

Some Cass County W P A Projects

To provide employment for the 434 Cass county certified relief workers, a variety of practical projects were planned and sponsored by local and county authorities and business men, chief of which is Farm-to-Market road improvement. Since WPA has operated in the county 37 miles of rural roads have been drained, landscaped and surfaced, including the spreading of crushed rock on 22 miles of roads and streets. This has required the opening and operation of several quarries. Then there are WPA nursery schools, practical nursing units, library work, surplus commodity surveys, a sewingroom project, laying cement sidewalks, building a community swimming pool and bathhouse, and the improvement of Sunnyside Park in Atlantic, some of which employment activities are indicated on the map above.
