Well-known collegians served as masters of ceremony for these performances.

Various organizations on or near the campus, such as the Thespian Players, Wesley Players, Y. W. C. A., and the Ames Playmakers, were responsible for the principal skits.

The series was closed by a minstrel show for which a small admission price was charged.

T H E M I K A D O

By GILBERT and SULLIVAN

♦♦ **G**ILBERT AND SULLIVAN'S "The Mikado," presented November 11 and 12 in MacKay Auditorium, was the first musical show attempted by the Iowa State glee clubs in several years. Each evening a well-filled house watched Nanki-Poo depart from his father's court to avoid marriage with Katisha and wander incognito until in the town of Titipu he met the beautiful Yum-Yum, affianced to Ko-Ko, lord high executioner. After many complications the undesirable Ko-Ko and the elderly Katisha obligingly married each other, leaving the young lovers to live happily ever after.

' 'NO, NO, NANNETTE''

By HARBACH, CAESAR and YOUMANN

◆◆ THE presentation of a well-known musical comedy, "No, No, Nannette," by campus talent marked the beginning of a new era in Veishea Nite Shows. Famous for its two hit songs, "Tea for Two" and "No, No, Nannette," this light comedy is woven from the complex situations which arise when a married man has more money than he can spend and becomes involved with "three wild women." The receipts from this production decidedly fattened the Veishea purse.

SHOW RING

HOLSTEINS . . . HAMPSHIRE
CORN, APPLES, BUTTER,
PLYMOUTH ROCKS

R. Henderson Van Wert C. Henderson Probert
Matzen Shearer (coach) Christie Powell

L I V E S T O C K J U D G I N G

♦♦ **T**HE livestock team competed at the Kansas City American Royal and at the Chicago International, winning third and fifth in the respective contests.

Henderson was eighth and Probert ninth in individual judging at Kansas City.

At Chicago, Matzen was first in beef judging.

D A I R Y C A T T L E J U D G I N G

♦♦ **C**OMPETING with 15 teams from the United States and Canada, the dairy cattle judging team won first at the National Dairy Cattle Congress in Waterloo, Iowa. Plager was high individual in judging all breeds, first in judging Holsteins and Jerseys and second in judging Guernseys.

Top row: Plager, Probert; Front row: Powell, Hansen (coach), Matzen

Top row: Briggs, Hillier; Front row: Plager, Beard (coach), Booth

M E A T J U D G I N G

♦♦**T**HE meats team won second at the Kansas City American Royal. Individually, Plager was second, Briggs was third and Booth, fifth.

At the Chicago International, the team was third. Briggs made the third best individual score and Booth was tenth.

At each contest, Briggs was awarded a silver medal for first place in sheep judging.

P O U L T R Y J U D G I N G

♦♦**T**HE poultry judging team won fourth place at the Coliseum Poultry Show in Chicago. Richard Heeren was fourth in individual judging.

Top row: Bartlett, Heeren; Front row: Boynton, Waters (coach), Simpson

Top row: Thorburn, Colgan; Front row: Weiss, Dorchester (coach), Gull

◆◆ THE farm crops team won first at the Kansas City American Royal. Weiss, Colgan and Gull were first, fifth and eighth, respectively, in individual judging.

The team was fourth at Chicago, with Weiss fourth in individual judging.

Top Row: Meehem, Oleson, Greethurst; Below: Williams

◆◆ THE dairy products team judged at the Dairy Industries Exposition in Detroit, Michigan, placing twelfth. Oleson was first and Russell was third in individual judging.

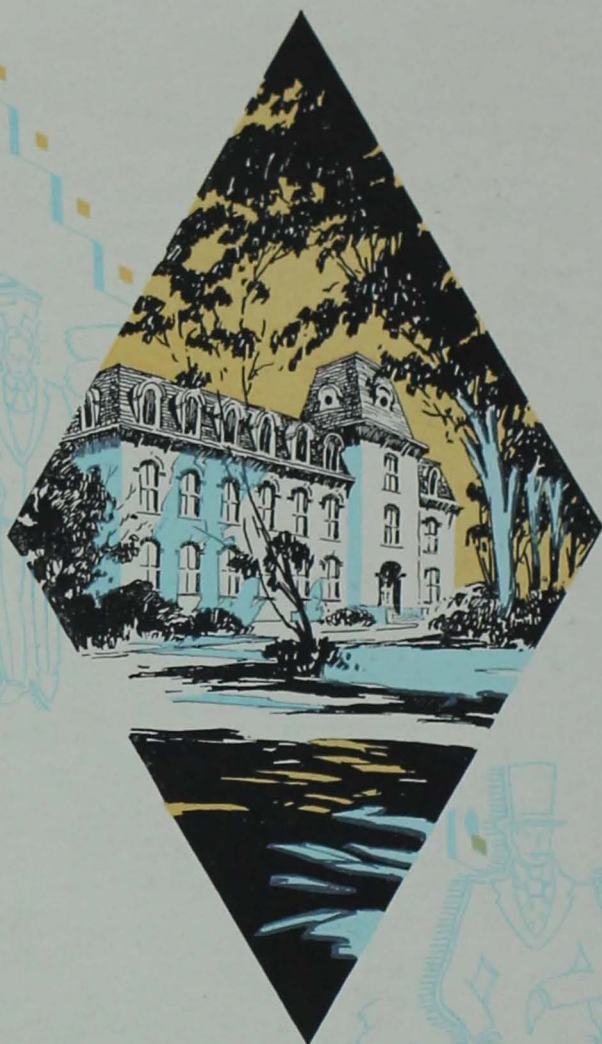

Top row: Waters, Soder, Herren; Front row: Schilleter (coach), Lincoln

◆◆ THE horticulture team placed third at the Midwest Horticultural Exposition in Marshalltown, Iowa. Soder was high in individual judging with one of the best scores ever made at this show.

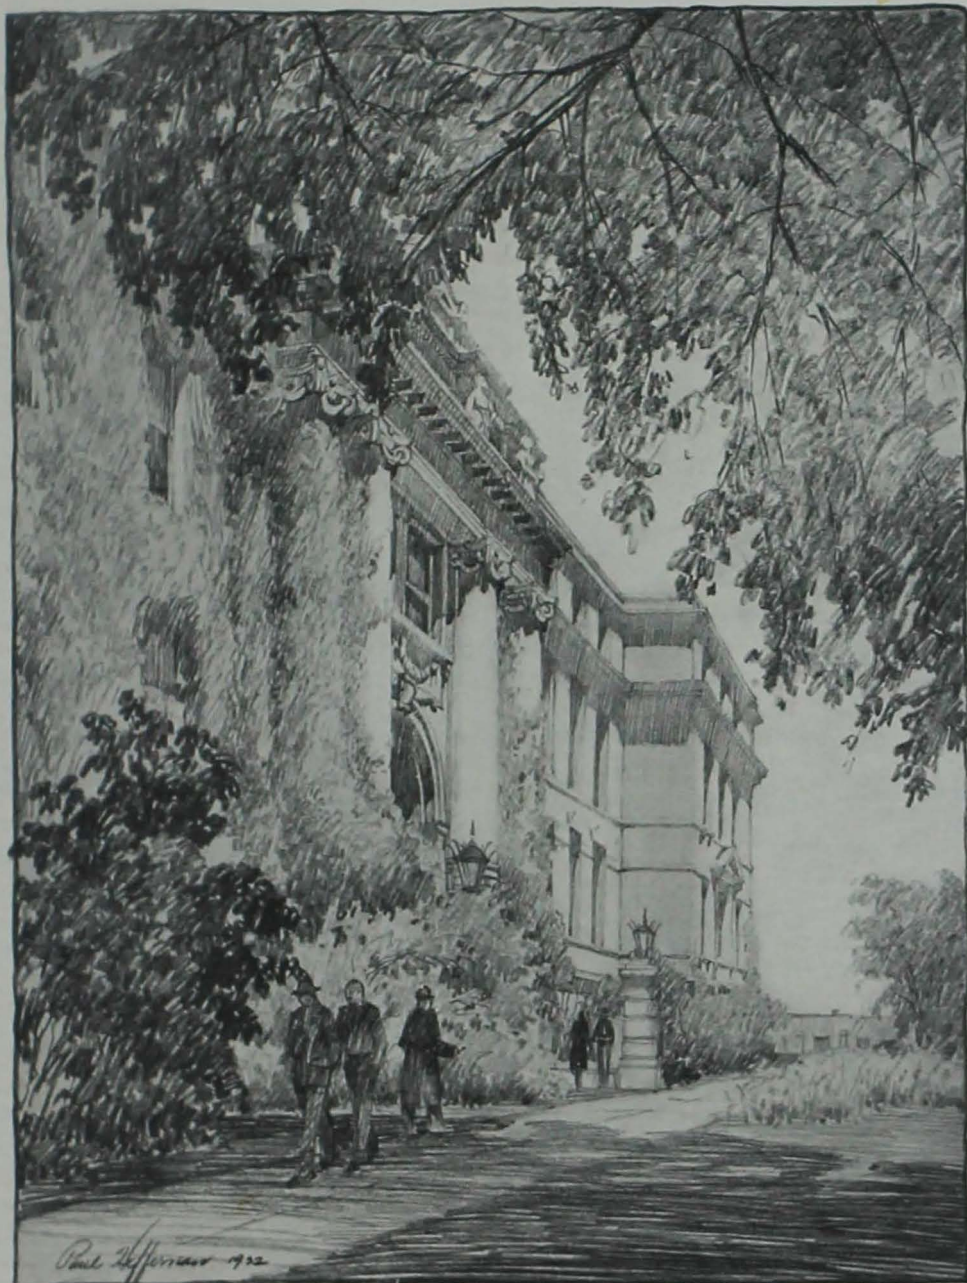

AROUND THE CAMPUS

The only head of a department in the Engineering Division who has so won the confidence and comradeship of the students that they call him by a nickname; known as "Shorty" to faculty, students, alumni and strangers who stop long enough to make his acquaintance; a teacher, not of subjects but of students; a professor whose aim is to mould students not into scholars, but into engineers . . . that is FRANK D. PAINE

Pop Griffith's morality lectures in
 metals classes Mike Paley
 puttering around secondary sunshine
 club trying to make Dunagan hold class out-
 side in the spring Bill Schlick's potent crushing
 machinery Jim Everds at work destroying building

ALPHA CHI SIGMA

◆◆ **A** LPHA CHI SIGMA is the only professional fraternity on the campus which operates an organized house. This is the first year that a house has been used. Membership in Alpha Chi Sigma is drawn from undergraduate and graduate students of chemistry. Affiliation with a social fraternity does not preclude men from membership.

WOMEN'S PAN-HELLENIC ASSOCIATION

♦♦ A new system for sorority rushing was adopted this fall. Instead of the pre-school system, the formal rushing period was October 8 to 16. Ninety-eight girls were pledged by the eleven sororities. All forms of rushing were discontinued from October 16 to the end of fall quarter.

The annual Women's Pan-Hellenic formal dance was held April 1.

INTERFRATERNITY COUNCIL

◆◆◆ **A**MONG its chief 1932-1933 accomplishments the Interfraternity Council lists the reduction of the hour requirement for initiation of fraternity pledges from 30 to 28. Local fraternities, since last year, have held seats on the council.

George Corbett represented the Iowa State Council at the National Undergraduate Interfraternity Council Conference in New York in November.

The Men's Pan-Hellenic Formal Dance, sponsored by the Council, was held Feb. 25.

DELTA PHI DELTA

♦♦ VARIOUS art exhibits in Home Economics Hall have been the outstanding projects of Delta Phi Delta this year. The first exhibit was of soap sculpture from the Procter and Gamble Company, followed by a showing of Japanese prints, and later in fall quarter, Penland weaving and pewter from schools in North Carolina. Many of the objects on display were for sale. The organization entertained all junior and senior girls majoring in art at a tea early in the fall.

T A U B E T A P I

◆◆ **T**AU BETA PI was founded at Lehigh University in 1885, to mark in a fitting manner, those who have conferred honor upon their alma mater by a high grade of scholarship as undergraduates or by their attainments as alumni. Members are chosen for their scholarship, activities on the campus and personality. At the present time the association has fifty-nine chapters with nearly 20,000 members.

AMERICAN CERAMIC SOCIETY

♦♦ **A**T THE beginning of every fall quarter, new students in the field of ceramic engineering are entertained by the upper classmen at a banquet. And at this banquet they are acquainted with the purposes and activities of the American Ceramic Society.

After that opening event, a series of meetings is held with speakers or discussions on subjects relating to ceramic engineering. Throughout the year, this group strives to introduce new and interesting ideas in the field of research, and to study ceramics from a scientific point of view.

A. I. E. E.

◆◆ A DEMONSTRATION of the phenomena of the "electric eye" (by the General Electric Company) was one of the activities sponsored this year by the American Institute of Electrical Engineers. Later, the annual "E. E." banquet aroused considerable interest.

The organization held a joint meeting with the Iowa section of the A. I. E. E. and is also in direct charge of the electrical open house during Veishea.

OFFICERS

Some 200 Double E's help to swell the enrollment.

AMERICAN MANAGEMENT ASS'N

◆◆ THE American Management Association is primarily concerned with problems of industrial management, so in its direction of the General Engineering seminars, it sponsors outside speakers who talk on various related subjects.

Besides that activity, the association also gives an annual General Engineering banquet, and is in charge of all displays during the General Engineering Veishea open house.

HORTICULTURE CLUB

♦♦ **F**OR three days last fall, Catherine MacKay Auditorium was packed, both with people and with floral displays—for that was the scene of the annual "Little Mid-West" flower show of the Horticulture Club.

Besides this activity, the club sponsors a horticultural banquet during the winter, and grows special flowers for the Veishea Open House.

INDUSTRIAL ARTS SOCIETY

◆◆ **T**his year the Industrial Arts Society made black walnut gavels from Iowa's historic "Old Capitol" building, and presented them to the chief executives of the state in an impressive ceremony in the capitol at Des Moines.

The organization constructed a sign, "Iowa State College," in huge concrete letters. This was placed on the hill by the women's dormitories.

And when visitors or students become tired of wandering about the campus, they can always find rest on one of the ornamental concrete benches placed there by the Industrial Arts Society.

◆◆ THE first event for the Veterinary Medical Society this year was an informal mixer, in the fall. And after that, work was started on the Veterinary Ball. Held the first Saturday after the Christmas vacation, the now famous "Battle of Music," with two orchestras, was one of the most widely discussed social events of the winter quarter.

In addition to the annual spring picnic, the society held a spring costume dance in Catherine MacKay Auditorium.

KALEIDOSCOPE

GLIMPSES OF COLLEGE DAYS
TO DREAM ABOUT WHEN
THE FIRE BURNS
LOW

◆◆ **V**EISHEA of '32 started off with the moving up ceremony on the steps of Central; Harold Pride welcomed the seniors into the ranks of the Alumni, and the class presidents passed their duties on to their successors. ◆ The freshmen deposited their prep caps in the coffin, celebrating their advancement into the class of sophisticated sophomores. ◆ The May Fete was presented on the campus, at the base of the Campanile, with the traditional May Pole and the crowning of the Queen of the May. ◆ The K. Aggies furnished competition for our baseball team.

◆◆◆ **P**RESENTING here "The Last of the Floats"—the parade is omitted from Veishea in 1933. Rain did its best to ruin things in 1932, but the parade was a grand success. The C. E.'s reconstructed the Washington Memorial Bridge. ◆ The "I" men braved the elements to present a stupendous array of talent. ◆ The Hees cleaned out the kitchen, piled everything on a truck, and behold!—a work of art. ◆ The Future Farmers entered a novel float. ◆ A botanist, absorbed in his work, ducked out like everybody else when the rain came. ◆ And a passionate scene at the foot of the Campanile!

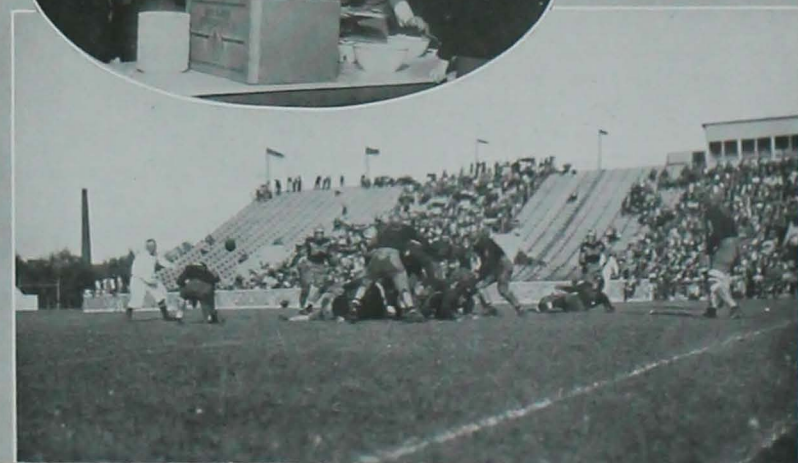

◆◆ ONE of the big sport events of the winter season was the Engineer-Ag hockey game. The Engineers won—3 broken noses and 7 bruised shins to the 1 severed ear and a dislocated jaw. Nice, genteel game. ◆ And isn't that Engineer goalie a determined looking cuss? ◆ Trade swats? Not with that war club, thanks. ◆ The last vestige of the barbarous past—the soldier boys on probation for Scabbard and Blade. ◆ The men's quartet went agricultural at the Little International. ◆ And the girls' riding class showed the crowd how to make a hoss behave.

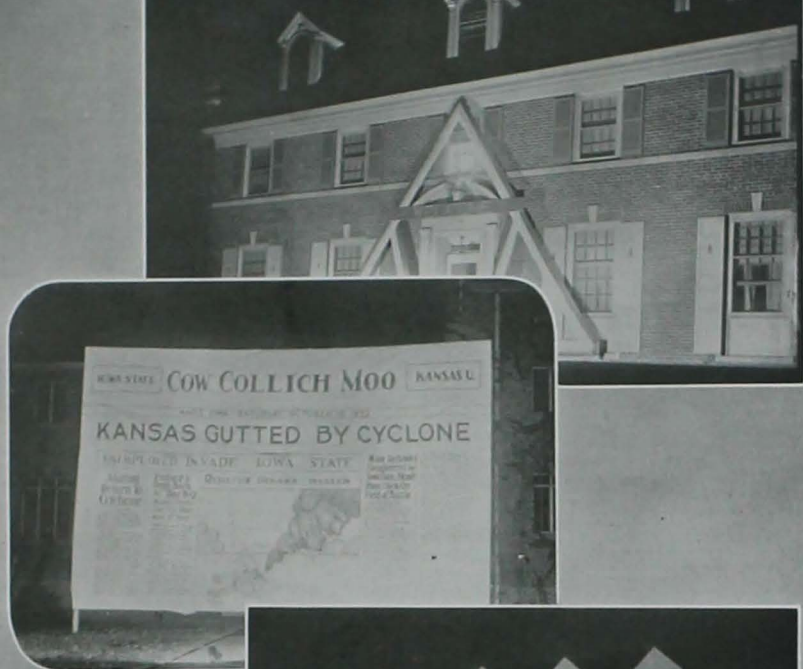

◆◆**T**HE “perennial prep,” the guardian angel of the campus—that was Orange Howard Cessna. The beloved college chaplain, inspiration of a dozen Iowa State generations, died October 22, 1932—at his work, as he so ardently wished. . . . Iowa State cannot soon forget him. The memory of his face and his life will linger always. For his simple faith in “his children,” his understanding which encompassed all creeds, made him a dominant figure in our Cardinal and Gold Days.

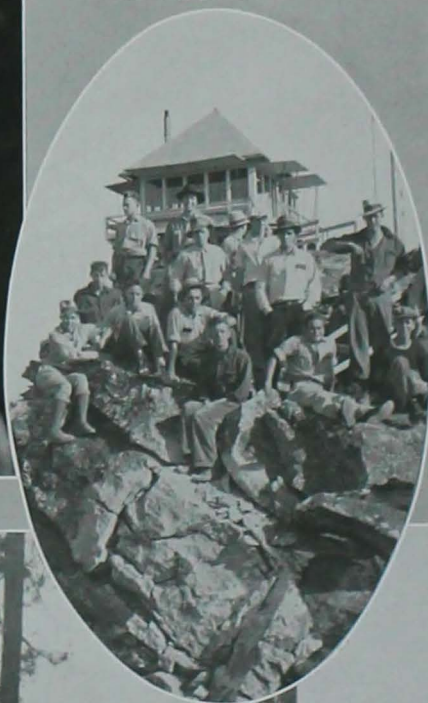

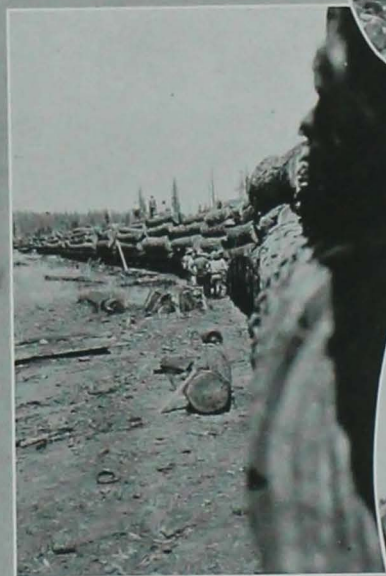

◆◆THE campus was full of pep the night before the Homecoming game. East stadium was crowded with a happy, hungry, howling mob. ◆ The men's quartet harmonized for the crowd. ◆ Those dark-complexioned lassies in the stripes did some nifty stepping. ◆ And some "fixed" boxing matches completed the entertainment. ◆ Here's the correct way to gulp your food at a barbecue. ◆ And how to get the food to gulp. Only one cake, please! ◆ The game—let's forget about the game—it was a swell pep meeting.

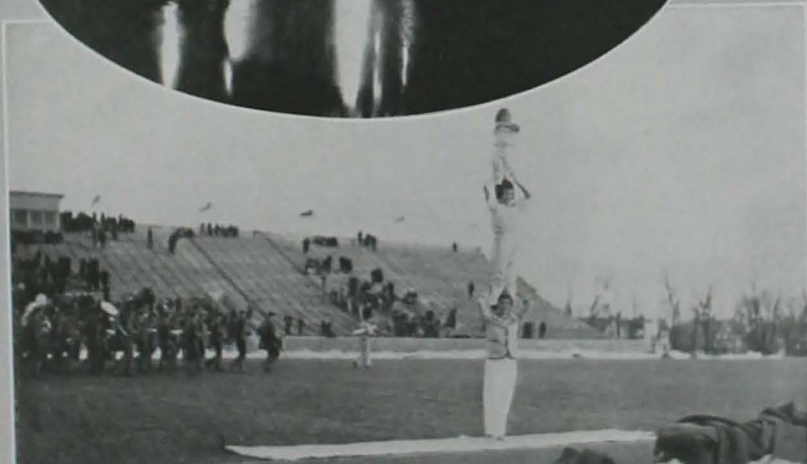

◆◆ **A** LUMNI and Jayhawkers descended upon the campus for Homecoming and it's hard to say which wrought the most havoc. The Alums were welcomed in great style, but the Jayhawkers weren't gutted as the Kappa Sig newspaper predicted. ◆ Neither were they caught as the Tekes had planned. ◆ Nor were they booted as the Delta Sigs would have had them. ◆ The Betas placed first in fraternity competition. ◆ The Chi O's went mechanical. ◆ And the bunting belongs to Delta Delta Delta.

◆◆◆ **T**HE foresters went to California to pick up a little first-hand knowledge of big-time logging. ◆ In setting up camp in the Shasta Forest some things had to be moved. ◆ No, that scene is not a picture of a chain gang, but just some of the boys on their way to where we see them up against the sky, at a lookout station. ◆ On the left is a train load of match sticks in the rough. ◆ And at the bottom—a class room, *a la nature*.

◆◆“T. N.” AND Iverson
 enjoying the ice on a Sunday
 afternoon.◆ On the way
 home from a convocation in
 the Gym.◆ Tramp, tramp,
 tramp—marching to spring
 inspection.◆ Wanted—a four-
 letter word meaning ——.◆
 This section wouldn't be
 complete without a picture of
 the Union; here's our choice
 —a night view from across
 the lake.◆ Jake's tumblers
 put on an exhibition between
 halves of the Oklahoma game.

◆◆◆ THE C. E.'s go to Camp Marston and Rainy Lake. ◆ A class in "Cutting Wood for Meals" ought to be a valuable course for the graduates of '33. ◆ The only means of transportation was this dilapidated jitney. ◆ A day's catch, and this is no fish story. ◆ Smile, please—the birdie won't bite. ◆ The tough looking character on the left is Prof. Jack Dodds himself—gone native. ◆ A surveyor at work (?). ◆ And the camp—mosquito paradise.

◆◆THE journalism gang—seniors under the Five-Year Plan.◆ Just a frolic in the snow—no one hurt.◆ How's this for contrast—the baseball team on the bench on a hot spring day, and the band and bugle corps on the field on a cold fall day. We prefer the first.◆ The old victory bell—long may she ring.◆ We turn the tables on Bob Harnly—our staff photographer.

◆◆ **L**ADIES and gentlemen, we present a tragedy in six weeks. The set remains unchanged in each act except for accumulation of dust on cots and floor. ◆ The villain brings misery to every member of the cast with his incessant, "I can't get 'em up." ◆ Here are five of the characters in makeup (a little bit of water would do them a lot of good). ◆ A closeup of part of the set ready for inspection. ◆ A modern Sir Lancelot on his nag. ◆ Back views—the one on the left is a horse. ◆ Looking for Indians in the wilds of Kansas.

◆◆ **T**HE gentlemen in the pasture scene are busily engaged in trying to persuade a little white ball to go between the two posts—polo, it's called. ◆ And here, at last, is some publicity for the poor, neglected stage hands—changing the set between acts of "The Bat." ◆ A study in black and white—the Junior Prom. ◆ Mitch Charnley (Professor Charnley, if you please) roughing it smoothly. ◆ Being an object lesson in what happens to the luckless senior on Off Campus Day. ◆ A Phi Sig sweetheart. ◆ And a view of the central campus through the Campanile.

◆◆◆ **T**HE first snow of the year took the campus by storm. ◆ The Knoll and College Creek took on added beauty under a blanket of snow. ◆ Music Hall nestled among the snow-laden trees. ◆ Pity the people with classes in Ag Hall on a day like this! ◆ The path from the Union down across the bridge. ◆ The girls go to work on the sidewalks.

FEMININITY

THE 1933 CAMPUS BEAUTIES,
CHOSEN BY TWELVE
IOWA STATE
MEN

◆ ◆ HARRIET NELSEN ◆ ◆

Tall, slender and blonde, Miss Nelsen takes high rank among Iowa State's beauties by virtue of her sunny disposition, her ready smile, her unusual coloring. An "outdoor girl," she lists swimming among her favorite sports.

She is a Delta Delta Delta senior.

◆ ◆ ELEANOR APPLE ◆ ◆

Calm efficiency that gives ready way to quick gaiety characterizes Miss Apple. She is a leader in home economics work, in Veishea, in class activities. Gamma Phi Beta chose her its candidate because of curly dark hair and flawless complexion. She's a junior.

◆

◆ ◆ BEATRICE BERNICK ◆ ◆

Vivacious and energetic, Miss Bernick is buoyant and enthusiastic in play and work---and she does a lot of both. Her hair is blond, her eyes blue-green, and her coloring sets them off to perfection. Miss Bernick, a junior, is a member of Pi Beta Phi

◆ ◆ NEVA CAREY ◆ ◆

Miss Carey is known for her winsome loveliness and her quiet pleasantness. A sophomore, she wears the Chi Omega badge; her creamy skin contrasts effectively with her dusky hair and her deep brown eyes. She spends few weekends at home.

◆

THE MAY QUEEN

◆ ◆ On the first day of Veishea it was revealed that Iowa State women had chosen Margaret Campbell as their 1933 May Queen. Selection as May Queen, based on the admiration and liking of her schoolmates, is considered one of the college's signal honors.

CYCLONES

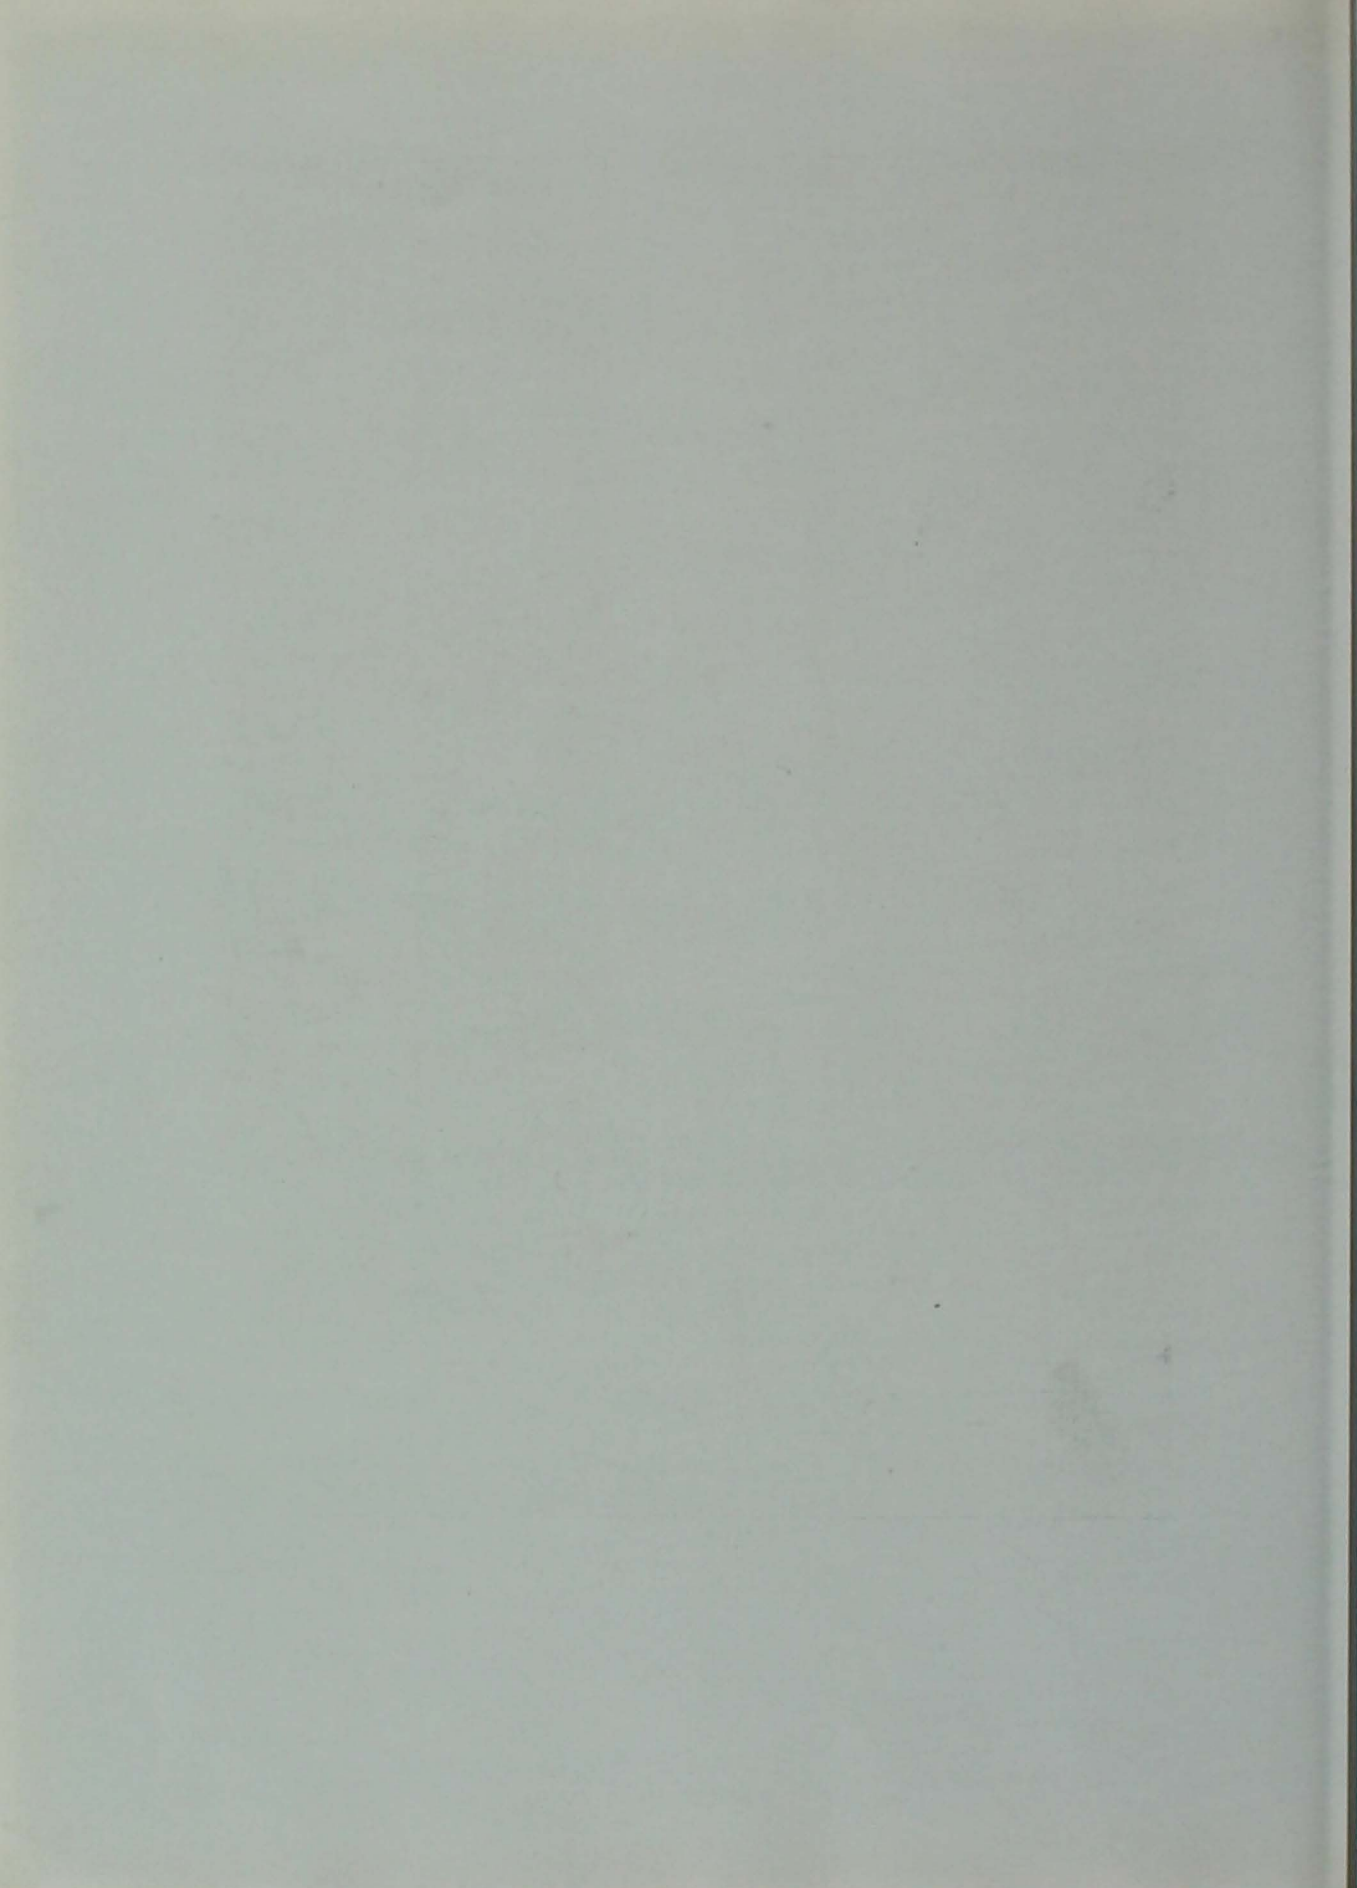

A man whose tenets of business and sportsmanship are uniformly high, and whose adherence to them is uniformly strict; whose energy and enthusiasm for Iowa State athletics have, in 9 years of service, put them on a lofty level; whose belief in "sports for all" has made the college a national leader in this important field . . . that is THOMAS NELSON METCALF

HUGO OTOPALIK

ROBERT HESS

◆◆ THE highest honor attainable for an athlete in this country is to gain a place on the United States Olympic team.

Last year Coach Hugo Otopalik was selected from a field of famous coaches from all over the United States to coach the American Olympic Wrestling Team, and guided them to a world's championship.

Robert Hess, 174-pound member of the Olympic team, is one of the cleverest wrestlers ever produced at Iowa State and, although he failed to win the world's title, holds many important championships, including the Big Six, National Collegiate, Midwest A. A. U., and the Iowa Collegiate.

V A R S I T Y " I " C L U B

◆◆ THE Varsity "I" Club is an organization of athletes at Iowa State who have won at least one major "I" in varsity sports competition. These athletes are organized for the purpose of promoting athletics in general, promoting good sportsmanship in competition, and in conducting athletic affairs such as the awards banquets. They also take an active part in entertaining visiting athletic teams such as high school teams during wrestling and track meets. Their membership is now 23 active members and 3 faculty members.

♦♦ THE Iowa State quartet has a song for every occasion, and occasions at which it has appeared include football and basketball games, banquets, meetings and the famed Glee Club tour in the spring.

Bentley Smith Boyd Hollen

WHERE IOWA STATE LEADS

◆◆ IOWA STATE'S Cyclones last year placed at the top of the Big Six "all-sports rating"—which means that Cyclone teams averaged a better record in conference competition than those of any other member. A Cyclone wrestler was an Olympic contestant, and he and two other Cyclones won national championships. The Cyclone football team beat Drake for the first time in y'ars and y'ars. Cyclone swimmers, golfers, tennis players, track men have, in the last 12 months, established themselves as dangerous contenders in any company.

Yet—in the face of the records of the wearers of the Big I—these accomplishments do not, perhaps, mark Iowa State's outstanding athletic achievement. It has remained for the rank and file of the student body—the men who never get nearer varsity competition than the grandstands or the sidelines—to do that. And they've done it by helping Athletic Director T. N. Metcalf and one of his assistants, Harry J. Schmidt, to build up one of the strongest programs of intramural sports known in American collegiate circles.

◆ In this school year of 1932-1933, more than 80 percent of I. S. C. men have taken part in intramurals. Fraternities have played touch football, handball, basketball, playground ball, baseball, tennis; they've participated in wrestling, volleyball, track, swimming, pentathlon, relays. Wards have come into most of these sports. Freshman teams have been organized; class divisional teams have had their competitions.

The result has been that a vast majority of Iowa State men have had at least a taste of sports. Faculty, too—they go in for handball, squash, other sports. If the ideal is "mens sana in corpore sano," Iowa State comes very close to it, for you *have* to study, and there are so many forms of athletics available that you find it very hard to keep out of them!

Oscar Hatch and his boys and the crowd help Iowa State beat Drake.

METCALF RESIGNS

LOUIS MENZE

◆ Coach Louis Menze is popular because of his drive and enthusiasm. Since he became Cyclone basketball coach in 1929 he has maintained a record that shows a larger number of victories than defeats and a decided superiority over non-conference quintets.

◆◆ THERE were three outstanding happenings in the major sports program at Iowa State during the 1932-1933 season—the resignation of Director T. N. Metcalf and appointment of Coach George Veenker as his successor, the resumption of football and other major sports relations with the University of Iowa, and the brilliant record of the 1933 wrestling team.

Director Metcalf chose to accept an invitation to succeed A. A. Stagg at the University of Chicago as Director of Athletics. During his 9 years at Iowa State he accomplished much for

Cyclone athletics. Iowa State as a whole is sorry to see him leave, but is glad that George Veenker consented to be his successor.

The scheduling of two football games with Iowa, one in 1933 and the second in 1934, brought joy to thousands of Iowa football fans, and ranked as one of the best sports stories of the year for Iowa newspapers. The game should mean much in generating enthusiasm and in benefiting finances at both institutions.

Little can be said of the great record made by the 1933 wrestling team that is not already known by sports fans. The team, under Coach Hugo Otopalik, won five of six dual meets, and the Iowa Collegiate, Midwest A. A. U., the Big Six and the National Collegiate tournaments.

ROBERT SIMPSON

◆ Quiet and unassuming, but a coach of trackmen who have made a name for Iowa State—that is Coach Robert Simpson. He was a great trackman himself while at the University of Missouri. Since coming to Iowa State he has become famous for his ability to turn out distance runners and hurdlers.

HUGO OTOPALIK

◆ Coach Hugo Otopalik is one of the most capable wrestling coaches in the United States today. Both the record of his teams at Iowa State, and the fact that he was chosen to coach the 1932 Olympic team fortify this statement. His 1933 team won the Big Six, Iowa Collegiate and Midwest A. A. U. tournaments.

GEORGE VEENKER

◆ Coach George Veenker is a man who immediately wins the confidence of everyone he has any dealings with. That's why he is successful as a football coach at Iowa State. That's why he was chosen to succeed T. N. Metcalf as Director of Athletics.

JOSEPH TRUSKOWSKI

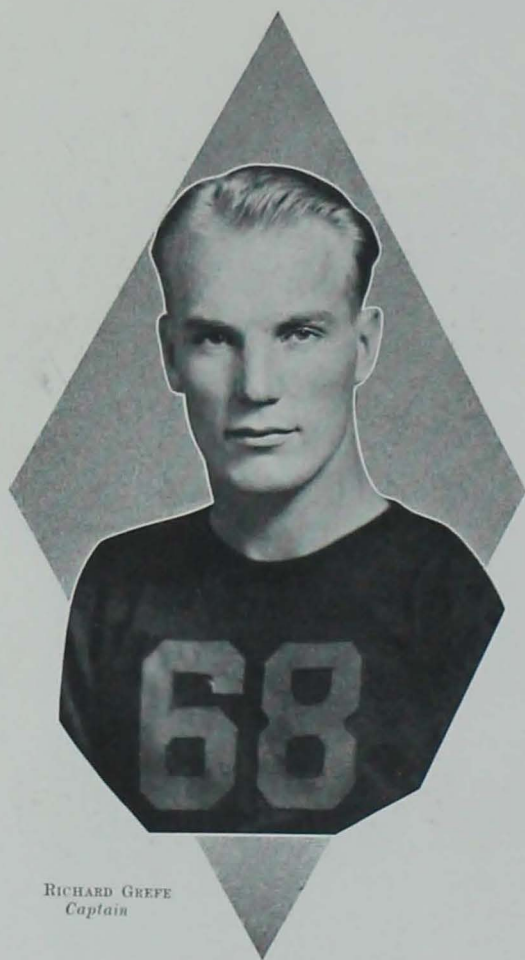

◆ A man with a broad smile and winning personality is Joe Truskowski, assistant football coach and freshman basketball and baseball coach at Iowa State. He established a fine athletic record at the University of Michigan in winning eight letters in three sports, and is capably handling his assignments at Iowa State.

1932 FOOTBALL

RICHARD GREFE
Captain

♦♦ **A** SQUAD of more than 40 men reporting regularly, and only six lettermen among them—that was the problem Coach George Veenker, the man who guided the Cyclone football team to second place in the Big Six conference in 1931, faced in 1932. Only two of this half dozen lettermen were backfield men, flashy Captain Dick Grefe, quarterback, and Ed Schafroth, hard-blocking halfback. The other four, Gerald Smith, William Dixon, Harold Templeton and Ivan Impson, were distributed in the line.

♦ But Coach Veenker set about his task with the enthusiasm and determination which marked his first year at the Cyclone stronghold. He bent his efforts to developing sophomore players to fill the vacancies left by graduation in 1931, with the purpose not only of building a winning team, but also of preparing them for 1933.

♦ When he announced his lineup for the opening game of the season with Simpson on September 24, there were five sophomores among the starting eleven. The other six were five lettermen and one minor letter winner. This aggregation defeated the Methodist team with little difficulty, the final score being 21 to 0.

Grefe breaks away for a long gain against Simpson.

1932 FOOTBALL

◆ In scoring the first touchdown the Cyclone backs marched almost the entire length of the field behind beautiful blocking to the 25-yard stripe, where a lateral pass from Impson to Grefe netted 24 yards to place the pigskin on the one-yard marker. Theophilus, sophomore fullback, plunged over for the score.

◆ Impson climaxed the second march down the field by breaking through center to collect the last 15 yards and the second touchdown. Then Dick Grefe closed the day's scoring by returning a punt through the entire Simpson team for a touchdown, one of the greatest runs of his career. The blond captain took the punt on his own 40-yard line, hesitated for a moment, then began his brilliant dash around right end, reversed the field, and crossed the goal without a Simpson player near him.

◆ Heartened by this decisive victory the Cyclones went into the game against Morningside the following Saturday set to win again. But the Morningside eleven was prepared for them, and during a large share of the first half rushed the Iowa State defense for consistent long gains, and held the Cyclones to a single touchdown—and that on a fake placekick.

BERGER

ROE

BEYER

IMPSON

TEMPLETON

G. SMITH

1932 FOOTBALL

GARNER

MARTIN

◆ A fighting second team took the field the second half and Howard Harlan, reserve fullback, climaxed a long drive nearly the full length of the field with a 33-yard dash for a touchdown, the second of the game. Then, in the fourth quarter, the first string backs sifted through gaping holes in the Morningside line, and followed deadly interference for three touchdowns, boosting the final score to 32 points while the visitors went home scoreless.

◆ Cyclone fumbles were costly in the Big Six opener with Nebraska on October 8. Before the game had gone 2 minutes, the Cornhuskers scored on an Iowa State fumble made on the second play after the opening kickoff of the game. The Huskers' second touchdown came with but 30 seconds of the first half left, when Sauer intercepted a pass on Iowa State's 45-yard line and ran through the entire Cyclone team to the goal.

◆ During most of the second half the Cyclones played the Nebraskans fairly even, and toward the end of the game it was a very nonchalant Husker fan who could relax for a second. Iowa State's only marker came in the third period. The Cyclones, with the wind at their

Impson finds a gap in the Sooner line.

1932 FOOTBALL

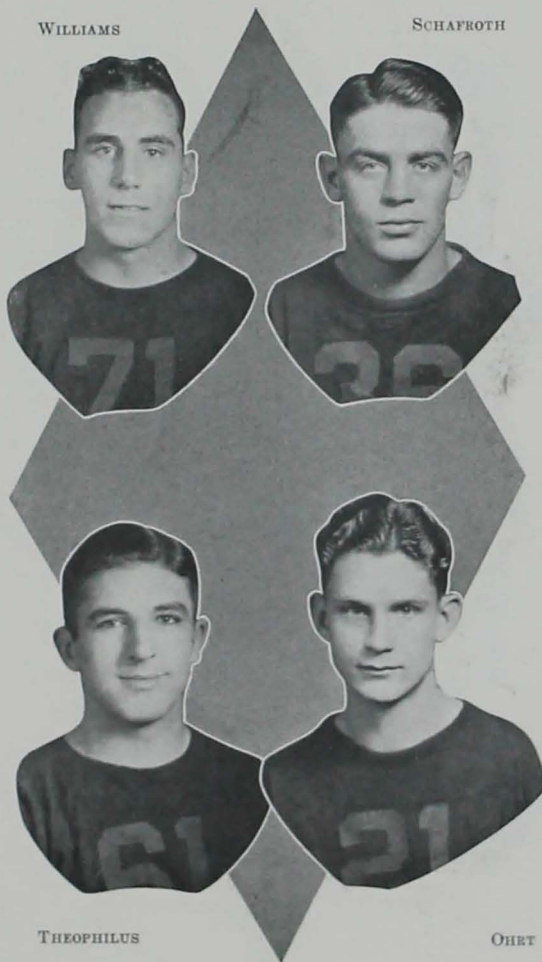

backs, had gradually forced the Cornhuskers into Nebraska territory, when Schafroth dropped back and threw a 45-yard pass directly into the arms of Ivan Impson, who ran the remaining few yards to the goal. The final score was 12 to 6 for Nebraska.

◆ Homecoming day was a disastrous one for the Cyclone football team, for it lost to the University of Kansas, 26 to 0. Little can be said of this game except that an Iowa State eleven, playing under par, was matched against a Jayhawker team of veterans that was clicking. The Kansas team was also aided by the psychological effect of a new coach, Ad Lindsey, who cut out the double wingback formation—a formation useless for a team with such powerful, heavy men. With the discovery of their offensive power in driving over the first touchdowns, the Jayhawkers exploded and ran wild.

◆ Although handicapped by an injured list which had grown longer in every game, the Cyclones held the Tigers of Missouri to a scoreless tie at Columbia on October 22. The two teams were evenly matched and played on a wet field, which weakened the offense of both elevens.

WILLIAMS

SCHAFROTH

THEOPHILUS

OHRT

Cyclones get revenge in Drake game.

FARRELL

DIXON

1932 FOOTBALL

◆ Following an open date, the only rest of the season, the battered Cyclones journeyed to Manhattan, Kan., where a Kansas State eleven, still irking from the 7 to 6 defeat at the hands of Iowa State in 1931, handed the Cyclones a 31 to 0 trimming.

◆ Although doomed to bottom place in the conference, the Cyclones had one more chance to make a mark for themselves in the Big Six conference—the game with Oklahoma at Ames on November 12. The Sooners, however, were too strong and won a thrilling contest, 21 to 12.

◆ Only one game remained on the Iowa State schedule, but it was a chance for the Cyclones to redeem themselves, for it was the traditional fray with Drake. It has often been remarked that the outcome of this annual game determined whether a season had been a success or not.

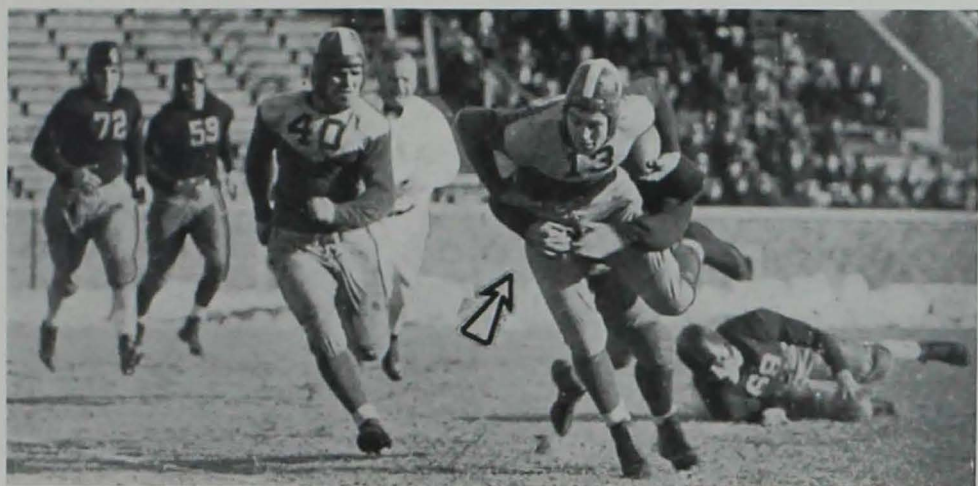

◆ If that is true the 1932 Cyclone football team was a success, for it sent the Bulldogs scurrying back to Des Moines with the small end of a 34 to 13 score. This great victory was a thrilling climax to a comparatively disastrous season and forced fans to forget past games. It was a grand finale for the renowned Dick Grefe and his teammates. They outpassed and outran the

D. GREFE

DANA

Deadly tackling stopped Drake in final game of season.

1932 FOOTBALL

Bulldogs for fully three quarters, then held them even for the final period. Except for their aerial attack, the Bulldogs were never dangerous, but that was very dangerous in the final quarter.

◆ In spite of the poor showing in the Big Six, a review of both conference and non-conference games for the 1932 season revealed that the Cyclones scored a total of 110 points to 111 for opponents.

◆ A squad of more than 40 enthusiastic candidates reported throughout the spring season of 1933. Among these two-score men were 13 lettermen from the 1932 squad. Only five major letter winners, Richard Grefe, Ivan Impson, George Martin, Andrew Farrell and Wendell Johnson, and two minor letter winners, Bob Hess and Marvin Zeller, were lost by graduation.

◆ In the spring workouts the Cyclone squad appeared to be considerably stronger than the inexperienced one that greeted Coach Veenker in 1932. The line will undoubtedly be much stronger with veterans Magnus Lichter and Jack Beyer eligible for center, Dwight Garner, Gerald Smith and Russell Gute for guards, Vernon Loyd, Hiram Roe, Paul Barger and Robert Beatty for tackles and Harold Templeton, Amos Dana, Gilbert McQuern and Don Grefe for ends. Veterans returning to the backfield are Marlowe Williams, Herbert Ohrt, Wilbur Winter and Donald Theophilus.

◆◆ **E**ACH year the freshman football team is heralded as the greatest in history. In 1931 that statement was made by one sports writer, speaking principally of the backfield material. The fact that more than one-half of the regular varsity team in 1932 was composed of sophomores bears out this statement.

◆ We won't go to the extent of calling the 1932 freshman squad a still greater outfit, but we do believe it is as good as any ever appearing on Iowa State fields. In contrast to the 1931 squad, which was markedly good in backfield material, the 1932 squad seemed to be strongest in the line, although there were several outstanding backfield men. It is the sincere belief of several football fans who followed the prep squad closely, that there are freshmen capable enough to handle both ends, both tackles, one guard, and at least two of the four backfield positions in 1933.

◆ The squad included many more heavy men than the average freshman squad, there being 10 numeral and honorable mention winners scaling over 190 pounds, 5 of whom weighed more than 200 pounds.

◆ With this promising squad of more than 60 men to pick from, Coach Louis Menze and Assistant Coaches Bob Smith and Warren Deussenberg had considerable difficulty in selecting men for numeral awards. Thirty-five men were recommended for the numeral awards and 10 men were given honorable mention.

TEMPLETON

BATMAN

1933 BASKETBALL

♦♦ **W**HEN Louis Menze, basketball coach, called roll for the first practice of the 1933 season he found himself facing the same problem that Coach George Veenker faced on the football field just a few months before. He had plenty of promising men, but only one, Captain Ralph Thomson, was a letterman, and only two or three others had had any experience to speak of.

♦ Prospects looked dark, for the rest of the Big Six teams, with but one exception, were boasting a long string of veterans from which to build their teams. Coach Menze went to work, however, and kept a sharp eye on the sophomore candidates.

♦ From this inexperienced squad he built a team that won five out of six non-conference games before opening its Big Six schedule. Faith in the Cyclone quintet, which had been rising with every new non-conference victory, ran high when the Cyclones flashed a championship brand of basketball to defeat Oklahoma at Ames in the first Big Six game, 31 to 25. As the Sooners had been doped as possible 1933 conference champions, this upset fired the hopes of many Cyclone basketball fans.

Sweitzer Frazer Poole Kilborn Holmes Hargreaves
Mundy Johnson Garber Eubank Peterson Truskowski

1933 BASKETBALL

◆ But this victory was destined to be the last for the Cyclones until near the end of the season. They lost two games each to Kansas, Kansas State and Nebraska and one each to Missouri, Oklahoma and Drake. The only other victory was a breath-taking win over Missouri in the next to last game of the season.

◆ Within the Big Six conference the season was very unsuccessful for the Cyclones. They placed last in the conference and failed to place a man on either the first or second All-Big Six teams in most selections. Outside the conference the Cyclones won four in six games, three of which were with Drake. They defeated Central and Iowa State Teachers once each and Drake twice, losing one game to Drake and one to Coe.

◆ During the season, however, Coach Menze developed some fine basketball players, who will be valuable next year. Waldo Wegner, 6 foot 4 inch sophomore center, was one of the stars of the team. He was high scorer of the Cyclones with 109 points. Frank Hood was an outstanding junior guard, and Chester Anderson was a speedy sophomore forward. Men who played fine basketball throughout the season, but who will not be back next year are Clyde Dills, Ralph Thomson, captain, and Adolph Ludwig.

Sanford Walker Martin Ohrt Berger Barnes Renaud Wilkes

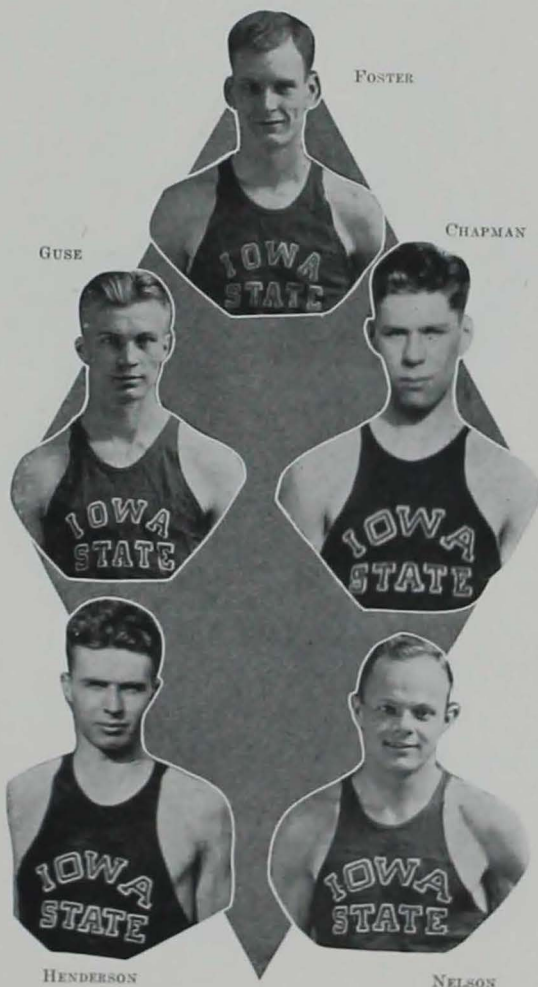

1932 TRACK

◆ Lyle Chapman stamped himself as one of the greatest college milers in America the following week when he defeated Glenn Cunningham, the Kansas ace, at the annual Kansas City Athletic Club indoor meet in the fast time of 4:18.4. In this thrilling race Chapman hung up a new Iowa State indoor mile record. This performance was the third fastest indoor mile run by an American college man in 1932.

◆ The Drake Bulldogs surprised the Cyclones March 4 by walking off with a 66 to 38 win in a duel meet held in Des Moines. Iowa State won first place in three events.

◆ Nagel won the 880-yard run title at the Big Six indoor meet at Columbia, Mo., March 12, as the Cyclones placed fifth with 13¾ points. Chapman lost his first mile race of the season when Cunningham, the Kansan, beat him to the tape in record time. Henderson won third place in the 440. Iowa State placed third in the mile relay. Cooper tied with two others for third in the pole vault and Heitman tied for third in the high jump to complete the scoring.

◆ Iowa State finished fourth with 29½ points in the quadrangular meet held in the Iowa University field house, March 19. Featuring the Iowa State performances was the record set by Sheetz, Nelson, Henderson

and Wessling in the half mile relay with a mark of 1:31.8.

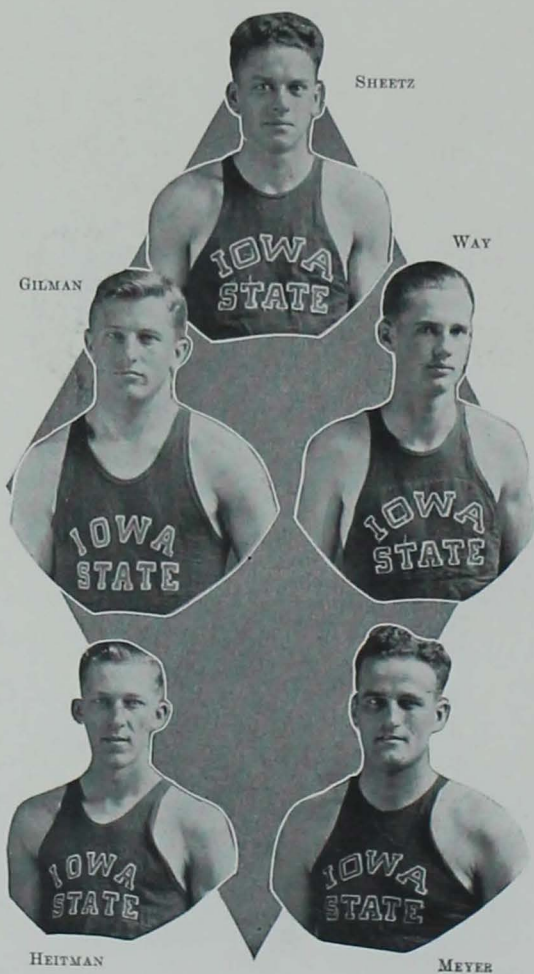

◆ The outdoor track season opened with the Kansas Relays at Lawrence, Kan., April 23. The Iowa State 2-mile relay team composed of Guse, Nagel, Labertew and Chapman finished a close second to the winning Notre Dame team.

◆ The following week at the Drake Relays the Cyclone 2-mile team forced Notre Dame to a new record in a sensational race which became an Iowa State-Notre Dame duel. Iowa State finished fourth in the mile relay, also won by Notre Dame.

◆ The Cyclones opened their outdoor dual competition with a 75-56 victory from Missouri.

◆ Chapman and Labertew tied for first in the mile. Nelson won the 100, and Foster took first in both the high and low hurdles for the Cyclones. Guse won the 880 and Meyer set a new Iowa State record of 136 feet 8 inches in the discus to win this event. Cooper in the pole vault and Ossian in the javelin also won first for the Cyclones.

◆ Drake snatched off a 75 to 58 win on State Field, May 19. First places were won by Nelson in the 100, Chapman in the mile and two-mile, and Foster in both

hurdle events. Heitman and Loufek tied for first with Schneeman of Drake in the high jump.

◆ The Cyclones took third place in the annual Iowa Intercollegiate meet held in Iowa City, May 26, with 25 2-7 points. Iowa handily won the meet.

◆ Labertew and Chapman were the outstanding Iowa State stars, Chapman winning first place in the mile run in the fast time of 4:21.2, and Labertew showing his heels to the other half-milers in the equally fast time of 1:56.0.

◆ Iowa State finished fifth at the Big Six conference meet won by Nebraska and held at Lincoln.

◆ Chapman fell before Cunningham, the Jayhawk star, who set a new record in the mile. Labertew and Guse finished second and fourth in the 880, also won by Cunningham.

◆ Foster finished fifth in the 220-yard low hurdles and Meyer took fifth in the discus to complete the Cyclone scoring.

◆ The Cyclone track season ended at the National Collegiate meet in Chicago, June 11. The four points earned in the meet came from Labertew's fifth place in the 880 and Chapman's fifth place in the mile.

Thousands gather to see Cyclone national champions.

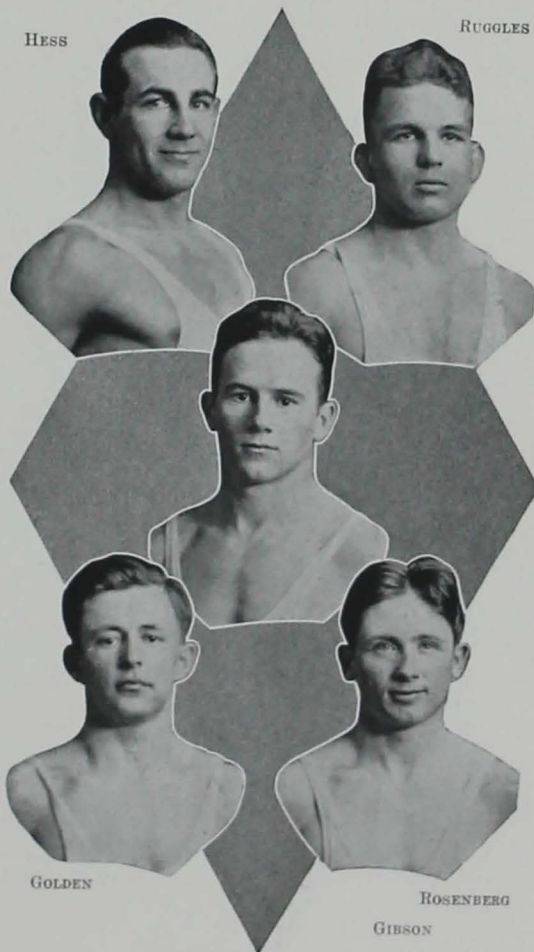

1933 WRESTLING

♦♦ IOWA STATE'S 1933 wrestling team carried off first honors at four major meets to lay undisputed claim to the United States team championship. The team was one of the greatest ever produced at Iowa State, either by that great producer of champion individuals and teams, Coach Hugo Otopalik, or any other coach. Its members were superior to opponents in their knowledge of wrestling, endurance and spirit, and exhibited a flashy, aggressive style of wrestling that was unbeatable and fine to witness.

♦ The team got off to a slow start and lost its first clash with the University of Indiana, 1931 national champions, $16\frac{1}{2}$ to $9\frac{1}{2}$. Following this meet the Cyclones were not defeated in five more dual meets and four major tournaments, and in a return meet defeated Indiana by the decisive score of 20 to 8.

♦ Other victims fell before the Cyclones in rapid succession. Missouri succumbed 31 to 3, Minnesota 25 to 3, Iowa State Teachers 27 to 3, and Nebraska 38 to 0. When the season had closed a review of dual meets disclosed that the Cyclones had accumulated a total of $149\frac{1}{2}$ points to opponents' combined points of $33\frac{1}{2}$.

♦ Coach Otopalik's pupils nearly monopolized the Big Six tournament when they won six championships and

one third place in the eight weights, and set a new record for high scores with 48 points.

◆ At the Iowa Collegiate meet the Cyclones were again the masters. They won five championships, two thirds and one fourth for a total of 35 points and the state team title.

◆ Again, in the Midwest A. A. U. tournament the Cyclones dominated the field with three championships and four second places. But it was at the National Collegiate tournament that the Cyclones definitely proved their claim to the national title. They won three national championships and six falls during the course of the meet for 21 points. The Oklahoma Aggies was the only other team to win three championships.

◆ In these four meets the Cyclones won a total of 17 individual championships. Golden, Rosenberg, Ruggles, Frevert, Martin and Hess won Big Six championships; Gibson, Golden, Martin, Frevert and Hess won state championships; Gibson, Frevert, Martin and Hess won Midwest A. A. U. championships; and Frevert, Martin and Hess won National Collegiate titles.

1932 BASEBALL

◆◆ **E**LEVEN victories and five defeats—that's the record made by Iowa State's 1932 baseball team. And that record won the team the distinction of being the greatest Cyclone team in 8 years. In fact, that record is one of the three best in the last 21 years.

Better records since 1911 were established only in 1919 with eight victories and no defeats, in 1923 with 10 victories and 2 defeats, and in 1924 with 12 victories and 4 defeats. The 1932 team was the first since 1924 to win at least one-half of its games.

There has been considerable speculation as to the cause of this fine record. The best explanation can be found in the combination of two factors—Coach Louis Menze and a team of capable veterans. From the beginning of the 1932 season Coach Menze concentrated upon remedying the principal weakness of the team during the last several years—weakness in batting. He held batting practice for at least an hour nearly every day. This year's team batting average of .253 against that of .209 in 1931 shows that this intensive drill was not in vain, and had much to do with the success of the 1932 nine.

Another factor which reflects the skill and experience of the Cyclone team, and offers one of the best explanations for the fine record, is the fielding record for the season. In the 14 regularly scheduled contests Iowa State fielded but 32 errors, an average of little more than two a game, while opponents committed 80 errors, an average of nearly six a game.

MINOR SPORTS

◆◆ **W**HILE other colleges throughout the United States were eliminating and reducing minor sports appropriations, Iowa State maintained its program of minor sports on the same high level of previous years. The minor sports program at Iowa State has never been neglected. Coaches for tennis, golf, swimming, two-mile and polo have been selected with the same care as that taken in choosing coaches of the major sports.

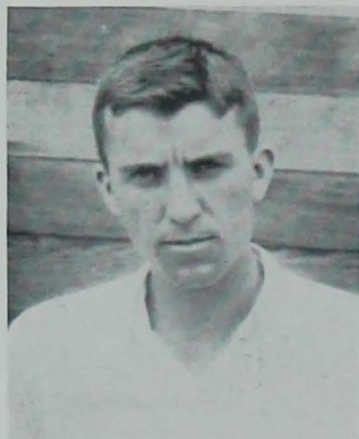

The result has been, and the 1932-33 season is no exception, that Iowa State has always ranked very high in minor sports competition. Since the organization of the Big Six conference 5 years ago, the Cyclone swimming team, under Coach C. E. Daubert, has won three conference championships, a tie for first, and a second place.

Cyclone tennis teams have always ranked high, and the 1932 team lost only one match in 12, that to the University of Kansas team, which was captained and coached by the great amateur, Junior Coen.

Golf is a relatively new sport at Iowa State, but promises to become a popular sport in Iowa and the Big Six largely through the promotion of Coach Hugo Otopalik. The Big Six golf meet in the spring of 1932 was the first ever held in the Big Six conference.

The Cyclone two-mile team was not defeated since the introduction of that race to displace the five-mile cross country run 3 years ago until this year, when defeated in the Big Six meet at Kansas.

Polo is another relatively new sport at Iowa State. Polo, although it is played under the direction of the Military Department, is included with the minor sports because it is a competitive sport that is attracting considerable interest at Iowa State. The Cyclone poloists are improving rapidly under the coaching of Lieut. John Lewis, who came to Iowa State in the fall of 1932.

MERLE ROBINS

◆ Merle Robbins, one of the cleverest of Cyclone tennis players, was selected to coach the Iowa State tennis team upon his graduation. His 1932 team won nine, tied two and lost one match in competition with Big Six and Iowa teams.

C. E. DAUBERT

◆ No Cyclone coach has proved himself more capable as a producer of championship sports teams than C. E. Daubert, swimming coach. His swimmers have won the Big Six championship three times in five years, losing but one conference meet and tying one.

1 9 3 2 T W O - M I L E

♦♦ **C**OACH BOB SIMPSON's two-mile team completed a successful season in the fall of 1932, finishing second in the Big Six conference meet and losing but one dual meet. The team was greatly handicapped by the loss of Captain Lyle Chapman, who was bothered with rheumatism throughout the entire season.

The season opened with a dual meet with Grinnell at Grinnell, the Pioneer runners winning by the close margin of 29 to 26. Captain Mike Pilbrow and Pfeiffer of Grinnell came in first in 10:08.5. Guse, the first Cyclone runner to finish, was 20 yards behind the winners. Gordon of Grinnell finished fourth and Labertew, Highsmith, Rooks and Chisholm of Iowa State finished in order behind Gordon.

The Cyclones took things easy in the second dual at Des Moines at the Drake stadium, drubbing the Drake Bulldogs by a score of 15 to 45. Six Iowa State men, headed by Vernon Guse, finished ahead of the first Drake man, Thompson. Guse's time was 10:16.

Iowa State men finished as follows: Guse, first; Labertew, second; Eichelkraut, third; Chisholm, fourth; Rooks, fifth, and Highsmith, sixth.

Iowa State runners performed remarkably well in the Big Six two-mile meet at Lawrence, Kan., as they finished second to Kansas State, the winner. The Kansas Aggies scored 29 points to 40 for Iowa State.

Glenn Cunningham, sensational Kansas University Olympic team member, won the race by a comfortable margin in the fast time of 9:32.4. Landon of Kansas State, Ayres of Nebraska, Pierce of Oklahoma, Eichelkraut and Labertew of Iowa State finished in order behind the Jayhawk star. The unusually high quality of the distance runners in the Big Six was evident from the fact that Eichelkraut and Labertew, who finished fifth and sixth, respectively, were unofficially timed in 9:48 and 9:50.

Guse, who finished ninth for the Cyclones, was unofficially clocked in 10:05. Chisholm finished twentieth in the race and Rooks, the other Cyclone competitor, finished outside of the first 20.

Following Iowa State in scoring order were Nebraska 43, Oklahoma 53, Missouri 70, and Kansas 73.

Three lettermen will be lost to the two-mile team for next year due to the graduation of Earl Labertew, Lyle Chapman and Arthur Eichelkraut. Guse, Chisholm and Duncan, lettermen, and Highsmith have another year of competition. Rooks was the only sophomore to win an award.

First Row: Rooks Guse Chisholm. Second Row: Labertew Simpson Eichelkraut

♦♦ IOWA STATE enjoyed another successful swimming season in 1933, tying with Nebraska for the Big Six championship and winning two out of four dual swimming meets.

Although four of the eight lettermen graduate at the end of the year, the future strength of the Cyclone tank team is insured by a powerful freshman squad. Since the Big Six conference was formed Coach C. E. Daubert's swimmers have monopolized the conference, losing the championship only once in 5 years.

The swimming season opened January 27 with the Midwest A. A. U. championships in the Cyclone pool. With a total of 17 points, Iowa State finished second in team scoring. Grinnell College won first place with 23½ points.

Murphy led in scoring for Iowa State, taking second in the 500-yard race and third in the 220. Zimmerman placed third in the junior low board diving championships and Sands placed third in the 220-yard breast stroke.

The 400-yard relay team composed of Lowder, Murphy, Daubert and Sands placed second, as did the 300-yard medley team composed of Gerry, Sands and Starbuck.

The Cyclones took a grand slam on first places February 4, as Creighton University fell 67 to 16 in the first dual meet of the season in the Iowa State pool. Iowa State also took second in every individual event but the fancy dive. Three new pool records were made during the meet. Captain Sands set a record of 2:45.6 in the 200-yard breast stroke, and Murphy, the sophomore flash, shattered the 440 record with a mark of 5:44.5, and came back to swim the 220 in 2:36.7 to better the old mark.

Iowa State defeated the Nebraska Cornhuskers by the narrow margin of 44 to 40 a week later at Lincoln, Neb. The victory came when the Cyclone 300-yard medley relay team won the final event, setting a new meet record of 3:32.5.

First places were won by Sands in the 200-yard breast stroke and 100-yard free style, Gerry in the 150-yard back stroke and Lowder in the 220.

The Cyclones ended their dual competition with two defeats from Grinnell College. The first meet held at Ames, February 18, was lost by a margin of 45 to 38. Two weeks later at Grinnell, in a nip-and-tuck battle, the Pioneers won by the slim margin of 42 to 41.

In the first meet Zimmerman and Murphy won the only individual races for the Cyclones. Zimmerman easily won the diving event, while Murphy beat out Elbert of Grinnell in the 440. The Iowa State 300-yard medley and 400-yard relay teams were both victorious.

C. Daubert Horneman Meyer Zimmerman Lowder Sternberg
Gerry L. Daubert Feise Sands Starbuck Murphy

1 9 3 3 S W I M M I N G

At Grinnell, two weeks later, Sands and Gerry retaliated for losses in the meet held at Ames. Sands beat Elbert 40 feet in the 200-yard breast stroke, while Gerry turned back Malbrough in the back stroke.

Zimmerman had little trouble in winning the fancy diving, Murphy won the 220, and the 300-yard medley relay team took first to complete the list of first places won by Iowa State.

Iowa State smashed three conference records and tied another in sharing the Big Six tank title with Nebraska, 46 to 46, March 11 at Nebraska.

Murphy led the attack on records, hanging up two records, a 5:48.8 in the 440 and a 2:40.5 mark in the 220. Sands equalled his own record of 2:48 in the 200-yard breast stroke, while the 300-yard medley relay team composed of Gerry, Sands and Daubert, clipped 2.7 seconds off the old record of 3:34.7.

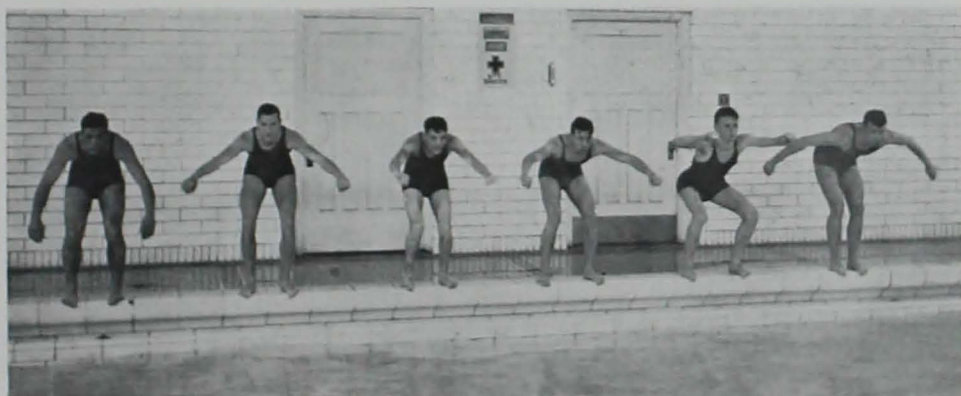

Gerry outclassed the field in the 150-yard back stroke in 1:58. Daubert, Starbuck, Murphy and Lowder won the 400-yard relay for Iowa State from Nebraska and Kansas State. Lowder won second in the 50-yard dash and fourth in the 100; Feise won second in the breast stroke and fourth in the 440 and Zimmerman placed third in the fancy diving event to complete the scoring for Iowa State.

Captain Sands, for three years one of the leading breast stroke swimmers in the Big Six, finished his swimming career in fine style. Besides winning first in the breast stroke in nearly every meet in which he participated, Sands also was one of the main cogs in the 300-yard medley relay team for three years and in his senior year proved to be one of the fastest free style swimmers on the squad.

Charley Lowder, who began his varsity competition as a distance swimmer, ended his career as one of the most versatile free style swimmers on the squad, winning points in every event from the 50-yard dash up to the 440. Leroy Daubert and Phil Starbuck were invaluable relay and dash swimmers.

Captain-elect Gerry developed rapidly during the season. He came within .3 of a second of the Big Six record when he swam the 150-yard back stroke in 1:58 at the conference meet.

Richard Murphy performed brilliantly as a sophomore, breaking existing Big Six and Iowa State records in the 220 and 440, and proving his worth as a relay man. Harlie Zimmerman's rapid improvement throughout the season stamped him as a sure point winner in the diving events. Carl Feise, second place winner in the breast stroke at the Big Six meet, should step into Sands' shoes next year and lead the Big Six.

MAJORS

WENDELL JOHNSON
RODNEY SNYDER

RALPH THOMSON
GENE WALLAR

◆◆ **L**IKE all of the minor sports at Iowa State College, tennis has been played with considerable success, especially the games with opposing Iowa teams. In the Big Six conference the Cyclones have been consistently near the top of the ladder, but in matches with Iowa teams the Cyclones have an overwhelming advantage.

Although the Cyclone tennis teams of the last several years have all been very successful, none was more successful than the 1932 team composed of Wendell Johnson, Ralph Thomson, Rodney Snyder and Gene Wallar. This skillful quartet won all of eight non-conference meets, including two with the University of Iowa, but within the Big Six lost to the University of Kansas and tied Missouri and Kansas State to finish third in the conference.

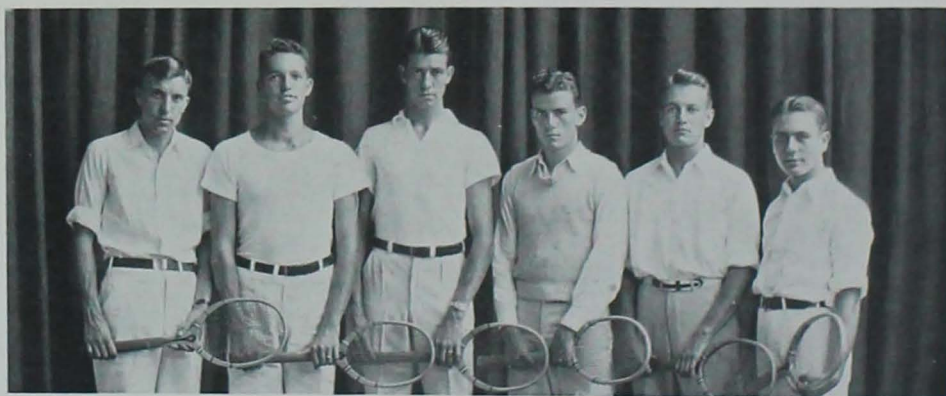

Ralph Thomson, Cyclone number one player, smashed through to 11 victories in 12 matches, losing only to the great amateur ace, Junior Coen of Kansas, in a dual with the Jayhawkers. Under the leadership of Coen, coach and number one player of the Kansas team, the Jayhawkers were successful in handing Iowa State its only defeat of the season.

Thomson plays a hard game, and loves "kills" at the net. His serves are extremely fast, and he depends upon speed rather than "cut" to bewilder his opponent. He plays much of his game in the front court, and it is generally a point in his favor when he gets an opportunity to "kill" one from this position.

Of the other three members of the Cyclone team, Wendell Johnson won 9 in 12 singles matches, Rodney Snyder won 7 in 12 and Gene Wallar won 10 in 11. These three players played a little more conservatively than Thomson, and established their fine records by consistently good, conservative playing.

Johnson paired with Thomson to win 9 of 11 doubles matches, while Wallar and Snyder teamed to win 8 of 11. A summary of both singles and doubles matches for the 1932 season reveals that Iowa State won 54, while opponents won only 17.

Merle Robins, former Iowa State tennis star, coached the 1932 team, and the Cyclones acquired much of their winning technique by copying his style.

Golf Letter Awards

MINORS

VERNON BOWMAN
HARVEY ENGELDINGER

CARL GATH
CLARENCE POWELL

♦♦ **I** NTEREST in golf as an intercollegiate sport has grown swiftly during the last 2 years at Iowa State and throughout Iowa and the Big Six conference. Much of this interest is a result of the promotion of Coach Hugo Otopalik, who majors in producing champion wrestling teams, but who has proved that he is also capable of producing winning teams in less strenuous sports.

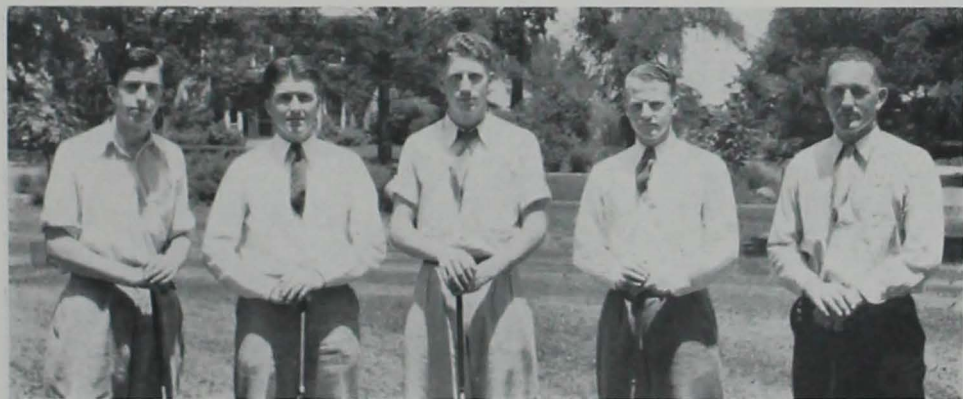

Coach Otopalik organized a Cyclone golf team in the spring of 1931, and began campaigning for matches. He was successful in getting several dual matches with Iowa and Big Six colleges, and was one of the leaders in promoting a state collegiate meet at the University of Iowa in 1931.

The impetus given the sport by Coach Otopalik has not only aroused the interest of the students, but has caused the college officials to seriously consider the construction of a college golf course. The plans have been drawn for a course, the site of which is to be an ideal, partially wooded area northeast of the campus.

Coach Otopalik, with the aid of enthusiastic golf supporters in Iowa and the Big Six conference, was successful in scheduling six dual meets, a Big Six tournament and a state tournament in 1932.

The Cyclone team won four of the six dual meets, and placed second in both the Iowa and Big Six tournaments. It defeated Iowa 12 to 6, Kansas State 10 to 8, Coe 15 to 3, and Simpson 15 to 3, and lost to Iowa once, 12½ to 5½, and to Minnesota, 16 to 5. Nebraska placed ahead of Iowa State in the Big Six tournament, and Iowa in the state tournament.

Although no admission is charged for witnessing the dual matches, the sport has been an inexpensive one, since the Ames Golf and Country Club donated the use of its beautiful golf course south of the campus for both practice and matches.

FRESHMAN SWIMMING

♦♦ IOWA STATE's future strength in swimming was indicated February 25, when the freshmen lost to the varsity by the close margin of 46 to 38.

The eight men winning numerals were Bruce Armstrong, 220 and 440; Jack and Robert Fries, 200-yard breast stroke; Richard Herrick, 150-yard back stroke and 440; William Grant, 60, 100 and 220-yard free style; John Smith, dash and distance free style swims, and James Walsh, fancy diving.

FRESHMAN BASEBALL

♦♦ GRADUATION took many of the Cyclone baseball veterans who helped win second place in the Big Six conference in 1932, but Coach Louis Menze had one of the most skillful freshman squads ever developed at Iowa State to fill the vacancies.

Baseball numerals were awarded to Herbert Ohrt, Bert Aldrich, Edward Doty, Hillis Hauser, Glen Iddings, Ellsworth Isaacs, Harlan Park, James Perry, Arthur Roberts, Robert Startzer, Thomas Walsh, Wilbur Winter and Orlando Johnson.

Perry Aldrich Gethman Iddings Doty Johnson Winter Roberts
Park Walsh Ohrt Kudi (coach) Startzer Hauser Isaacs

Simpson Spencer Dingman Bertels Craven

FRESHMAN TWO-MILE

♦♦ **F**OUR freshmen, Howard Craven, Floyd Bertels, Ralph Dingman and Henry Spencer were awarded numerals as freshman two-mile members.

Craven and Spencer were the outstanding men on the team.

1932 POLO

♦♦ **P**OLO is one of the newest sports at Iowa State, having been introduced only 2 years ago. It has grown rapidly in popularity, however, with both spectators and players, until now there are 27 candidates for the team working out regularly. Seven of these are veterans, and 20 are freshmen or first year men.

Under the tutelage of Coach Lieut. John Lewis of the Military Department, who came to Iowa State in the fall of 1932, the poloists have improved rapidly. An extensive schedule of games with Midwestern teams has been arranged for the 1933 season.

Topic Hinman Garden Lewis Marford Goepfinger Nelson

HALL OF FAME

♦♦ **B**ELIEVING that some permanent recognition should be given those stalwart athletes who brought honor and glory to Iowa State the Athletic Council has established an Iowa State Athletic Honor Roll. On this honor roll will be included the names of outstanding athletes from the present back to the first recognized intercollegiate competition at Iowa State.

To date the study has been carried back only to about the period of the war, with the result that 18 individual stars whose athletic accomplishments have brought lasting credit to themselves and their alma mater, have been tentatively selected. To this list other names will be added as the study can be carried back into the period before intercollegiate competition became well organized and the value of permanent records fully appreciated.

The photographs and impressive records of these 18 athletes are now being displayed in a special case in the Men's Lounge-Varsity Club room of the Memorial Union.

OF SPORTS

I N T R A M U R A L

HARRY SCHMIDT, *Director*

♦ ♦ "A THLETICS For All" is the slogan at Iowa State, and toward that end the Department of Physical Education, by means of Intramural Athletics, offers a varied program of sports to all groups of students. There are now enough established organizations that every student is included in some group and may compete in as many sports as he wishes.

The system of grouping the students includes wards, fraternities and dormitories. The wards include all men not affiliated with fraternities or dormitories and are divided geograph-

ically; the fraternities include all members and pledges, and the dormitories include all occupants.

During the school year of 1931-32, 75 percent of the entire male population of Iowa State College competed in the many team and individual sports, including football, touch football, wrestling, track, handball, swimming, tennis, horseshoes, golf, pentathlon tests, basketball, bowling, volleyball, baseball and playgroundball. Although definite statistics are not available for the 1932-33 year as yet, all indications are that the intramural sports are attracting even more participants than the previous year.

Iowa State's intramural program serves as a model for others throughout the United States. Much of the credit for this distinction goes to Harry Schmidt, director of intramural athletics and assistant football coach. He now has more than 80 percent of the men of Iowa State College participating the year around.

♦ INTRAMURAL MANAGERS

◆◆ **A**LTHOUGH Sigma Alpha Epsilon won only one first place in intramural sports competition for the year, its athletic teams placed so consistently near the top in the various sports that it won the big traveling cup given each year to the winning fraternity.

Sigma Alpha Epsilon's only first came in dual swimming, but a second in volleyball, a third in outdoor track, and a relatively high rating in nearly every other sport brought enough points to put them 54 points ahead of Kappa Sigma, the second place winner.

Kappa Sigma won first in volleyball and outdoor track, and second in basketball and indoor track, while the Phi Deltas placed third for the second consecutive year with first places in swimming and tennis, and second places in outdoor track and playgroundball.

Kenneth Wessling again proved himself the most versatile intramural athlete at Iowa State College by winning the pentathlon contest. He won the honor for the first time in the fall of 1931, and repeated in the fall of 1932.

In the pentathlon the athletes match prowess in climbing a rope, throwing the shot put, broad jumping, high jumping and running.

High 10 fraternities in intramural sports for the year 1931-32:

Sigma Alpha Epsilon	1363
Kappa Sigma	1309

♦♦ THE members of Naiad are selected from girls who have passed their Senior Life Saving Examination and have placed in a swimming meet at Iowa State College. Girls who have met these requirements, but who have not been enrolled in this institution for five quarters, are eligible for associate membership.

This year the organization has required every member to pass a series of Tadpole Tests in order to maintain their membership. In addition to improvement of swimming within the group they have sponsored a class for those girls on the campus who are interested in perfecting their swimming.

♦♦ THIS is the second year the board has sponsored intramural sports among the women on the campus. During fall and winter quarters there were 95 teams taking part as compared to 84 last year. Although there was no increase in the number of girls participating, there have been practically no defaults and the total number of games played this year far exceeds the number played last year.

OUR CAMPUSOLOGIST REPORTS

◆◆ CAMPUSOLOGY, as we find it on murky nights, is a vague sort of thing. Dry and uninteresting as a temperance worker's cellar—at any rate, as most temperance workers' cellars. Yet we mustn't say, broadcast, that our topic is mystifying, for our research has enabled us to dissect Campusology into its many variables—just as is done with the brain, figuratively, by the phrenologists, commonly dubbed "gold brickers" by none other than Doc. Gaskill, of our Psychology Department.

Dr. Gaskill

◆ On our graph, naturally we have first plotted the case of the grad student in science and a night cop of the local force. This scientist (name kept secret by request), a habitue of one of the more colorful downtown cafes, whiled away several hours in the local bastille early one morn last fall.

As we understand it, he was given a going over as he left the cafe by the tall, alert member of the force, said to be a former employee of a rendering plant. You can envision what happened when a bottle was uncovered (a matter that will call for but little imagination on the part of some students) and the scientist was escorted to the station. We next heard of the scientist, whose enthusiasm had waned a bit, in a tete a tete with Chief Cure before going on trial. "Better be sure that the bottle's full of—what is that stuff—before I make my debut in the courtroom," grouched the haggard scientist. Thereupon the Chief brought forth the bottled evidence, sniffed a couple of times and tears came into his eyes. 'Twas merely ethyl-methyl ketone. From that we gather there's more to be made by entertaining people than by teaching them.

◆ Wilma Boag, one of the thrifty Pi Phi whose name is closely linked with a Sig Alph, is so often an entertainer. In order to save a buck to buy firecrackers for the last Fourth, she slipped out the day before Uncle Sam boosted the cost of posting letters to 3 cents and purchased 200 2-centers. Ah, these technocrats.

◆ Even Bill Foster, a technocrat more commonly known as the guiding star and pro-

moter-in-chief of Engineers' Balls and Carnivals, has his difficulties. Like all those imbued in technocracy, Bill is a great advocate of charts and posters for advertising. Whilst he had his say in regard to posters for this year's Carnival, the Engineering Council said "Nix on you and your posters for the Ball." Bill then mesmerically foretold dire things and threatened to leave his locks unshorn for 2 more months.

This so incensed some of the members that they wished to rescind their resolution, but there weren't enough to swing it. Bill finally compromised, agreeing merely to forget he owned a razor for a month. When the balance sheets for the two affairs were compared, the Carnival proved Bill's point. If we wish to generalize, we can say that people who refuse to get their hair cut when thwarted are gospel in their viewpoint towards advertising.

◆ It might have been well to have mentioned sooner the widely publicized assignment which

Mrs. Pennington

Mrs. Pennington, of the chemistry and physical education Penningtons, gave her coaching class last quarter.

The members, so the story's told, were given a set of basketball rules to read, with the instructions not only to learn that Mary had a little lamb, but WHY Mary had it. That wasn't so unusual for P. E. assignments, but appended was the stipulation that if any of the gals were unable to find out, they should see the instructor. Now Mrs. Pennington. . .

◆ It was Sunday late in the winter quarter. All the Adelantes had their polished vehicles arrayed in front of the house. Across the pasture the Zetas, beauties of sorts that they are, peeped enviously at the lineup. A telephone jangled and the gals ordered six lads with cars.

As it happened, the first six fellows getting the lucky news began pressing and primping for the fair ones. Little attention did they pay to electrical engineers, Messrs. O'Connell and Smith, who were the seventh and eighth to hear the tidings. Being E. E.'s and having nothing to do, they were already

O'Connell

dressed for such emergencies. With one of the more pretentious buggies, they wheeled up to the Zetas, piled the six in the rear seat and drove away. For the ensuing half-hour, the other fellows shined, polished and congregated at the sorority.

Truly, it was the original "life's darkest moment" for them. . . . Meanwhile, in the car, the gals were beginning to object, mildly of course, as ladies should, to being hauled around in a stuffed bus with men like Smith and O'Connell. Finally, being unable to "take it" any longer, the fellows returned the gals to their true Knights in Waiting. For reasons obvious, we have mentally censored what happened to both parties during the evening . . . such is a sampler of the life of a Zeta.

From an outsider's viewpoint, probably the most popular house on the campus is the Gamma Phis. Some of the—well, more pleasingly plump sisters have organized an exercise class that puffs and bends nightly at 10 in the parlor. We have it that the discovery of the secret order was made one night by Ed Tuttle when he got his gal in late. Darn this foggy weather and muddy roads, comments Ed.

Tuttle

Alas! Alas! That twentieth century grappling battle lined up last quarter was never fought. Stude Whipple vs. Psych Gaskill. 'Twould have laid to rest forever that triumph of mind over muscle discussion. Why? The question was asked from Alice Freeman to the Delta Zetas, from humble prep to gray-haired senior. Why? At last they have broken the silence.

Why? Whipple thunders, "He's scared!" Why? Gaskill proclaims, "My antagonistic insight recapitulated the circumstances and my inveterate intrinsic insulation insurrected!" There must be some psychological meaning cloaked in those 49 cent words, but we fail to grasp it.

Melcher

It has been called to our attention that Betty Melcher, simple and naive lass that she is, believes in neither signs nor the calendar. While at the K. D. house some time ago someone asked her, "Weren't you the girl who had the 'phone call?" A true blond, little Miss

Melcher was all ears at once.

"Mae Woods wants you to call him. If he isn't at the house call his home." Finding him at home, she carried on this conversation (sic):

"This is Betty." "Yes." "Didn't you want me to call you?" "No, but now that you have we might as well talk." In a meek voice, "There must be some mistake." So Betty made a special trip to the calendar to see if it could be the first of April. It was.

Petty

You all remember the Sunday this spring when Paul Petty started the cigar box around the Kappa Sig dinner table. While the boys were congratulating him on his achievement, he was beckoned to answer a 'phone call from Betty Wells at the Tri Delt house, where the 5 pounds were rounding the tables. He listened. What did he hear?

The ever increasing crescendo of the Kappa Sig sweetheart song made possible by special remote control hookup arranged by Betty. One of the brothers, overawed by the impressiveness of the event, was heard to remark, "Wasn't that touching!"

If you have trouble remembering the night of the Engineers' Ball, associate it with the fact that 16 of the Sigma Kappa tribe visited the sisters in Iowa City that weekend. Ethel Waltz, of the Merrill Palmer Waltzes (you know Ethel) took no chances. She took one date along and had another awaiting her arrival. Puisse, Ethel!

Let us not fail to mention that one of this year's crop of beauty contestants, Ruth Ellen Lovrien, formerly associated with the home-makers' newsy pamphlet, had a date with an interne, who confided in her that he'd seen her photo in the Sunday Register and made a mental note, "There's a gal I'd like to meet." And it was so thoughtful of him at a later date to send her a program of his house dance filled with names of gals.

Now you take our man-about-town, Ambrose. He has busied himself numerous times with research projects and believes that if things keep on, there may be some positions open for first class street cleaners . . . and on the campus too!

First it was several groups of enterprising and ambitious young men who decided to stage sleigh rides in the winter; then it was

Apple

the D. U.'s, who staged a horse and buggy pick-'em-up party after the snow was gone. From the present outlook, it seems as though even the rainbow legged co-eds will soon be coming into their own.

Eleanor (Bomb Beauty 1932)

Apple is known as Ben among her wide coterie of friends, so we are informed. She was in a happy group half-mooned around the radio one evening last winter. To spice the lagging conversation a bit, one of the group commented on Crosby's singing with "Bing sure is swell."

"His name is not Bing, it's Ben," Eleanor promptly smirked. Just call her Ben, folks.

And then, of course, there's the gal, Gwennie Gray, who refrains from scanning the funnies. Some time ago she graciously accepted an invitation to a duck dinner and forgot to bring the ducks. Those of you wishing blanket tax waivers should get in touch with Gwennie at once.

House haunting, we are compelled to aver, might well be included in the curriculum of any ambitious man anxious to carve a niche for himself in anybody's halltree.

Good professional house hunters like George Metschke, who received his training in the Landscape Bungalow and the Zeta Beta Tau house at Nebraska, should always be in demand. If the hunter has had training in scaling overstuffed furniture, so much the better. And if he can pull a Dr. Jekyll-Mr. Hyde act at the moment (psychological) when the heroine is picking the softest place to throw a faint, he's made.

None other than our old pal Archie insisted upon reporting this bit which he gathered whilst in the vicinity of the Alpha Gam house—he was just casually strolling past one dark Saturday night this spring. While at a distance, he realized that the gals were home because the first floor was dark. Coming closer, he heard gnashing of teeth and voices coming from the ivy-covered front porch.

"I'd like to know where those cushions went to," were the deep tones of a well-known football Phi Kappa.

"I think it was mean of them," his gal be-moaned. "They've got a car to sit in, but they won't even let us have a davenport." We

understand that the following Monday was the only one during the quarter that didn't find the sofa in the upholsterer's shop.

The chromium-plated award (receptacle) for marksmanship goes to none other than grad students 1, 2, 3, 4, 5, 6, 7, 8 who often assemble on the third floor of Margaret Hall.

Latest reports were that the snuff imbibers were unerring in their aim at the 5-gallon bucket from 10 paces. When informed of the award, No. 3 objected, "It won't be as serviceable as our old dual-purpose standby."

Ah me! We have at last discovered! What? The reason why Iowa State students get so much snoozing done in class. Jack Stolp, military expert, and Don McGuiness, sports siren, have conducted another experiment. (No bulletin will be published.)

They found, and still find, that Cyclones, chasing after knowledge, walk 100 years every quarter on the campus. And how did they do it, and how? Well—they wore a little thing-a-ma-jig, you know, a pedometer, to class for countless days. Eight miles a day was their average tramp about the campus.

Stolp

Now figure it out on your slide rule. Eight miles a day at four miles an hour for 3,500 students for 11 weeks multiplies to something, the square root of which is a century, which is 100 years, which is longer than a man lives, which is—oh, nuts! Who figured it out anyway?

Would you be surprised if you heard that the Alpha Deltas, Sigma Kappas and Chi O.'s were somewhat puzzled by the unorthodox actions of the neighboring Sigma Nus the fore part of the year? Well, they were.

It just happened that about every time one of the gals would start down the path in the rear of the Chi O. mansion, one of the lads on the west would step out on the back porch and repeatedly call "Lady." That was more than a pinch of disquietude in the circle until it was finally passed around that the boys had pledged Merchant's Russian wolf hound, Lady.

Park

A letter may bring sorrow to

some folks, joy to others, but Harlan Park, baseballer and upholder of the west side of the campus, received one last winter that brought puzzlement. It was a proposal of marriage from a widowed matron of 45 living in Des Moines.

The letter intimated that Harlan was one of Ames' prominent young business men in addition to having \$1,500 of ready cash. The woman, Harlan discovered later, was the mother of two grown daughters and had run an ad in the Des Moines Tribune (or was it the Register?) for a husband having \$1,500 to finance the venture.

Harlan, however, didn't have the \$1,500.

We are authorized to deny for the P. O. P.'s, Clara Bartons and Alice Freemans who were at the Union that night that they had anything to do with the theft which occurred shortly before the Iowa Products Parade at the Farm and Home Banquet which Governor Herring didn't attend last January.

When it came ice cream's turn to march through Great Hall, it simply had vanished. Prof. Goss, of the Dairy Industry Department, was somewhat perturbed, but two substitute bricks were quickly procured from the Soda Bar, although they weren't the proper color or flavor.

All would have gone on nicely had not the rumor travelled so swiftly among the banqueters, but observers say that the excitement couldn't have been greater had someone suddenly discovered that the meat was tender.

This, my friends, comes from Maxine Lewis, who was teaching this lesson before she knew us (Maxine has, for many a day, been a peace movement leader in the Y. W. C. A.): "When you're supposed to be waiting patiently at home for a long distance call from over the 'phone, when your guy's out of school and you want to go dancing the Sig Chi house sounds mighty entrancing.

"It did to my sorrow, one Friday night, when I was called to the 'phone by the guy who does fight. But I'll call this yarn to a sudden halt, always admitting it was just my fault."

Hartford

Remember the morn you read in

the Student, "Farm House Drops Lead to Adelante!" The enmity between the Phi Psis and the Tau Delt dates from then. Why? The Delt uprooted the Lynn avenue scholars from their tradition-embellished cellar position in the scholastic ratings for the winter quarter and catapulted them way up to forty-fourth in the list.

The boys (Phi Psis) took it hard. Not so long ago, we were busying past the Phi Psi house and espied Joe Hartford, past house prexy and outstanding leader in concentric circles, on the porch with a book in hand.

A couple of the brothers, a few steps ahead of us, bellowed out, "Come on, Joey; you've got to cut it out or you'll spoil our standing again." (*Wisecrack).

Wendell Johnson, listed in the herd book as an M. E. Sr., is more prominently identified by his athletic prowess in football, hockey and tennis. Yet he has received four letters during his career as a collegian with Ph. D. appended to his name.

One of the letters was from a mother of six small children, all of whom stuttered. She wanted Wendell to tell her how to cure her children. Later a young Nebraska lawyer asked him for help as he found it quite embarrassing in the court room.

Until the latter part of this year, the letters were quite a puzzle. But one day Wendell was browsing in the stacks at the Library and sighted the book, "Because I Stuttered," by Wendell Johnson. The other Wendell, however, is in Iowa City.

We find that the Welch West vestibule has been divided up into standing areas for the more regular callers, one of these "Free Parking for Customers" arrangements. Summer school applicants are expected to get in touch with Joe Estes, roller skating Sigma Nu, who has taken a long-time lease on the whole space and is acting as booking agent in odd moments when he is not covering the ground himself.

"Through a Tunnel With a Candle" may sound like a good adventure, but don't try it in one of the College's heating canals. We suggest that all frequenters of heat canals carry illuminated signs and leave them on top of the ladder. The signs should read something like this: "OCCUPIED" with a foot note, "Go to Next Entrance."

Johnson

DATE LINES

Being a succinct, and heretofore unpublished, account of the major news of the college year 1932-33, all with a local angle that proves:

- (a) It's a small world after all.
- (b) It Means Something t. b. a. Alumnus o. I. S.
- (c) No lady would smoke a pipe.

SEPTEMBER

Portland, Ore.—The American Legion, here in convention assembled, voted to demand immediate, unconditional payment of the soldiers' bonus at a cost of \$2,300,000,000 to the federal treasury.

Local Angle: Colonel Booker buys himself a new automobile.

OCTOBER

Albany, N. Y.—Alfred E. Smith and Franklin D. Roosevelt shook hands and declared that the hatchet was buried. This, it is believed, presages an era of goodwill among erstwhile enemies, the nation over.

Local Angle: Two Phi Gams speak to a Sigma Nu on the street, the result being the Sigma Nu's temporary heart-failure. Colonel McBride, instead of handing out red tickets, takes to giving motorists bunches of violets.

NOVEMBER

Washington, D. C.—The Democrats won a sweeping victory, taking not only the Presidency, but also practically every other national office.

Local Angle: Al Zacherle gives up shaving from Nov. 8 to Thanksgiving. (This, according to a w. k. Pi Phi, practically makes Thanksgiving.) Spence Bridge, Republican, wheels Norville Shearer, Democrat, from the S. A. E. house to Engineering Hall and back in a wheelbarrow.

DECEMBER

North Pole, Arc.—Christmas, it has been decided, will come on Dec. 25 this year.

Local Angle: Walt Goeppinger hopes his Girl in Ames will give him a box of stationery for Christmas so he can write to his Girl in Kansas. He is, however, disappointed, in more ways than one.

JANUARY

New York, N. Y.—Technocracy promises a 4-hour working day, 4 days a week, and plenty of everything for everybody.

Local Angle: Marion McMahon opines that going to college is better than Technoc-

racy—not half the working hours. Sally Melhus says, "Ain't I got everything already?"

FEBRUARY

Ames, Iowa—The downtown banks closed temporarily, and reopened on a basis of paying nobody nothing.

Local Angle: H. V. Gaskill meets the situation with psychology, but finds to his consternation that it won't buy any groceries. Herman Knapp starts biting his nails—and at his age!

MARCH

Des Moines, Iowa—Salaries of instructors at the state educational institutions must be cut, declares the State Legislature.

Local Angle: Four faculty men who voted Democratic cut their throats. Bill LaGrange starts rolling his own.

APRIL

Lineville, Iowa—This city, best known as the birthplace of Joseph George Duncan, has become the Mecca of Iowa's thirstier citizens.

Local Angle: Two hundred forty-seven students enroll for course in Economics of Consumption. The Student prints an editorial (whimsical) about beer. Pete Jenkins makes a wisecrack about "The Breath of Spring."

MAY

Ames, Iowa—The names of four of Iowa State's loveliest flowers—the girls chosen as the Bomb Beauties of 1933—were announced here today.

Local Angle: Bottom drops out of the flower market. Elva Carpenter says she likes last year's better. Seven sororities, all dorms charge the election was fixed.

JUNE

(Predicted)

Chicago, Ill.—An opening for a young man trained in engineering has been announced here. Salary, \$48.75 a month.

Local Angle: Seven Iowa State graduates killed in the rush. Twelve students who have been studying personality development fail to get past the office boy. Nicholas Zykowski, who never quite passed the eighth grade, is hired for the job.

LET NATURE HAVE HER WAY

◆◆ TIME was—to pay a respect to the Seventy-fifth—when they said things like this in the college view booklets: “A Bit of Water to Enhance the Campus Charms.” That was, oh, say 10 years ago or more.

The bit of water got bitter and bitter—bitterly speaking—and they stopped using the word “enhance” under the photographs in the booklets. There wasn’t but a bitter of water left in the lake, but what is a bitter or two to a publicist? The next year—that would be, let us see, 9 years ago or more—they overlooked the lake as much as possible and the caption under the view booklet picture said: “Lake LaVerne—a lagoon which will be overlooked by the new million dollar Memorial Union.” The year after that—that would be, oh, you’re as good at arithmetic as we are—they bitterly hated to let go of that picture of the lake, but they didn’t yet have a photo of the Union, so they said: “Lake LaVerne—a lagoon which is being overlooked by a new million dollar Memorial Union.”

◆ The thing got to be a farce. Alumni came back to the campus to take their families canoeing. One summer school student packed up and left for the University of Wisconsin the second day here. He said he’d seen a picture of Lake LaVerne in the booklet and he was hanged if he was going to go all summer without a bath. And besides he thought they had better bathing bushes at Madison. If they had used more pictures of the bit of water,

the Bally Rot conductor would have been justified in sneaking into the Journalism Department office and substituting the caption: “Lake LaMud—a lagoon which was overlooked by the Memorial Union.”

But to get back to the beginning of things, and back to probably the best swamp hay field this side of the Florida Everglades: One LaVerne W. Noyes graduated from this college in the class of 1872. Some say it was the first class ever to leave the institution. Others snicker and ask how could any class have been so dull as to have entered in 1858—the 75 years ago we are celebrating—and not have graduated for 14 long years.

◆ Noyes knew a thing or two about campus gardening. For two years while he was in college he had charge under President Welch of the planting and the work on the ornamental grounds. He boasted that he had never worked for anyone, so we suppose that was all just a bunch of fun. But regardless of that he went to Chicago and began making windmills and dictionary holders. His heart soon went out to his alma mater—to use the Alumni Association interpretation of the term—and when the college sent word that it needed a flag pole, he resolved to do something about it.

What, thought Alumnus Noyes, in the midst of his windmills, dictionary stands, gas engines and electric transmission towers, would do more to grace the central campus than a windmillish flag pole? A bright new windmill tower was sent, and with a long iron pipe

“A Bit of Water to Enhance the Campus Charms”

A Job Unfinished

"Commencement" is, for very good reason, the term signifying the completion of a college career. Everybody knows that.

Perhaps, however, Iowa State's graduates don't realize that, when they step down from the stage in the Gymnasium with their diplomas in their hands, they may be commencing a new phase in their relationship with the college—one just as vital as the four years they have just completed.

For Iowa State offers them, through its research agencies and its adult education facilities, means to continue their education in a style that may become more important to them than the preparatory work they have finished.

The college feels that its work with and for its students can never be ended. Graduation — if graduates wish — may be only the beginning of a wider, fuller use of the college's opportunities.

Iowa State College

Ames

through its center was all laid out on the central campus, about 30 years ago, ready to raise the next morning to an upright position.

◆ But the morning never came—for the would-be flag pole. It was hooked by a bunch of students with advanced ideas about flag poles. Some say it was dragged to the site of future Lake LaVerne, others declare it met its end on the banks of Squaw Creek. Somewhere in the hinterland it was placed on a nice hot fire and bent all out of flag pole shape.

Naturally that made Windmiller Noyes a bit indignant. Little was heard of him for 20 years except that his indignation became adulation in another direction and he began to stroll about the ivy-clad walls of the University of Chicago. Things took their natural course. When he entered the University gates he was greeted by a gang of undergraduates emitting nine rahs for LaVerne Noyes with a lustier rah than ever greeted Coach Stagg. Whenever he entered a building—more nine rahs. It might be explained that the students knew the campus short cuts. After all, students can't spend all their class time emitting nine rahs for interested Chicagoans. The effect was overwhelming to Mister Noyes. Result: A women's dormitory on the Midway.

A couple of decades pass. That brings us up to—where is that piece of paper we had it added up on?—oh, maybe 20 years ago. Mister Noyes hired a landscaper, Simmons, who said one thing that was most needed to modify and complete Dr. Welch's original campus plan was a sheet of water. That, you see, was because the original radial scheme of Dr. Welch had been changed to a modified quadrangular court plan. So a couple of years later Mr. Noyes consented to foot the bill for

a sheet, yes, the same that later became a bit, of water.

Ole Davidson, of the class of 1897, who hailed originally from Marshalltown, and is a Stone & Webster civil engineer, designed the culvert that carries the Fort Dodge, Des Moines & Southern Railroad, or what is left of it, and the Lynn avenue entrance over College Creek. If there are any errors in that culvert Mister Davidson can be pardoned. Up on the top of the hill, about where you sit in the alcove that lets you look down back of the soda grill in the Commons, stood the Veterinary Barn. And just south of it smelled the pit where they stored their animals when the students got through cutting them up.

◆ The convicts from Anamosa came down and dug out the centuries of accumulated silt, carted it across Lincoln Way—it was Boone street in those days—dumped it around 115 Lynn avenue, to make a lawn for that residence, and spoiled that lovely hay field and a couple of meadow larks' nests. Somebody else built a dam at one end of the culvert and there they had—some said a lake, but the college publicists insisted that it was a bit, later relenting to call it a lagoon.

And it was a lake, with canoes, Isaac Walton casting bees, Military Department pontoon bridge building exhibitions, and occasional swimming—no, we did not say wading—until the next spring. Then the upper end began to fill with silt, just like it always had done for centuries past. The campus civil engineers built a filter dam near Welch avenue, but heck, people who turn out graduates who rebuild the Mississippi river, construct ocean bridges to Key West and dredge channels for sea-going steamships can't be expected to control rampagous College Creek. So it continued to fill up—clear to the dam. They flushed it out once or twice with a fire hose, before times like Veishea, but it always went hayward.

◆ Mister Noyes came back to the campus in 1915, when the lake had a lagoonish sheen that was not to be made sport of, and they made him a Doctor of Engineering at Commencement time. He died in 1919, before the thing got to be the mess that it is now, or, as we said back there, oh, we've forgotten how many pages ago, before it got to the state where the booklet writers would save said "a lagoon that was overlooked by a new million dollar Memorial Union." And as a constructive suggestion for Hello Day, might we not greet eac h other with the cheery phrase next spring: Have you overlooked Lake LaVerne today? We want to.

COLLEGE BOOK STORE
ON THE CAMPUS

SOMETHING IT MEANS TO BE

A drama in one act and an epilog, strictly up-to-date and interspersed here and there with sprightly comments.

Scene: A couple of park benches. Just any old benches will do. Maybe a couple of packing cases would be better. It really doesn't make very much difference.

Characters: Oscar Lightfinger, A. H. '24; Willie Panhandle, H. E. '30; Wellington Fothergill Knotte-Hedde, Ph. D., A. D. T., C. & N. W. '28; Stewart Mulligan, E. E. '27; Col. McBride, a Limb of the Law (with badge and billy); a bum; another bum.

As the curtains part (somewhat jerkily), the stage is revealed bare of human habitation. To soft music (preferably "Hearts and Flowers") two men come on from the two wings, which is a stage term meaning the sides. One of these men is Oscar Lightfinger, in person; his apparel is distinguished by varicolored patches, a crownless hat and the fact that the clothes obviously were stolen from Tubby Kooser. Willie Panhandle, the other man, is similarly attired. They are, in short, Knights of the Road. They seem to be in the depths of depression (probably The Depression). They nod briefly at each other and sit down.

A moment later another Knight appears. Can it be a convention? (Read on, Gentle Reader, and you will find that the answer is "yes.") This Knight, Wellington Fothergill Knotte-Hedde, is a Dude. His clothing, though very ancient, fits him like the skin of an onion. He tips his hat to the two already seated (a hat four sizes too small) and speaks courteously.

Knotte-Hedde: Pardon me, gentlemen, but could you tell me the time?

Oscar Lightfinger, from the folds of his oversize trousers, produces an alarm clock and looks at it. Then he puts it to his ear and shakes it lightly. It jingles. He looks at it again, holds it to his ear again, and shakes it mightily. This time, positively, it rattles. He bangs it on the bench, with lusty vigor, again regards it, and smiles triumphantly. He holds it up to Knotte-Hedde.

Lightfinger: There!

Knotte-Hedde (taking a gentlemanly squint at it): So it is! Thank you. (Looks about doubtfully.) Gentlemen, I seek the annual Founders' Day Dinner of the Des Moines alumni of Iowa State College. Could you direct me to it?

Eloquent in his gesture, Oscar waves to the vacant bench.

Knotte-Hedde: Thank you, thank you. (Whereupon, as any gent would do, he pulls a whiskbroom from an inside pocket, brushes off the bench. Then he applies like treatment to the seat of his pants. Sitting down, he puts his undersize hat carefully on his knee, flecking a fleck of dust from its fleckless crown.)

And at this very juncture another Knight strolls on. As he approaches Knotte-Hedde, the latter (celui-ci) arises and bows ceremoniously.

Knotte-Hedde: Sir, permit me to make you acquainted with myself. I am Mr. Wellington Fothergill Knotte-Hedde, of the State Center Knotte-Heddes—

Newcomer: I've heard of you.

Knotte-Hedde (there is no gainsaying that he is pleased): Yes?

Newcomer: Sure. You come from a long line of Knotte-Heddes. Aren't there Knotte-Heddes in Guthrie Center, too?

Knotte-Hedde: My good man, there are Knotte-Heddes everywhere. Wherever you look—on the supreme court bench, the professor's office, the editor's sanctum—you will find a Knotte-Hedde. And who might you be?

Newcomer: Stewart Mulligan. Call me Stew. Electrical engineering '27. Meet these others, Mr. Knotte-Hedde. (Mulligan, Stew, turns to the others, who beam.) Oscar Lightfinger, A. H. '24—

Oscar: Hullo, pardner. (You will judge from this that Oscar is a rough fellow.)

Mulligan:—and Willie Panhandle, H. E. '30.

Willie: I'm so pleased to meet you! (Willie is quite the opposite.)

Knotte-Hedde: Sirs, I am honored. It's been a long time since I attended an Iowa State meeting. (Pulls out a flat fifty tin.) Have a smoke?

This, it seems, is the first interesting thing that has yet been said, for it brings the other three to their feet, reaching avidly for the tin. Oscar gets there first; pulls out a short chewed cigar butt; looks at it, tosses it away, selects another, throws it away too; finally gets a long one and smiles with pleasure; smells it rapturously.

Oscar: Got this at the Fort Des Moines, didn't you?

Knotte-Hedde: Correct.

Oscar: You get 'em longer there. At the Savery they're too damn short to pick up.

Mulligan goes to sit down. Before he does so, however, he pulls a copy of the *Alumnus* from his pocket and spreads it on the bench.

Oscar: Do you sit on the *Alumnus*?

Mulligan (who is a hardy soul): Sure.

Oscar: Not me! It makes my—makes me tired just to read it.

Mulligan: Why, it's soft as an air cushion. . . Hot air. (Turns to Knotte-Hedde.) What do you do?

Knotte-Hedde: I travel.

Mulligan: What's your line?

Knotte-Hedde: Technocracy.

Mulligan: How's that?

Knotte-Hedde (who, you will discover, is something of a wit): Well, Technocracy claims that it can get along on four hours of work a day. I get along without any work at all.

Mulligan: I wish I'd learned to do that.

Knotte-Hedde: You should have taken chemistry under Gilman.

Most of the Photographs reproduced in this issue were made by us in our capacity as official photographers for the Bomb of 1933. It has been a pleasure to render this service, and we use this medium to thank the faculty, student body and Board of Publication for their kind and considerate cooperation.

Phone 347

109 Welch Ave.

Oscar, meanwhile, has conducted another successful search within the recesses of his capacious pants. He pulls out a big nickel box of matches, extracts a match and tries vainly to light it here and there. After Knotte-Hedde's last remark, Oscar disgustedly throws the match on the floor. It delivers a resonant ring, indicating that it's a 10-penny nail.

Whereupon Oscar arises, pulls a sledge hammer from an inside pocket, and raps on the bench. He is about to call the meeting to order.

Oscar: This meeting will now come to order. We will first sing our theme song, "It Means Something to Be an Alumnus of Iowa State." All together:

The four loyal alumni, representing the Des Moines chapter, arise, and with bowed heads intone their solemn song (to the tune of "God Save the King" or, if you like, "America").

It means something to be

A grad of I. S. C.

It means something.

It means something to be,

Something it means to me,

To me it means something to be—

It means something.

From which, with jauntier mien, they swing into their second song, with gestures:

Oh, sing me a song of an Iowa steak—

So juicy, thick and rare.

I haven't had a meal today,

I haven't combed my hair.

My coat will soon fall off my back,

My pants will separate.

It means something to be a Grad

Of Good Old Iowah State.

This concluded, they resume their seats (except for Mulligan, who reclines, and Oscar, who remains standing).

Oscar: We will now take up old business. Anybody got any old business?

Mulligan: I've got an old business I'll sell for a dollar.

Oscar (banging the gavel, for he will have order at any price): Take your old business around the corner.

Mulligan: Why?

Oscar: That's where prosperity is. Any other old business?

No response.

Oscar: Any unfinished business?

Silence.

Oscar: Any new business?

A great calm.

Oscar: Any business at all?

Mulligan (whose profanity, at times, will out!): Hell, no! We're grads of Iowa State.

Oscar: We'll have the reading of the minutes.

Knotte-Hedde: What minutes?

Oscar: Any minutes. We've got to have minutes.

Knotte-Hedde (picking up Oscar's alarm clock and tossing it to Oscar's feet, it jingling musically the while): Use this. It's full of minutes.

Willie (feeling he has been quiet quite long

enough, jumping up): I move that we refer the minutes back to the minute men.

Oscar: A good idea. (He tosses the block back to Knotte-Hedde.) We'll have the report of the refreshments committee.

Everybody sits up eagerly; for, after all, it isn't everybody who gets refreshed these days. Mulligan arises sadly.

Mulligan: Mr. Chairman, your committee on refreshments called at 20 back doors and all he got was hoof and mouth disease.

Oscar (not to be trifled with): What do you mean, hoof and mouth disease?

Mulligan: Well, at the twentieth place they sicked a bull dog on me. He caught me before I made the fence, and ripped off my shoe.

Mulligan (who is, it might as well be admitted, puzzled): I don't understand.

Mulligan: He not only ripped off my shoe but his mouth gave my hoof dis-ease.

Mulligan, perhaps a bit dull if the truth were known, thinks this very funny and laughs uproariously. While the others are showing they do not share his opinion, Col. McBride, the Limb of the Law, enters, polishing his badge and twirling his billy.

McBride (turning out to be very polite): How do you do, gentlemen?

Oscar (not to be outdone): Not very well colonel. We have no food, no clothing, no shelter.

Willie (oh, so sadly!): No jobs!

McBride: What, no jobs? What are your qualifications?

Oscar: Well, I'm an animal husbandry expert. I have a master's degree.

Mulligan: Me, I'm an electrical engineer—belong to Tau Beta Pi.

Knotte-Hedde: And I'm a Ph. D. in industrial science.

Willie (triumphantly): I'm simply a gorgeous cook!

McBride: Gentlemen, this is very sad. But I have just the jobs for you.

Oscar: You mean work? Regular work?

McBride: Very regular. A full day's work every day.

Oscar: What kind of work?

McBride: Subdividing stones with a large mallet. And pushing a brush around the streets of our lovely city.

Knotte-Hedde: And we'll have safe shelter at night?

McBride: Very safe. With a man to watch over you and keep anyone from disturbing your sleep.

Willie: Do we get clothes?

McBride: Do you get clothes! Lovely clothes—neat, but not gaudy. (Here the colonel becomes so enraptured that he lapses into appropriate gestures.) With an attractive

design of alternate bands of white and black running horizontally around the body. Just come with me—

Their enthusiasm, here, can no longer be contained. And so, naturally, they break into song. They advance to the center, the cop in the middle, and sing, to the lilting strains of "Farmer in the Dell":

Oh, we're grads of Iowa State,
We're grads of Iowa State—
High-o, the derry-o,
We're grads of Iowa State.

We'll work from eight to twelve,
We'll work from twelve to eight—
High-o, the derry-o,
We're grads of Iowa State.

We'll always be on time,
We never will be late—
High-o, the derry-o,
We're grads of Iowa State.

We'll live a sheltered life,
Supported by the state—
High-o, the derry-o,
We're grads of Iowa State.

This thing has gone far enough, and their enthusiasm is waning. So, as they go into the last stanza, what do they do—what, indeed?—but change the tempo to that of a dirge?

That's what it means to be
A grad of I. S. C.—
High-o, the derry-o,
We're grads of Iowa State!

And upon this scene of sadness and solemnity there falls the curtain. But it parts at once for the

EPILOG

which is short and very simple. Two bums approach each other from the wings (for definition, see start of manuscript). They are downcast and dejected—so much so that their eyes are on the floor and they do not see each other. Therefore they bump into each other, midstage. They look up, and, as they suddenly shake hands, the following spirited conversation takes place:

First Bum: As I live and breathe—
it's Charles F. Curtiss!

Second Bum: Well, Anson Marston—
you old bum!

It's Finished !

And the staff breathes a sigh of relief as the load slips off.

But it isn't the staff's book. It's yours - - all of you who have gone places and done things. We have tried only to catch and put down on paper the accomplishments of the year of 1933. We hope you'll like the mirror we've made for you.

In the pages you have just leafed through, you have seen more than once the picture of Muriel Dickinson. It is the Bomb's sorrowful duty to record her sudden death on Feb. 16, 1933. But we like to think that the Bomb also gives to her friends a permanent record of three fine years at Iowa State - - three years in which she made a place for herself in student activities and in the lives and hearts of countless students.

We want to thank those who have helped to make the Bomb of 1933;

◆ A faithful staff who worked long and hard for many months;

◆ Mitchell V. Charnley, associate professor of technical journalism, and W. E. Holmes, superintendent of the Collegiate Press, who willingly gave their time and helpful advice to the consideration of its problems;

◆ T. J. Manry, R. R. Maplesden and J. G. Bell of the Burger-Baird Engraving Company, who gave more than they were paid for.
