College of Agriculture

Mechanization has entered into the agriculture college.

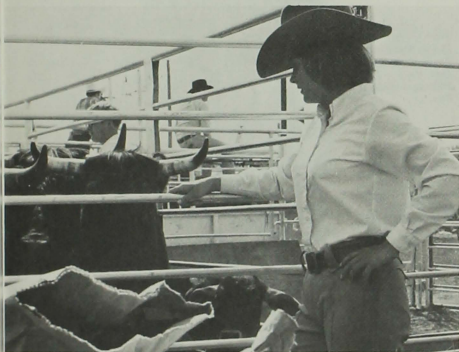

Precision is a main factor in Landscape Architecture.

Dean Floyd Andre, Agriculture

The college of Agriculture is attacking the environmental problem on many fronts. Research continues to develop plant strains that are resistant to disease thus enabling more people to be fed from a single acre of land.

— *Dean Andre*

Block & Bridle sponsors a rodeo each year at Veishea. Coeds are welcome as well as men.

Dean Virgil S. Lagomarcino, Education

Last spring our students demonstrated maturity by expressing their points of view in a peaceful fashion. This same stable quality has been demonstrated over the years by Iowa State students. It is important to note, however, that today students are becoming more and more aware of the critical issues of our times. I am impressed by their idealism. We need more of it in order to make this world become a better place in which to live.

— Dean Lagomarcino

College of Education

Actual classroom teaching experience has proved beneficial to the teachers as they are working toward their degree.

Elementary education teachers get actual experience working with grade school children through an arrangement between the college and the Ames school system.

Dean David R. Boylan, Engineering

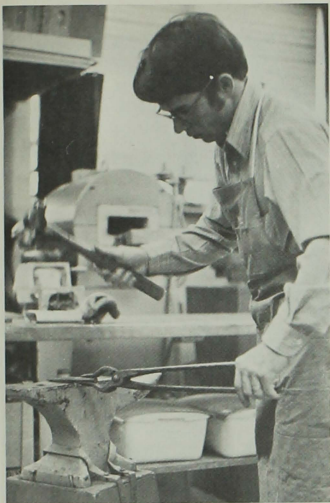

The environmental issue is not new. The engineering college has been working on improving our environment for years. However, the increasing public concern has speeded our efforts through a new interest and awareness on the part of students and funding organizations.

— *Dean Boylan*

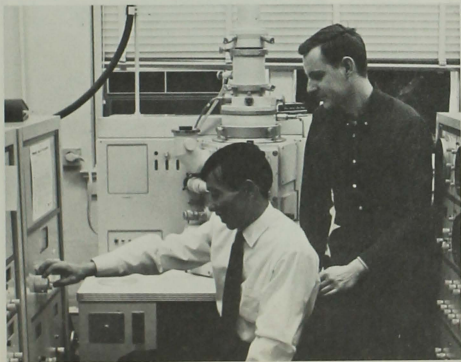

Central campus provides an ideal spot for the civil engineering classes.

College of Engineering

As with most courses, students find that practical application teaches a better lesson than books.

Students find a challenge in the engineering college.

Working in an engineering college laboratory requires much of the students time.

College of Home Economics

Foods and Nutrition courses prepare the student for all phases of food preparation.

Weaving looms are available for use in Applied Art, Interiors, and the weaving course.

Dean Helen LeBaron Hilton, Home Economics

The Home Ec college is devoted to improving the living of people — families and individuals. We try to prepare our students to live in the environment of the 70's and to help others to do likewise.

— *Dean LeBaron Hilton*

The many laboratories in MacKay Hall allow the student to come in and complete projects at his own speed.

College of Science and Humanities

Computer Science Department is housed in one of the newest buildings on campus.

Students spend many after-hours working on Bacteriology projects.

Dean Chalmer J. Roy, Science and Humanities

The campus violence of Spring 1970 did not erupt at ISU because of the "openness" of the campus. Students are free to air their gripes through many channels, such as GSB, the college councils, department heads, deans, advisers, and instructors. If all else fails, President Parks' door is always open.

— Dean Roy

Weather permitting, Botany students use the campus as their classroom for studying different varieties of trees.

Chemistry Lab allows the student to experiment with an experiment.

Science & Humanities

Many teachers strive for an informal class.

"Lion in Winter" was presented fall quarter in Curtiss Auditorium.

College of Veterinary Medicine

Operations are performed daily in the veterinary medicine clinic.

Many of the veterinary courses deal with working with live animals, brought in from across the state for use within the clinic.

Dean R. L. Kitchell, Veterinary Medicine

The commitment of the college of veterinary medicine is to people and students since the University is a total living environment for four to six years. We make every effort to accommodate the individual and cater to his professional needs.

— *Dean Kitchell*

The college of veterinary medicine provides the doctor with a variety of animals for study and examination.
